(5) The department shall continue the pilot project for at least six years from the date the contracts are entered into.

(6) The department shall submit, during each regular session of the Legislative Assembly, a biennial report summarizing the progress toward achieving the goals of this section to the House and Senate committees related to business and labor and to the appropriate subcommittee of the Joint Committee on Ways and Means that considers the agency's budget. **366.284** [1953 c.252 §8; repealed by 1977 c.312 §4]

**366.285 Location of highways when in doubt; procedure.** (1) The Department of Transportation may locate, relocate, define, establish, reestablish and confirm the extension, location and establishment of primary and secondary state highways where:

(a) By reason of loss or destruction of field notes of the original surveys made by the county when such roads or highways were laid out and established by the county, defective or incomplete surveys or records, or destroyed monuments or marks, the exact original location and boundary cannot be found or ascertained.

(b) For any reason the exact location and right of way lines are in doubt or are challenged.

(2) In exercising the authority under subsection (1) of this section the procedure afforded the county with respect to public roads under ORS 368.201 to 368.221 may be followed by the department. [Amended by 1981 c.153 §61]

**366.290 Adding to or removing roads from state highway system; responsibility for construction and maintenance.** (1) The Department of Transportation may select, locate, establish, designate, improve and maintain out of the highway fund a system of state highways, and for that purpose may, by mutual agreement with several counties, select county roads or public roads. By an appropriate order entered in its records the department may designate and adopt such roads as state highways. Thereafter the construction, improvement, maintenance and repair of such roads shall be under the jurisdiction of the department.

(2) In the selection of highways or roads to comprise the state highway system the department shall give consideration to and shall select such county roads or public roads as will contribute to and best promote the completion of an adequate system of state highways.

(3) With the written consent of the county in which a particular highway or part thereof is located, the department may, when in its opinion the interests of the state will be best served, eliminate from the state highway system any road or highway or part thereof. Thereafter the road or highway or part thereof eliminated shall become a county road or highway, and the construction, repair, maintenance or improvement, and jurisdiction over such highway shall be exclusively under the county in which such highway or road is located.

(4) The construction, maintenance and repair of state highways shall be carried on at the sole expense of the state or at the expense of the state and the county by mutual agreement between the department and the county in which any particular state highway is located. [Amended by 1953 c.252 §2; 1979 c.223 §1]

**366.292 Consideration of tolling prior to doing modernization project.** Before proceeding with a modernization project, or a series of modernization projects on a single highway, that might result in a segment of highway to which tolling could reasonably be applied, the Department of Transportation shall determine what portion of the costs of construction and maintenance could be recovered through tolls on users of the project. The toll potential of a modernization project shall be considered among other factors in determining which modernization projects should be included in the Statewide Transportation Improvement Program, with those projects with the greater potential to be self-funded through tolls ranking higher. A determination under this section may be based on assumptions that a single toll would be imposed or on assumptions that tolls would be imposed that vary depending on time of day or any other condition the department deems relevant. [1999 c.1072 §2]

**366.295 Relocation of highways.** The Oregon Transportation Commission may make such changes in the location of highways designated and adopted by the commission, as in the judgment and discretion of the commission will result in better alignment, more advantageous and economical highway operation and maintenance, or as will contribute to and afford a more serviceable system of state highways than is possible under the present location. [Amended by 1977 c.312 §1]

**366.297 Environmental performance standards; rules.** (1) As used in this section, "highway" has the meaning given that term in ORS 801.305.

(2) The Department of Transportation shall adopt rules, taking into consideration the following:

(a) Incorporating environmental performance standards into the design and construction of all state highway construction projects, including local government highway construction projects funded by the department.

(b) Improving the environmental permitting process for state highway construction projects in order to:

(A) Reduce the time required to design projects and obtain environmental permits;

(B) Reduce the cost and delay associated with redesigning projects to meet environmental requirements;

(C) Maintain a strong commitment to environmental stewardship; and

(D) Reduce this state's dependence on foreign oil. [2009 c.865 §18]

**Note:** 366.297 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 366 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**366.300 Treatment of sections eliminated when highway relocated.** (1) Whenever the Department of Transportation relocates or realigns a state highway or a section thereof, and by reason of such relocation or realignment there is eliminated from the original route of the highway a section thereof, the eliminated section shall, if needed for the service of persons living thereon or for a community served thereby, be maintained by the department at state expense, or by the county or by the state and the county on such terms and conditions as may be agreed upon.

(2) If such eliminated sections of old right of way, or any part thereof, in the judgment of the department, are needed or valuable for public road use, then the department shall, by appropriate action, declare the purpose of the department to preserve the same for public road use.

