

RANKED METRICS FOR DIESEL PROGRAM

Combined 1 & 2

12

Density

Attainment Status (at risk of being out of compliance with Clean Air Act)

Special characteristics of industry – e.g., school buses, which impact children

11

Vulnerability (age, health-compromised, resilience)

Size of company (# of employees, financial resources)

Miles/HP/Hours of Service

Available technologies (retrofits vs. replacements)

10

Ability or inability for State to regulate (e.g., rail)

Volume of Emissions

Leveraging effect of certain programs

9

% of total emissions produced by the industry or portion of the industry

Year Produced

8

Known health status of region

7

Physical characteristics

Fleets – public vs private

5

On Road/Off Road

4

Minority/Women-Owned/Emerging Small Business (MWESB)

Seasonality of use

3

Years of Service for Owner
