The following criteria of education and experience qualify toward accumulation of the required seven years of professional geological work:

(A) Each year of undergraduate study in the geological sciences shall count as one year of training up to a maximum of two years, and each year of graduate study shall count as a year of training up to a maximum of three years.

Such specialties may be created by the State Board of Geologist Examiners by rule, with the rules to contain any required additional qualifications. Only a registered geologist is eligible for certification in a specialty. Application may be submitted for both registration as a geologist and for certification in a specialty at the same time, but the applicant must be approved for registration as a geologist before being considered for certification in a specialty.

(2) An applicant for certification in a specialty shall meet all of the requirements of a registered geologist and such special requirements as the board may establish by regulation, normally including a written examination and, in addition, the applicant’s seven years of geological work shall include one of the following:

(a) A minimum of three years performed under the supervision of a geologist registered and certified in the specialty for which the applicant is seeking certification with the exception on timing noted in ORS 672.555 (2)(b); or

(b) A minimum of five years’ experience in responsible charge of geological work in the specialty for which the applicant is seeking certification.

(3) The board shall establish professional affairs committees, as needed, to represent each of the specialties into which the board determines certification of registration may be divided. Each committee shall establish qualifications, which shall include a written examination, for certification in its specialty, and shall establish a definition of that specialty, subject to approval of the board; and shall advise the board on professional affairs in which the committee is concerned. Membership of each committee shall be made up exclusively of geologists certified or qualified in the particular specialty involved.

(4) Engineering geology shall be one of the specialties requiring certification.

(5) Certification as a geologist in training shall require graduation from an accredited college or university with a major in geology or geological sciences as prescribed under ORS 672.555 (2)(a) and the passing of a written, or written and oral examination on geological subjects. The issuance of a certificate of registration by the board shall be prima facie evidence that the person named therein is entitled to all the rights and privileges of a registered geologist, or certified specialty geologist, while the certificate remains unrevoked or unexpired.

(2) All certificates shall be renewed annually at such time as will be designated by the board. All applications for renewal shall be filed with the administrator before the expiration date, accompanied by the annual renewal fee. A license which has expired for failure to renew may only be restored after application and payment of the prescribed restoration fee.

A person who holds a certificate of registration to engage in the practice of geology, or a certificate of specialization, issued to the person by a proper authority of a state, territory, or possession of the United States or the District of Columbia having licensing requirements comparable to Oregon, and who, in the opinion of the State Board of Geologist Examiners otherwise meets the requirements of ORS 672.505 to 672.705 may, upon application, be registered without further examination.