(3) If the department determines under subsection (2) of this section that the eliminated sections are merely parts of the old right of way which are no longer needed or valuable for highway right of way purposes or any other public road use, then if such eliminated sections are not owned by the department in fee, the department shall abandon such eliminated sections and such sections shall, except as otherwise provided in this section, revert to and title thereto shall vest in the abutting owner or owners.

(4) Nothing in this section shall impair vested rights of property owners under existing deeds, easements or contracts whereby the state or any county acquired such rights of way. This section shall not prevent the department from contracting for the acquisition of easements or rights of way on such terms and conditions as to abandonment and reverter as it may consider advisable under the conditions then existing. [Amended by 1985 c.259 §1]

**366.305 Materials, supplies and equipment.** The Department of Transportation may select the materials to be used in the construction, maintenance and operation of state highways. It may purchase or contract for, independent of any particular job, improvement or highway project, whether done

by contract, force account or otherwise, any material, supplies or equipment deemed necessary for carrying out the provisions and purposes of this Act in such amounts and manner and pursuant to such method as in the judgment of the department will be for the best interests of the state.

**366.310 Buildings and structures.** The Department of Transportation may construct, equip, furnish and maintain office accommodations, shops, equipment sheds, storage plants and warehouses, snow fences, patrolmen quarters or accommodations and any other building, structure or thing deemed necessary for the efficient administration of the duties of the department and which in the opinion of the department are required for the proper and adequate accomplishment of the purposes of this Act.

**366.315 Widths of rights of way.** The Department of Transportation may determine the widths of rights of way for all state highways.

**366.317 Removal of trees and shrubs; notice; application.** When the construction, expansion or improvement of a state highway as defined in ORS 366.005 would otherwise clearly and certainly cause the destruction of trees and shrubs which in the judgment of the engineer or the designee of the engineer may be removed in safety, the Department of Transportation shall:

(1) Prior to their destruction, cause notice to be placed in a newspaper of general distribution in the locality in which these trees and shrubs are located that these trees and shrubs may be destroyed, and that application may be made to the department at a specific time and place to remove these trees and shrubs for transplanting; and

(2) Permit the removal of these trees and shrubs by those making application to do so. [1975 c.414 §1]

**366.320 Acquisition of rights of way and right of access.** (1) The Department of Transportation may acquire rights of way deemed necessary for all primary and secondary state highways, both within and without the corporate limits of cities and towns, except that such rights of way within the corporate limits of cities and towns may be acquired at the sole expense of the state, at the expense of the city or town or at the expense of the city or town and the state, as may be mutually agreed upon.

(2) The department may acquire by purchase, agreement, donation or by the exercise of the power of eminent domain, real property or any right or interest therein deemed necessary for rights of way, either for original location or for widening, straightening or otherwise changing any

highway, road or street. The department may, when acquiring real property for right of way, acquire all right of access from abutting property to the highway to be constructed, relocated or widened.

(3) All rights of way owned or held by the several counties over and along any roads adopted as state highways are vested in the state, by and through the department. This subsection does not apply to any rights of way owned by any city for city streets. [Amended by 1953 c.252 §2]

**366.321 Expense of relocating municipal facilities payable by department; exceptions.** (1) When location, construction, relocation, reconstruction, maintenance or repair of a state highway requires relocation of any facilities placed or maintained in or on a public right of way by any municipal corporation, or a district or authority established under ORS chapter 264, 450, 451, 523 or 545, the Department of Transportation shall pay the municipal corporation, district or authority whose facilities are so required to be relocated the reasonable expenses of relocation, less any benefits and salvage of the relocation.

(2) Subsection (1) of this section shall not apply to:

(a) Facilities located in or on the right of way of a state highway under permits issued by the department upon the condition that the permittee would bear the cost of any relocation; or

(b) Facilities located in or on the right of way of a state highway where the municipal corporation, district or authority established under ORS chapter 264, 450, 451 or 545, has placed such facilities in or on the right of way of the state highway without a permit from the Oregon Transportation Commission or has refused to execute a permit as required by law or commission regulations. However, this paragraph shall not apply where such municipal corporation, district or authority has located facilities in or on the right of way of a city street or county road with the permission of the governing body of such city or county before such city street or county road was selected and designated a state highway by the Department of Transportation pursuant to ORS 366.290 or 373.010. [1967 c.272 §1; 1975 c.587 §1; 1975 c.782 §51a]

**366.323 Studies to aid in relocating persons displaced by highway acquisition.** When plans of the Department of Transportation projected for one year involve acquisition of properties in any city which will require removal of 25 or more dwelling units, businesses or institutions, the Department of Transportation shall make a study of the persons residing on or maintaining busi-

nesses or institutions on property scheduled for highway acquisition. Such studies shall be kept current until the premises required for highway acquisition are vacated. The department shall obtain such other information as it finds appropriate to aid in the relocation of persons displaced by the highway acquisition, and may extend its studies beyond city boundaries when the highway acquisition will involve dwellings, businesses or institutions within three miles of a city boundary. Such information shall be made available to the persons displaced and to other persons who may provide or assist in providing new locations. This section shall apply whether the highway acquisitions will be paid for in whole or in part from state funds either directly or by reimbursement. The Department of Transportation may contract with any governmental subdivision or agency, or with private concerns to make and maintain such studies, or may employ necessary assistants therefor. [1959 c.648 §1; 1963 c.187 §1]

