

I am in favor of the passage of SB 1070 and of the amendments proposed to include timber harvesting into the regulations. Logging and tree plantations have massive climate impacts on both public and private lands. It is absolutely essential to an effective climate agenda to include regulation of these endeavors and I believe that the proposed amendments from the November 2nd, 2017 workgroup meeting are a good step in the direction of abating disastrous CO₂ emissions.

Thank you for your time and consideration.
