If the department so requests, the distributor must submit the label or a facsimile of the label and other printed matter describing the product. Upon approval by the department, a certificate of registration shall be furnished to the distributor. All registrations expire on December 31 of each year. The application must include the information required by ORS 633.026 (1)(a) to (f) and such other information as the department may require.

(3) Changes in the guarantee of either chemical or ingredient composition of a registered commercial feed may be permitted, if there is satisfactory evidence that such changes would not result in a lowering of the feeding value of the product for the purpose for which designed.

(4) The department may refuse registration of any commercial feed if the application is not in compliance with the provisions of ORS 633.006 to 633.089 and 633.992. In approving laboratory methods, the department may consider methods listed in publications of AOAC International, formerly the Association of Official Analytical Chemists.

(c) The common or usual name of each ingredient used in the manufacture of the feed. The department, by rule, may permit the use of a collective term for a group of ingredients that perform a similar function. The department, by rule, may exempt a commercial feed or any group of feeds from the ingredient statement requirement if the department determines that a statement is not required to protect the interests of consumers.

(d) Adequate directions for use if the feed contains drugs or if the department, by rule, determines that directions are necessary for safe and effective use.

(e) Precautionary statements that the department, by rule, determines to be necessary for safe and effective use of the feed.

(2) The department may provide for the obtaining, handling and testing of samples of bulk commercial feed and custom mixed feed as provided in subsection (1) of this section, including split sampling thereof with portions of each sample being made available to the seller and to the contract feeder or person feeding the feed to animals. However, seed from a certified lot may be labeled as to variety name when used in a mixture by, or with the written approval of, the owner of the variety.
 - (2) No person shall substitute uncertified for certified seed.
 - (3) No person shall use tags or seals indicating certification other than as prescribed by a certification agency, as authorized by ORS 633.620 or 633.511 (2).

 - (b) Takes such invoice or grower's declaration in good faith; and
 - (c) Takes such other precautions as are reasonable to insure the identity of the seeds to be as stated.

633.660 Enforcement and administration. The director shall enforce ORS 633.511 to 633.750 and 633.996. However, the enforcement of certification regulations and the work of testing seeds and sampling, inspecting, sealing and certification labeling of tubers and horticultural plants and of agricultural, cereal grain and vegetable seeds for certification, as provided by ORS 633.600 to 633.640, shall be done by the dean. [Amended by 1955 c.379 §13]

One of the samples shall be transmitted to the agricultural experiment station seed laboratory at Oregon State University for official testing for regulatory purposes. The other sample shall be tendered to the representative of the organization from whose structure or vehicle the sample was taken.

(3) The director may seize any container of agricultural or vegetable seed possessed, sold, offered or exposed for sale for planting purposes in this state that appears to be in violation of any of the provisions of ORS 633.511 to 633.750 and 633.996, and proceed in the manner directed by law for the disposal of products seized by the department.

(4) Any sample taken under those sections, and the report showing the results of the official test made on any such sample, shall be prima facie evidence in any court in this state of the true condition of the entire lot, in the examination of which the sample was taken.

(5) A copy of the result of any such test shall be mailed to the person or authorized representative, if known, owning, possessing or holding the seed from which the sample was drawn.

The director may also establish reasonable charges covering issuance of permits, and the treatment and disposition of seeds seized and held under quarantine. However, in any case where the service involved is in such location or under such circumstances that the usual fees or charges are insufficient to cover the expense, the director may make additional charges to avoid loss to this state.