**366.324 Financial assistance to persons displaced by highway acquisition; rules.** (1) When federal funds are available for payment of direct financial assistance to persons displaced by highway acquisition, the Department of Transportation may match such federal funds to the extent provided by federal law and to provide such direct financial assistance in the instances and on the conditions set forth by federal law and regulations.

(2) When federal funds are not available or used for payment of direct financial assistance to persons displaced by department acquisition of property, the department may provide direct financial assistance to such persons. Financial assistance authorized by this subsection shall not exceed the total amount that would have been payable under subsection (1) of this section if federal funds had been available or used. The department may adopt rules and regulations to carry out the provisions of this subsection. [1959 c.648 §2; 1963 c.187 §2; 1965 c.222 §1]

**366.325 Rights of way through cemeteries.** The Department of Transportation may acquire by purchase, agreement, donation or by exercise of the power of eminent domain, real property for right of way through a cemetery, except that the department has no authority to acquire any such real property by exercise of the power of eminent domain if within the area sought to be taken there are graves which would be disturbed by the location and construction of a highway. The department may acquire by purchase, agreement, donation or exercise of the power of eminent domain, real property contiguous to the cemetery, and may convey such real property to the cemetery

association or the owners of the cemetery in exchange for the property sought to be acquired for right of way purposes, but such authority shall not be exercised unless and until the owners of the cemetery agree in writing to the exchange of lands.

**366.330 Acquisition of land adjoining right of way.** The Department of Transportation may, when acquiring real property for right of way purposes, acquire additional real property adjoining the real property sought to be acquired for the particular public project if such additional and adjoining real property is needed for the purpose of moving and establishing thereon buildings or other structures then established on real property required for right of way purposes. The acquisition of the abutting, additional real property may be accomplished by purchase, agreement, donation or exercise of the power of eminent domain. Such real property can be acquired only in the event that the owner of the real property required for right of way purposes and on which there is then located buildings or other structures, has entered into a written agreement with the department providing for and consenting to the removal and reestablishment of the buildings or structures on the additional, abutting real property.

**366.332 Definitions for ORS 366.332 and 366.333.** As used in this section and ORS 366.333:

(1) "Real property" includes any right, title or interest in real property.

(2) "Utility" means any corporation, including municipal or quasi-municipal corporation, company, individual, association of individuals, lessee, trustee or receiver, that owns, operates, manages or controls all or part of any plant or equipment in this state, whether or not such plant or equipment or part thereof is wholly within or outside any city, which plant or equipment is used, directly or indirectly:

(a) For the conveyance of telegraph or telephone messages, with or without wires;

(b) For the transportation of water, gas or petroleum products by pipelines;

(c) For the production, transmission, delivery or furnishing of heat, light, water, power, electricity or electrical impulses; or

(d) For the transmission and delivery of television pictures and sound by cables. [1965 c.382 §2]

**366.333 Acquisition of utility real property; exchange of land for right of way.** (1) If real property upon which utility facilities are located is necessary for city street, public road or state highway location, relocation, construction, reconstruction, betterment or maintenance, and any portion of

the real property is likewise required by the utility for the proper operation of its business, but the utility is willing to convey the real property to the state for city street, public road or state highway purposes in exchange for other real property within a reasonable distance, the state, through the Department of Transportation, may acquire by purchase, agreement or by the exercise of the power of eminent domain, other real property, except that of another utility, within a reasonable distance. After having acquired such real property, the state, through the department, may convey it to the utility in exchange for the real property required from the utility for city street, public road or state highway purposes. The difference in the value of the respective real properties shall be considered by the department in making the exchange.

(2) ORS 366.332 and this section do not vest in any utility any right, title or interest in any city street, public road, state highway or other public property. [1965 c.382 §§3,4]

**366.335 Acquisition of railroad right of way; exchange of land therefor.** (1)

Whenever in the location, relocation, construction or betterment of any highway within the state, it is deemed necessary to locate, relocate or construct the highway, or any part thereof, upon the right of way of any railroad company, the state, through the Department of Transportation, may negotiate and agree with the railroad company for the right to use or occupy the right of way, or so much thereof as is necessary for highway purposes.

(2) In case no satisfactory agreement can be effected, then the state, through the department, may acquire the right of way by exercise of the power of eminent domain, and for that purpose may commence and prosecute condemnation proceedings to acquire the right to the use and occupancy of sufficient of the railroad right of way for highway purposes.

