(e) "Therapeutically equivalent" means drugs that are approved by the United States Food and Drug Administration for interstate distribution and the Food and Drug Administration has determined that the drugs will provide essentially the same efficacy and toxicity when administered to an individual in the same dosage regimen.

(2) Except as limited by subsections (3) and (5) of this section, unless the purchaser instructs otherwise, the pharmacist may substitute as follows:

(a) A drug product with the same generic name in the same strength, quantity, dose and dosage form as the prescribed drug which is, in the pharmacist's professional opinion, therapeutically equivalent.

(b) When the prescriber is not reasonably available for consultation and the prescribed drug does not utilize a unique delivery system technology, an oral tablet, capsule or liquid form of the prescribed drug so long as the form dispensed or administered has the same strength, dose and dose schedule and is therapeutically equivalent to the drug prescribed.

(3) A practitioner may specify in writing, by a telephonic communication or by electronic transmission that there shall be no substitution for the specified brand name drug in any prescription. The phrase "no substitution" or the notation "N.S." must be in the practitioner's handwriting or, if the prohibition was communicated by telephonic communication or electronic transmission, in the pharmacist's handwriting and shall not be preprinted or stamped or initialed on the prescription form.

(4) Every pharmacy shall post a sign in a location easily seen by patrons at the counter where prescriptions are dispensed or administered stating that, "This pharmacy may be able to substitute a less expensive drug which is therapeutically equivalent to the one prescribed by your doctor unless you do not approve." The printing on the sign shall be in block letters not less than one inch in height. If the pharmacist has reasonable cause to believe that the purchaser cannot read the sign or comprehend its content, the pharmacist shall endeavor to explain the meaning of the sign.

(5) A pharmacist shall substitute a drug product under this section only when there will be a savings in or no increase in cost to the purchaser.

(6) If the practitioner prescribes a drug by its generic name, the pharmacist shall, consistent with reasonable professional judgment, dispense or administer the lowest retail cost, effective brand which is in stock.

(7) Except as provided in subsection (8) of this section, when a pharmacist dispenses a substituted drug as authorized by subsection (2) of this section, the pharmacist must label the prescription container with the name of the dispensed drug. If the dispensed drug does not have a brand name, the prescription label shall indicate the generic name of the drug dispensed along with the name of the drug manufacturer.

(8) A prescription dispensed by a pharmacist shall bear upon the label the name of the medication in the container or shall be labeled as intended by the prescriber.

(9) The substitution of any drug by a licensed pharmacist or the pharmacist's employer pursuant to this section does not constitute the practice of medicine.

(10) No substitution of drugs made by a pharmacist or the pharmacist's employer in accordance with this section and any rules that the State Board of Pharmacy may adopt thereunder shall constitute evidence of negligence if the substitution was made within reasonable and prudent practice of pharmacy or if the substituted drug was accepted in a generally recognized formulary or government list.

(11) Failure of a practitioner to specify that no substitution is authorized does not constitute evidence of negligence unless the practitioner knows that the health condition of the patient for whom the practitioner is prescribing warrants the use of the brand name drug product and not the substituted drug. MISCELLANEOUS

689.605 Authority to dispense drugs from hospital pharmacies, drug rooms, student health centers and penal institutions; rules. (1) In a hospital or long term care facility having a pharmacy and employing a pharmacist, the pharmacy and pharmacist are subject to the requirements of this chapter, except that in a hospital when a pharmacist is not in attendance, pursuant to standing orders of the pharmacist, a registered nurse supervisor on the written order of a person authorized to prescribe a drug may withdraw such drug in such volume or amount as needed for administration to or treatment of an inpatient or outpatient until regular pharmacy services are available in accordance with the rules adopted by the board. However, the State Board of Pharmacy may grant an exception to the requirement for a written order by issuing a special permit authorizing the registered nurse supervisor in a hospital to dispense medication on the oral order of a person authorized to prescribe a drug. An inpatient care facility which does not have a pharmacy must have a drug room. In an inpatient care facility having a drug room as may be authorized by rule of the Department of Human Services, the drug room is not subject to the requirements of this chapter relating to pharmacies. However, a drug room must be supervised by a pharmacist and is subject to the rules of the State Board of Pharmacy. When a pharmacist is not in attendance, any person authorized by the prescriber or by the pharmacist on written order may withdraw such drug in such volume or amount as needed for administration to or treatment of a patient, entering such withdrawal in the record of the responsible pharmacist.

