SECTION 2. (1) As used in this section and sections 3 and 3a of this 2013 Act:

(a)(A) "Applied behavior analysis" means the design, implementation and evaluation of environmental modifications, using behavioral stimuli and consequences, to produce significant improvement in human social behavior, including the use of direct observation, measurement and functional analysis of the relationship between environment and behavior and that is provided by:

(B) "Applied behavior analysis" excludes psychological testing, neuropsychology, psychotherapy, cognitive therapy, sex therapy, psychoanalysis, hypnotherapy and long-term counseling as treatment modalities.

(b) "Autism spectrum disorder" has the meaning given that term in the fifth edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) published by the American Psychiatric Association.

The individualized treatment plan must be based on evidence-based screening criteria. An insurer may require

an updated individualized treatment plan, not more than once every six months, that includes observed progress as of the date the updated plan was prepared, for the purpose of performing utilization review and medical management. (a) Requirements and limitations regarding in-network providers; and

(b) Provisions relating to deductibles, copayments and coinsurance.

(9) This section applies to coverage for up to 25 hours per week of applied behavior analysis for an individual if the coverage is first requested when the individual is under nine years of age.