(3) Nothing in subsection (2) of this section authorizes the use or occupancy of the railroad right of way which would interfere with the operation of the railroad or its necessary appurtenances, taking into consideration the use of the railroad right of way by the company for yards, terminals, station grounds and necessary additional trackage, or which would jeopardize the safety of the public.

(4) In the event that the right of way or property of any railroad company in the state required or needed for state highway location, relocation, construction or betterment, and any portion of the property or right of way is likewise needed and required by the railroad company for the proper oper-

ation of its trains and the usual and ordinary conduct of its business, but which property or land the railroad company is willing to deed to the state for highway purposes in exchange for a like amount of land within a reasonable distance, the state, through the department, may acquire by purchase, agreement or by exercise of the power of eminent domain, an equal amount of land or property within a reasonable distance. After having acquired such land or property, the state, through the department, may convey the same to the railroad company in exchange for the land or property needed and required from the railroad company for highway purposes. The difference in the value of the respective parcels of land shall be considered by the department in making the exchange. [Amended by 1965 c.383 §1; 1999 c.59 §100]

**366.337 Exchange of certain parcels of land authorized.** The Department of Transportation, in the name of the State of Oregon, hereby is authorized to convey to any person, firm or corporation all or parts of the real properties described in section 1 of chapter 21, Oregon Laws 1953, in exchange for other real properties in close proximity thereto which, in the judgment of the department, are of equal or superior useful value for public use. [1953 c.21 §2]

**366.340 Acquisition of real property generally.** The Department of Transportation may acquire by purchase, agreement, donation or by exercise of the power of eminent domain real property, or any right or interest therein, including any easement or right of access, deemed necessary for:

(1) Construction of shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stock pile sites, weighing stations and broadcasting stations.

(2) Appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, connecting roads, frontage road, highway drainage and drainage tunnels.

(3) Maintenance of an unobstructed view of any state highway so as to provide for the safety of the traveling public.

(4) Any other use or purpose deemed necessary for carrying out the purposes of this Act.

(5) Elimination or prevention of hazardous or undesirable points of entry from adjacent property to state highways. [Amended by 1953 c.252 §2]

**366.360 Taking fee simple title.** In all cases where title to real property is acquired by the Department of Transportation either by donation, agreement or exercise of the power of eminent domain, a title in fee simple may be taken.

**366.365 Going upon private property; rules.** (1) The Department of Transportation may go upon private property in the manner provided by ORS 35.220 to determine the advisability or practicability of locating and constructing a highway over the property or the source, suitability or availability of road-building materials thereon.

(2) The department may go upon private property to cut down or remove trees located on the property without notifying the property owner if the department has determined that the trees create an immediate and substantial risk of damage or injury by obstructing, hanging over or otherwise encroaching or threatening to encroach in any manner on a state highway.

(3) Within a reasonable amount of time after the department cuts down or removes trees in the manner provided by subsection (2) of this section, the department shall locate the property owner and notify the property owner of the department's actions. The department may establish the process of notification by rule. [Amended by 1953 c.252 §2; 2003 c.477 §5; 2005 c.22 §259; 2009 c.130 §1]

The department may exchange property as provided in subsection (3) of this section regardless of whether the property is needed by, required by or useful

to the department if, in the judgment of the department, doing so will best serve the interests of the state.

(2) The department may sell, lease, exchange or otherwise dispose of such real or personal property in such manner as, in the judgment of the department, will best serve the interests of the state and will most adequately conserve highway funds or the department's account or fund for the real or personal property. In the case of real property, interest in or title to the same may be conveyed by deed or other instrument executed in the name of the state, by and through the department. Prior to such auction, the department shall give notice thereof not less than once a week for three consecutive weeks by publication in one or more newspapers of general circulation in the county in which the forest products are located and by such other media of communication as the department deems advisable. The minimum bid price and a brief statement of the terms and conditions of the sale shall be in the notice.

(c) Notice and competitive bidding under paragraph (b) of this subsection shall not be required if the Director of Transportation declares an emergency to exist that requires the immediate removal of the timber. If an emergency has been so declared:

(A) Then the timber, regardless of value, may be sold by a negotiated price; and

(B) The director shall make available for public inspection a written statement giving the reasons for declaring the emergency.

(5) The department's account or fund for the forest product shall be credited with the proceeds of the sale. [Amended by 1953 c.252 §2; 1971 c.279 §1; 1983 c.26 §1; 1989 c.904 §60; 1993 c.741 §40; 2005 c.32 §1]

When any money or a letter of credit is deposited with the department under this subsection, the department shall proceed with the proposed highway project.

