## **Statement from House Majority Leader Jennifer Williamson on Latest Revenue Forecast**

“Today’s revenue and economic forecast shows that our economy continues to do well, and that Oregon is a great place to start and run a business. Unfortunately, the forecast also highlights how broken our revenue system has become. Even when business is booming in Oregon, our revenue system prevents us from generating the funds we need to invest in our schools, senior care, and health care programs.

“Despite today’s good news, we’re still \$1.7 billion away from just funding our schools and basic services at their current levels. In order to minimize cuts to K-12 classrooms, in-home care for seniors, and health care services for struggling families, we need a serious conversation about finding efficiencies and reforming our revenue system.”