(2) In a hospital having a drug room, any drug may be withdrawn from storage in the drug room by a registered nurse supervisor on the written order of a licensed practitioner in such volume or amount as needed for administration to and treatment of an inpatient or outpatient in the manner set forth in subsection (1) of this section and within the authorized scope of practice.

(3) A hospital having a drug room shall cause accurate and complete records to be kept of the receipt, withdrawal from stock and use or other disposal of all legend drugs stored in the drug room. Such record shall be open to inspection by agents of the board and other qualified authorities.

(4) In an inpatient care facility other than a hospital, the drug room shall contain only prescribed drugs already prepared for patients therein and such emergency drug supply as may be authorized by rule by the Department of Human Services.

(5) The requirements of this section shall not apply to facilities described in ORS 441.065.

(6) A registered nurse who is an employee of a local health department established under the authority of a county or district board of health and registered by the board under ORS 689.305 may, pursuant to the order of a person authorized to prescribe a drug or device, dispense a drug or device to a client of the health department for purposes of caries prevention, birth control or prevention or treatment of a communicable disease. Such dispensing shall be subject to rules jointly adopted by the board and the Department of Human Services.

(7) A nurse practitioner who is authorized to write prescriptions under ORS 678.390 and employed by a college or university student health center registered by the board under ORS 689.305 shall be authorized to dispense drugs to the practitioner's patients if they are students of the college or university. Drugs dispensed shall be prepackaged by a pharmacy registered by the board or repackaged by a manufacturer registered with the board. The board and the Oregon State Board of Nursing shall jointly develop a list of classes of drugs to be dispensed, based on clinical appropriateness for the college student population. This list shall include, but not be limited to, oral contraceptives, contraceptive devices, antibiotics and anti-inflammatory medications. The list shall not include drugs not authorized for nurse practitioner prescription writing under ORS 678.385. Such dispensing is subject to rules jointly adopted by the board and the Oregon State Board of Nursing. The rules shall require that a pharmacist establish dispensing procedures and perform regular drug utilization reviews and that the pharmacist and nurse practitioner provide a means for patients to receive information on drugs dispensed to them.

(8) The board shall adopt rules authorizing a pharmacist to delegate to a registered nurse the authority to withdraw

prescription drugs from a manufacturer's labeled container for administration to persons confined in penal institutions including, but not limited to, adult and juvenile correctional facilities. A penal institution, in consultation with a pharmacist, shall develop policies and procedures regarding medication management, procurement and distribution. A pharmacist shall monitor a penal institution for compliance with the policies and procedures and shall perform drug utilization reviews. The penal institution shall submit to the board for approval a written agreement between the pharmacist and the penal institution regarding medication policies and procedures. (8) No manufacturer or wholesaler shall sell or otherwise distribute, or offer to sell or otherwise distribute, any drug or device except to a person legally authorized to resell, dispense or otherwise redistribute such drug or device. The licensing board may inspect the records and the inventory of samples.

(b) As used in paragraph (a) of this subsection, “drug sample” means a unit of a drug, subject to this chapter, that is not intended to be sold and is intended to promote the sale of the drug, and includes a coupon or other form which may be redeemed for a drug.

(11) For purposes of this section and ORS 678.375, distribution of prepackaged complimentary samples of medications by a nurse practitioner with prescription writing authority shall not constitute dispensing when the sample medication is within the established formulary for that practitioner.