(2) Money deposited under subsection (1) of this section shall be disbursed for the purpose for which it was deposited upon a voucher approved by the department and a warrant. [Amended by 1967 c.454 §38; 1979 c.365 §1]

To accomplish the reopening of the highway the department may, if it is deemed for the best interests of the state, proceed at once to remove the slide or to repair the damage with the department's own forces, or with other available forces. The department may cause such work to be done by contract without calling for competitive bids.

**366.460 Construction of sidewalks within highway right of way.** The Department of Transportation may construct and maintain within the right of way of any state highway or section thereof sidewalks, footpaths, bicycle paths or trails for horseback riding or to facilitate the driving of livestock. Before the construction of any of such facilities the department must find and declare that the construction thereof is necessary in the public interest and will contribute to the safety of pedestrians, the motoring public or persons using the highway. The department may issue permits for the erection and maintenance of the same. Any gates constructed under this section must be constructed and maintained upon the right of way and not upon the traveled portion of the highway. If gates or stock guards are constructed under this section pursuant to a permit issued by the department, then the permit may contain such conditions, obligations and requirements as the department may deem for the best interests of the general public.

**366.470 Agreements with railroad companies for snow removal.** (1) The Department of Transportation may enter into agreements with a railroad company for the removal of snow from highway and railroad whenever a state highway is in close proximity to a railroad track and by reason thereof and in order to remove from the highway snow and ice which has blocked or threatens to block the highway to traffic it becomes necessary to cast such snow and ice upon the railroad tracks, thereby impairing or interfering with train movement and tending to block train operations. The agreement may be made during or in anticipation of any such contingency, shall be in writing and shall fix the terms and conditions under which and the extent to and manner in which the state may, in removing the snow and ice from the highway, cast it upon the railroad tracks.

(2) The department may procure or cause to be executed by a corporation authorized to do such business in the state, a liability policy of insurance, an irrevocable letter of credit issued by an insured institution, as defined in ORS 706.008, or an undertaking running in favor of the state, the department, the railroad company and their officers and such employees of such parties as the contracting parties may designate.

(c) May, if so provided, reimburse either or both of the contracting parties for loss, cost and expense incurred in connection with or resulting from such work.

(4) The department may pay out of the highway fund the premium for the insurance or for the fee for the letter of credit and the cost and expense incurred or sustained by the railroad company and the state incident to the snow removal. [Amended by 1953 c.252 §2; 1991 c.331 §58; 1997 c.631 §466]

Prior to entering the rest room, the assisting person shall receive permission from anyone who is in the rest room.

(b) Whether the users of each class are paying that share.

(2) The department may use any study design it determines will best accomplish the purposes stated in subsection (1) of this section. In designing the study the department may make decisions that include, but are not limited to, the methodology to be used for the study, what constitutes a class of vehicle for purposes of collection of data under subsections (1) to (4) of this section and the nature and scope of costs that will be included in the study.

The efficient fee study report must include recommendations for legislation to implement the efficient fee method of cost allocation. [2009 c.865 §30]

The program established under this section and the use of moneys in the program are subject to the following:

(1) The moneys may be used by the department to retire bonds that the department issues for the modernization program under bonding authority of the department.

(2) The intent of the modernization program is to increase highway safety, to accelerate improvements from the backlog of needs on the state highways and to fund modernization of highways and local roads to support economic development in Oregon. Projects both on and off the state highway system are eligible.

(3) Projects to be implemented by the modernization program shall be selected by the Oregon Transportation Commission. The criteria for selection of projects will be established after public hearings that allow citizens an opportunity to review the criteria. The commission may use up to one-half of moneys available under this section for modernization projects selected by the commission from a list of projects of statewide significance.

(4) In developing criteria for selection of projects, the commission shall consider the following:

(a) Projects must be of significance to the state highway system.

(c) Projects may be on county or city arterial roads connecting to or supporting a state highway.

(d) Priority may be given to projects that make a meaningful contribution to increased highway safety.

(e) Priority may also be given to projects that encourage economic development where:

(B) There is support from other state agencies.

(f) Priority may be given where there is local government or private sector financial participation, or both, in the improvement in addition to improvements adjacent to the project.

(g) Priority may be given where there is strong local support.

(5) Except as otherwise provided in this subsection, federal moneys or moneys from the State Highway Fund other than those described in this section may be used for the modernization program as long as the total amount used is equal to the amount described in this section. Federal moneys that are appropriated by Congress for specific projects and federal moneys that are allocated by the United States Department of Transportation for specific projects may not be used for the modernization program under this section. **366.508 Legislative findings.** (1) The Legislative Assembly finds that:

(a) Estimated highway, road and street revenues from current sources will not adequately meet the need for continued development of a statewide road and bridge system that is economically efficient, provides accessibility to and from commercial, agricultural, industrial, tourist and recreational facilities and enhances the highway safety, environmental quality and land use goals of this state;

(b) Responsibility for the cost of the highway, road and street system should be proportional and should be based on the number and types of vehicles that use the system and on the frequency of their use; and

(c) Expansion, modernization, maintenance, repair, reconstruction, increased capacity and enhanced safety on all roads and bridges is crucial to the economic revitalization of Oregon.

