

Tobacco Use in Oregon

Since 1996, smoking among Oregon adults has decreased nearly 30 percent (from 24% in 1996 to 17% in 2014).

Tobacco causes
7,000
deaths per year

In 2014, 17 percent of Oregon adults smoked cigarettes.

Tobacco use costs Oregonians \$2.5 billion a year in medical expenditures and lost productivity due to premature death.

Among Oregon Youth:

Although cigarette smoking among youth has declined over time, in 2015, 4 percent of eighth graders and 9 percent of 11th graders still smoke cigarettes.

In Oregon, e-cigarette use among 11th graders increased 240 percent from 2013 to 2015, from:

5% **17%**
