37 reduction of air, water or noise pollution or solid or hazardous waste or to recycling or appropri-
38 ately disposing of used oil than was claimed in the application for certification, the commission shall
39 cause written notice of its action, and a concise statement of the findings and reasons therefor, to
40 be sent by registered or certified mail to the applicant before the 120th day after the filing of the
41 application.

42 “(3) If the application is rejected for any reason, including the information furnished by the ap-

45 or noise pollution or solid or hazardous waste or to recycling or appropriately disposing of used oil,

1 the applicant may appeal from the rejection as provided in ORS 468.110. The rejection or the cer-

6 of a facility shall include certification of the actual cost of the portion of the facility to the person

9 “**ENERGY FACILITY SITING REQUIREMENTS**

10
11 “**SECTION 29.** ORS 469.320 is amended to read:

12 “469.320. (1) Except as provided in subsections (2) and (5) of this section, no facility shall be
13 constructed or expanded unless a site certificate has been issued for the site thereof in the manner
14 provided in ORS 469.300 to 469.563, 469.590 to 469.619, 469.930 and 469.992. No facility shall be
15 constructed or operated except in conformity with the requirements of ORS 469.300 to 469.563,
16 469.590 to 469.619, 469.930 and 469.992.

17 “(2) [No] A site certificate [shall be] **is not** required for:

18 “(a) An energy facility for which no site certificate has been issued that, on August 2, 1993, had
19 operable electric generating equipment for a modification that uses the same fuel type and increases
20 electric generating capacity, if:

21 “(A) The site is not enlarged; and

22 “(B) The ability of the energy facility to use fuel for electricity production under peak steady
23 state operating conditions is not more than 200 million Btu per hour greater than it was on August
24 2, 1993, or the energy facility expansion is called for in the short-term plan of action of an energy
25 resource plan that has been acknowledged by the Public Utility Commission of Oregon.

26 “(b) Construction or expansion of any interstate natural gas pipeline or associated underground
27 natural gas storage facility authorized by and subject to the continuing regulation of the Federal
28 Energy Regulatory Commission or successor agency.

29 “(c) An energy facility, except coal and nuclear power plants, if the energy facility:

30 “(A) Sequentially produces electrical energy and useful thermal energy from the same fuel
31 source; and

32 “(B) Under normal operating conditions, has a useful thermal energy output of no less than 33
33 percent of the total energy output or the fuel chargeable to power heat rate value is not greater
34 than 6,000 Btu per kilowatt hour.

35 “(d) Temporary storage, at the site of a nuclear-fueled thermal power plant for which a site
36 certificate has been issued by the State of Oregon, of radioactive waste from the plant.

37 “(e) An energy facility as defined in ORS 469.300 (11)(a)(G), if the plant also produces a sec-
38 ondary fuel used on site for the production of heat or electricity, if the output of the primary fuel
39 is less than six billion Btu of heat a day.

40 “(f) An energy facility as defined in ORS 469.300 (11)(a)(G), if the facility:

41 “(A) **Exclusively** uses [*biomass exclusively from*] grain, whey [*or*], potatoes, **oil seeds, waste**
42 **vegetable oil or cellulosic biomass** as the source of material for conversion to a liquid fuel, **the**
43 **production of electric energy, the generation of heat, the creation of transportation fuels or**
44 **the creation of substitutes for petroleum-based products;**

45 “(B) Has received local land use approval under the applicable acknowledged comprehensive

1 plan and land use regulations of the affected local government and the facility complies with any
2 statewide planning goals or rules of the Land Conservation and Development Commission that are
3 directly applicable to the facility;

4 “(C) Requires no new electric transmission lines or gas or petroleum product pipelines that
5 would require a site certificate under subsection (1) of this section; and

6 “(D) Produces synthetic fuel, at least 90 percent of which is used in an industrial or refueling
7 facility located within one mile of the facility or is transported from the facility by rail or barge.

8 “(g) A temporary energy generating facility, if the facility complies with all applicable carbon
9 dioxide emissions standards adopted by the Energy Facility Siting Council or enacted by statute and
10 the applicant agrees to provide funds to a qualified organization in an amount determined by the
11 council to be sufficient to produce any required reductions in carbon dioxide as specified in ORS
12 469.501. To support the council’s finding that the facility complies with all applicable carbon dioxide
13 emissions standards, the applicant shall provide proof acceptable to the council that shows the
14 contracted nominal electric generating capacity of the facility and the contracted heat rate in
15 higher heating value. The applicant shall pay the funds to the qualified organization before com-
16 mencing construction on the temporary facility. The amount of the carbon dioxide offset funds for
17 a temporary facility shall be subject to adjustment as provided in subsection (7)(c) of this section.