(2) The Legislative Assembly declares that the purpose of this section and ORS 319.020, 319.530, 366.507, 366.739, 366.774, 366.790, 825.476 and 825.480 is:

(a) To enhance the revenue base for the state, counties and cities for continued development and maintenance of the road and bridge system; and

(b) To enhance the revitalization of this state's economy by implementing a long-term plan for the state, counties and cities that establishes priorities for road and bridge improvements. [1987 c.899 §1]

**366.514 Use of highway fund for footpaths and bicycle trails.** (1) Out of the funds received by the Department of Transportation or by any county or city from the State Highway Fund reasonable amounts shall be expended as necessary to provide footpaths and bicycle trails, including curb cuts or ramps as part of the project. Footpaths and bicycle trails, including curb cuts or ramps as part of the project, shall be provided wherever a highway, road or street is being constructed, reconstructed or relocated. Funds received from the State Highway Fund may also be expended to maintain footpaths and trails and to provide footpaths and trails along other highways, roads and streets.

(2) Footpaths and trails are not required to be established under subsection (1) of this section:

(a) Where the establishment of such paths and trails would be contrary to public safety;

(b) If the cost of establishing such paths and trails would be excessively disproportionate to the need or probable use; or

(c) Where sparsity of population, other available ways or other factors indicate an absence of any need for such paths and trails.

(3) The amount expended by the department or by a city or county as required or permitted by this section shall never in any one fiscal year be less than one percent of the total amount of the funds received from the highway fund. However:

(a) This subsection does not apply to a city in any year in which the one percent equals \$250 or less, or to a county in any year in which the one percent equals \$1,500 or less.

(b) A city or county in lieu of expending the funds each year may credit the funds to a financial reserve fund in accordance with ORS 294.525, to be held for not more than 10 years, and to be expended for the purposes required or permitted by this section.

(c) For purposes of computing amounts expended during a fiscal year under this subsection, the department, a city or county may record the money as expended:

(A) On the date actual construction of the facility is commenced if the facility is constructed by the city, county or department itself; or

(B) On the date a contract for the construction of the facilities is entered with a private contractor or with any other governmental body.

(4) For the purposes of this chapter, the establishment of paths, trails and curb cuts or ramps and the expenditure of funds as authorized by this section are for highway, road and street purposes. The department shall, when requested, provide technical assistance and advice to cities and counties in carrying out the purpose of this section. The department shall recommend construction standards for footpaths and bicycle trails. Curb cuts or ramps shall comply with the requirements of ORS 447.310 and rules adopted under ORS 447.231. The department shall, in the manner prescribed for marking highways under ORS 810.200, provide a uniform system of signing footpaths and bicycle trails which shall apply to paths and trails under the jurisdiction of the department and cities and counties. The department and cit-

ies and counties may restrict the use of footpaths and bicycle trails under their respective jurisdictions to pedestrians and nonmotorized vehicles, except that motorized wheelchairs shall be allowed to use footpaths and bicycle trails.

(5) As used in this section, "bicycle trail" means a publicly owned and maintained lane or way designated and signed for use as a bicycle route. [1971 c.376 §2; 1979 c.825 §1; 1983 c.19 §1; 1983 c.338 §919; 1991 c.417 §7; 1993 c.503 §12; 1997 c.308 §36; 2001 c.389 §1]

**366.515** [Amended by 1971 c.376 §3; 1973 c.249 §39; repealed by 1975 c.436 §7]

**366.516 Incurring obligations payable from anticipated revenues.** The Department of Transportation may incur obligations to be paid from the State Highway Fund for the construction, reconstruction, improvement, repair or maintenance of highways, streets and bridges in excess of the amount then standing to the credit of the State Highway Fund if in the opinion of the department there will be sufficient funds available for the payment of such obligations when they become due and payable and all other debts, obligations and expenses chargeable against the State Highway Fund including those amounts that are required by law to be set aside from the State Highway Fund for particular purposes. Obligations incurred under the authority of this section need not be payable in the same biennial period during which the obligation is incurred. [1953 c.125 §2]

**366.517 Department may determine certain accounting procedures.** The Department of Transportation shall determine the accounting period for which any expenditures shall be charged against the State Highway Fund. The department may charge such expenditures against the State Highway Fund at the time the expenditures are actually paid even though the expenditures were obligated during a prior accounting period. The department may keep its accounts on a calendar year basis. [1953 c.125 §3; 1967 c.454 §40]

