

The Oregon Legislative and Education Outreach Office offers a specialized civics experience tailored to any and all Oregonians. The OLEO Office can produce a program for any age and size group from Preschooler to Senior Citizen and everyone in-between!

Page Programs:

Honorary Page Program:

Both the House of Representatives and Senate Honorary Page Programs offer the traditional one-day page experience. The House program will be incorporated into the Legislative Page program and participants will take part in that day's scheduled Legislative Page events and duties.

Oregon Legislative Page Program

The Legislative Page Program provides a week-long experience for participating students focusing on the functioning of the Legislative Assembly and offering civics instruction. This is a much deeper dive into the legislative process on a state, local and national level.

Internship Program:

A new program providing college Juniors and Seniors an immersive, in-depth learning experience like no other. Applicants will be screened by their colleges then hired through OLEEO. Benefits will include:

- College coursework credit
- Visits by college staff
- Mentoring and supervision by OLEEO staff
- Specialized GALLA classed tailored for the internship
- Greater potential for employment in subsequent sessions
- Direct involvement in the legislative process

Oregon Youth Legislature: (OYL)

The Oregon Youth Legislature will allow students to develop their abilities in various types of leadership, critical thinking skills, and public speaking that will help them to become active participants in our modern democratic society. Additionally, this elected body will allow Oregon's youth to relay the unique ideas, concepts and concerns as seen by the state's youth to the adult legislature.

Government And Legislative Learning Academy (GALLA)

The Government And Legislative Learning Academy (GALLA) is the umbrella program for all OLEOO outreach programs. GALLA provides opportunities for children, youth, young adults, students of any age and adults to learn, interact and understand attributes of civics, history, legislative education and civil leadership. The CEO and ELP programs are the current outreach offerings.

Citizen Education and Outreach: (CEO)

The CEO program is a tool for the legislative assembly to reach out to adult groups, organizations, elected bodies and/or other organizations that may benefit from direct interaction with a legislative Assembly representative. The CEO program is available to Oregonians from any part of the state by request only. Once this request is received, the OLEOO staffer will plan a visit and/or presentation on any desired topic related to civics, history, Oregon government or general information.

Experiential Learning Programs: (ELP)

The ELP has been developed for Oregon classrooms that seek an in-depth exploration of the Oregon legislative process as well as a hands-on civics experience. There are three options available for this outreach program:

1. Oregon legislative civics exploration and hands-on experience

This is a guided journey through the legislative process of our unique Oregon system. A packet of materials will be provided to participating classrooms or groups and the OLEOO Director will be available for in-classroom or email support to these materials. The final experiential event will be a simulated House floor session at the capitol or at the participants location.

2. A general civics exploration and hands-on experience

Much like the Oregon specific experience, this option will be provided by the OLEO Office as an interactive, experiential program culminating in a simulation-based exercise.

3. Various non-profit civics programs

Oregon has a myriad of civics programs that a student may participate in. The OLEO Office will be promoting and assisting in making these programs as successful in Oregon as possible. Summer programs are coordinated through OLEOO's partner 501c(3), Young Leaders Program to offer a week long, summer civics experience.