18 “(h) A standby generation facility, if the facility complies with all of the following:

19 “(A) The facility has received local land use approval under the applicable acknowledged com-
20 prehensive plan and land use regulations of the affected local government and the facility complies
21 with all statewide planning goals and applicable rules of the Land Conservation and Development
22 Commission;

23 “(B) The standby generators have been approved by the Department of Environmental Quality
24 as having complied with all applicable air and water quality requirements. For an applicant that
25 proposes to provide the physical facilities for the installation of standby generators, the requirement
26 of this subparagraph may be met by agreeing to require such a term in the lease contract for the
27 facility; and

28 “(C) The standby generators are electrically incapable of being interconnected to the trans-
29 mission grid. For an applicant that proposes to provide the physical facilities for the installation of
30 standby generators, the requirement of this subparagraph may be met by agreeing to require such
31 a term in the lease contract for the facility.

32 “(3) The Energy Facility Siting Council may review and, if necessary, revise the fuel chargeable
33 to power heat rate value set forth in subsection (2)(c)(B) of this section. In making its determination,
34 the council shall ensure that the fuel chargeable to power heat rate value for facilities set forth in
35 subsection (2)(c)(B) of this section remains significantly lower than the fuel chargeable to power
36 heat rate value for the best available, commercially viable thermal power plant technology at the
37 time of the revision.

38 “(4) Any person who proposes to construct or enlarge an energy facility and who claims an ex-
39 emption under subsection (2)(a), (c), (f) or (h) of this section from the requirement to obtain a site
40 certificate shall request the Energy Facility Siting Council to determine whether the proposed fa-
41 cility qualifies for the claimed exemption. The council shall make its determination within 60 days
42 after the request for exemption is filed. An appeal from the council’s determination on a request for
43 exemption shall be made under ORS 469.403, except that the scope of review by the Supreme Court
44 shall be the same as a review by a circuit court under ORS 183.484. The record on review by the
45 Supreme Court shall be the record established in the council proceeding on the exemption.

1 “(5) Notwithstanding subsection (1) of this section, a separate site certificate shall not be re-
2 quired for:

3 “(a) Transmission lines, storage facilities, pipelines or similar related or supporting facilities, if
4 such related or supporting facilities are addressed in and are subject to a site certificate for another
5 energy facility;

6 “(b) Expansion within the site or within the energy generation area of a facility for which a site
7 certificate has been issued, if the existing site certificate has been amended to authorize expansion;
8 or

9 “(c) Expansion, either within the site or outside the site, of an existing council certified surface
10 facility related to an underground gas storage reservoir, if the existing site certificate is amended
11 to authorize expansion.

12 “(6) If the substantial loss of the steam host causes a facility exempt under subsection (2)(c) of
13 this section to substantially fail to meet the exemption requirements under subsection (2)(c) of this
14 section, the electric generating facility shall cease to operate one year after the substantial loss of
15 the steam host unless an application for a site certificate has been filed in accordance with the
16 provisions of ORS 469.300 to 469.563.

17 “(7)(a) Any person who proposes to construct or enlarge a temporary energy generating facility
18 and who claims an exemption under subsection (2)(g) of this section from the requirement to obtain
19 a site certificate shall request the Energy Facility Siting Council to determine whether the proposed
20 facility qualifies for the claimed exemption. The council shall make its determination within 30 days
21 of receiving all of the information necessary to support the determination. Such exemption shall
22 provide that the applicant may not begin construction of the temporary energy generating facility
23 until the facility has received the required local land use approval under the applicable acknowl-
24 edged comprehensive plan and land use regulations of the affected local government and the facility
25 complies with all statewide planning goals and applicable rules of the Land Conservation and De-
26 velopment Commission. The exemption shall also require that the temporary energy generating fa-
27 cility cease operation no later than 24 months after the date of first commercial operation or
28 January 2, 2006, whichever is earlier. An appeal from the council’s determination on a request for
29 exemption shall be made under ORS 469.403, except that the order may not be stayed and review
30 by the Supreme Court is limited to the record made by the council.

31 “(b) The council may not grant an exemption for a temporary energy generating facility pursu-
32 ant to subsection (2)(g) of this section after July 1, 2003.

33 “(c) Within 30 days of ceasing operation of a temporary energy generating facility, the applicant
34 shall report the total actual fuel used during commercial operation of the temporary energy gener-
35 ating facility. Based on the total actual fuel used during commercial operation, the council shall
36 determine whether additional offset funds, as defined in ORS 469.503, and contracting and selection
37 funds are owed to the qualified organization. If the council determines that additional offset funds
38 are owed to the qualified organization, the applicant shall pay such amounts within 60 days of the
39 council’s order determining the amount of additional funds.

40 “(d) Notwithstanding the provisions of paragraph (a) of this subsection that require a temporary
41 energy generating facility granted an exemption pursuant to subsection (2)(g) of this section to cease
42 operation within 24 months of first commercial operation, if the owner of a temporary energy gen-
43 erating facility submits an application for a site certificate prior to the last day of the period con-
44 stituting the exemption or January 1, 2005, whichever date is earlier, the council shall extend the
45 period constituting the exemption and shall allow the temporary energy generating facility to con-

1 tinue operation until the council concludes its review of the site certificate application. The council
2 may specify a date by which the application must be completed. If the application is not completed
3 by the date specified by the council, or is rejected by the council, the energy facility shall cease
4 operation on the specified date. An energy facility operating pursuant to this paragraph shall cease
5 operation if the applicant for the site certificate suspends the application.