**366.518 Expenditures from highway fund to be reported, budgeted and limited to amounts budgeted.** The Department of Transportation shall submit a biennial statement and budget estimate as required by law, and shall limit its expenditures from the State Highway Fund during each biennial period to the total amount of the budget approved according to law; provided, that the word "expenditures" shall mean all money actually paid out or due and payable, but shall not mean liabilities or obligations incurred but not due and payable until a subsequent biennial period. The provisions of any law establishing a Legislative Assembly emergency committee shall apply to expendi-

tures from the State Highway Fund. [1953 c.125 §4]

**366.520 Expenses in legalizing state highways.** The expenses incurred in any proceeding by the Department of Transportation under ORS 368.201 to 368.221, when applied to state highways, shall be paid out of the highway fund. [Amended by 1981 c.153 §62]

**366.522 Appropriations from highway fund for legislative interim committees.** It hereby is declared to be the policy and intent of the Legislative Assembly that the total appropriations out of the State Highway Fund made by it for the payment of expenses incurred by the Legislative Assembly by and through its interim committee during any biennium shall be deemed to be the maximum amount necessary for such purpose. Any unexpended and unobligated balance remaining in any such appropriation heretofore or hereafter made shall, after the expiration of the biennium for which the appropriation was made, be returned to the State Highway Fund and may thereafter be used for any purpose authorized by law. [1953 c.84 §1]

**366.523 Transportation Project Account.** (1) The Transportation Project Account is created in the State Highway Fund. Moneys in the account are continuously appropriated to the Department of Transportation for the purpose of making allocations described in ORS 367.617 and for the purpose of paying bond debt service on Highway User Tax Bonds issued under ORS 367.615. Interest on the account is credited to the State Highway Fund.

(2) Amounts allocated by the Oregon Transportation Commission pursuant to ORS 367.617 for the purposes described in section 64, chapter 865, Oregon Laws 2009, shall be expended from the account.

(3) If at any time the department determines that there are not sufficient funds in the State Highway Fund to pay bond debt service on Highway User Tax Bonds issued under ORS 367.615, moneys in the Transportation Project Account shall be transferred to the State Highway Fund and shall be used by the department to pay bond debt service on Highway User Tax Bonds issued under ORS 367.615.

(4) For the purposes of this section:

(a) "Bond" has the meaning given that term in ORS 367.010.

The departments shall encourage the acquisition of lands, or interests in lands, by donation, agreement, exchange or purchase.

(5) The departments shall assist and cooperate with other agencies and political subdivisions of the state, state agencies, the federal government, special purpose districts, railroads, public and private organizations

**366.556 Acceptance of provisions of Acts of Congress.** The State of Oregon assents to the Act of July 11, 1916, 39 Stat. 355, entitled "An act to provide that the United States shall aid the states in the construction of rural post roads, and for other purposes," or Acts supplementary thereto, and accepts the provisions and benefits of any Act of Congress having for its purpose the construction, improvement or maintenance of public roads or highways in the State of Oregon. [Formerly 366.705]

**366.558 Contracting with and submitting programs to federal government.** The Department of Transportation may enter into all contracts and agreements with the federal government relating to the survey, construction, improvement and maintenance of roads and highways, including county roads and city streets, submit such scheme or program of construction, improvement or maintenance as may be required by the federal government, and do all other things necessary fully to carry out the cooperation contemplated and provided for by the Acts of Congress mentioned in ORS 366.556. [Formerly 366.710]

**366.560 Pledge of state to match federal funds.** For the construction or improvement and maintenance of rural post roads or such other roads, highways and streets as may be eligible for federal aid funds, the good faith of the state is pledged to make available funds which alone, or combined with funds made or to be made available by counties and cities, will be sufficient to match funds made available to the State of Oregon by the federal government for highway, road or street purposes. For the purpose of evidencing such good faith the Department of Transportation, in the name of the state, is authorized to enter into any and all agreements with the federal government. [Formerly 366.715]

**366.562 Use of highway fund to match federal moneys.** The Department of Transportation may use, allocate or in any manner employ for the purpose of matching any sum of money made available to the state by the federal government for road or highway pur-

poses any moneys credited to the highway fund, regardless of the source from which such moneys may have been derived. [Formerly 366.720]

**366.564 Borrowing to match federal moneys.** For the purpose of providing funds to match funds made available to the state by the federal government for highway purposes and for the matching of which federal funds there are no highway funds immediately available, the Department of Transportation may borrow money as provided in ORS 367.105. [Formerly 366.725]

**366.566 Meeting requirements of federal aid statutes.** The Department of Transportation or officers having control of the state highways shall enter into such contracts, appoint such officers and do any other act or thing necessary to fully meet the requirements of the federal government and the officers acting under the federal statutes mentioned in ORS 366.556, or of other federal aid furnished. [Formerly 366.730]

**366.568 Using highway funds to comply with federal aid statutes.** The Department of Transportation or officers having control of the state highways shall, out of the money received in the highway funds each year from any and all sources, first set aside, if deemed necessary or expedient, a sufficient amount to comply with the terms of the Federal Acts mentioned in ORS 366.556, and any other aid hereafter furnished by the federal government for the construction of roads and highways or to match the federal aid. [Formerly 366.735]

**366.570 Payments under cooperative agreement with federal government.** (1) Where state or county roads are to be surveyed or constructed under the supervision of the federal government with the aid of state or county funds, or both, the State Treasurer or county treasurer, or both, may advance to the federal government, in the manner provided in this section, the full amount set forth in the cooperative agreement, or such portion of the amount as may be specified by the federal government at any time after the Department of Transportation or the county commissioners have entered into a cooperative agreement with the federal government for the survey, construction or maintenance of a road under any such statute, or under any appropriation statute for the federal government against which such expenditures may be chargeable.

(2) The advance payments shall be made to the fiscal agent of the federal government designated by, and upon receipt of, a request for such funds from the federal government, if the federal government agrees to refund to the state or county treasurer, or both, as the

case may be, any amount advanced in excess of the proportionate share of the actual cost.

(3) When the state, through the Department of Transportation has entered into any cooperative agreement with the federal government for the survey or construction of any state road or highway as in this section contemplated, the department shall prepare, verify and approve a claim in favor of the federal government for the amount of the state's share of the cost of the work, accompanying the claim with a copy of the agreement. The claim shall be paid by warrant on the State Treasurer in the manner provided by law, from such funds as are available for road purposes as shall be directed by the department. [Formerly 366.765]

**366.572 State highway agreements with local governments.** (1) The Department of Transportation may enter into a cooperative agreement with any one or more cities, counties, road districts or other municipalities of the state for the construction, reconstruction, improvement, repair or maintenance of any state highway, and provide for an allocation of the cost of the project to the contracting parties.

(2) The Department of Transportation may enter into cooperative agreements with any county for the survey, construction, improvement, reconstruction, repair or maintenance of any state highway or part thereof upon such basis of contribution as may be agreed upon between them. [Formerly 366.770]

**366.574 Intergovernmental road maintenance agreement.** (1) The Legislative Assembly declares that it is the public policy of the State of Oregon to promote cooperation between the Department of Transportation and counties on road maintenance projects when it results in an overall benefit to the public. Monetary savings that result from the cooperative efforts shall primarily be retained by the counties and the division of the department that enters into the agreement. The participants should endeavor to cooperate regardless of the proportion of benefit to either party.

(2) A county and the Department of Transportation or a division of the department may establish an intergovernmental road maintenance agreement that will govern the maintenance of state highways and county roads within the county or other areas described by the agreement or of a particular road project. The agreement must be ratified by the governing body of the county and the Director of Transportation. An agreement under this section shall require highways and roads to be maintained in accordance with standards mutually established by the Oregon Transportation Commission and the county governing body.

(3) All employees and managers of the department and the county who will perform road maintenance activities described in the agreement or who will be involved in the road project described in the agreement must be given a reasonable opportunity to participate with the department and the counties in establishing the terms and provisions of the agreement.

(4) Nothing in this section or in the agreement affects title to or ownership of state highways or county roads.

(5) The agreement must:

(a) Provide for the use of state and county road maintenance equipment and facilities by the participants.

(b) Recognize an agreement between either participant and a state or federal agency established to protect the environment. The intergovernmental road maintenance agreement should contain references to applicable provisions that implement procedures and specifications contained in the agreement between either participant and the agency.

(c) Establish a procedure, consistent with appropriate collective bargaining agreements, to ensure that employees of the department and the county are properly supervised.

(d) Establish a procedure to determine which maintenance methods will be used by the participants.

(e) Establish a procedure to account for changes in operating costs due to the establishment of the agreement and to allocate increased costs or distribute cost savings between the county and the department.

(f) Establish a formula, adjustment factor or procedure for the equitable adjustment and comparison of the maintenance and equipment use rates required of the department under federal law and the maintenance and equipment use rates employed by the county.

(g) Authorize the participants to use either the procurement procedures applicable to the department or the procurement procedures applicable to the county as long as the procurement procedures include adequate safeguards fostering competition and are consistent with ORS 279A.015 and 279C.300. [Formerly 366.773]

**Note:** 366.574 was enacted into law by the Legislative Assembly but was not added to or made a part of ORS chapter 366 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

nance of any road, highway or street, upon terms and conditions mutually agreed to by the contracting parties, and the department may acquire by purchase, agreement, donation or by exercise of the power of eminent domain, any real property necessary for rights of way therefor. [Formerly 366.775; 2005 c.22 §262]
