

# DELIVERING FOR OREGONIANS

Oregonians are working together to create a state where everyone has the freedom and opportunity to succeed. In the 2025 session, Oregon House Democrats will protect what makes Oregon special, focus on improving the lives of Oregonians, and keep us moving forward.

# Fighting for an Affordable Oregon

We are committed to making Oregon an affordable place to live, learn, work, raise a family, and retire. From building more homes to reducing the cost of childcare, utilities, broadband, and health care/prescription drugs, Democrats will address the root causes driving the cost-of-living constraints Oregonians face. This means protecting consumers from price gouging and corporate greed and ensuring robust economic development. We will focus on upstream investments and prevention that lower costs for taxpayers in the long run.

## Making Government Work

Oregonians want their government to deliver on its core functions — an education system that prepares students for a lifetime of success, a safe and resilient transportation system, and an addiction treatment and mental health system that support those who need it. Whether at DMV or applying for veterans' benefits, Oregonians deserve to feel confident that our government systems are efficient, accountable, and effective. We will provide the legislative oversight needed to ensure public funds are improving the lives of Oregonians and delivering results.

## Keeping Oregonians Safe

Every Oregonian has the right to be safe in their community. We must hold people who commit crimes accountable and support victims of crime. We will ensure that our streets and sidewalks are clean, and protect Oregonians from the threat of gun violence. We will build pathways out of homelessness — providing all Oregonians a place to live. And as we continue to confront the climate crisis, we must invest in wildfire prevention and emergency preparedness.

## Protecting Basic Rights and Freedoms

We will defend every Oregonian's constitutional rights and basic freedoms. We will safeguard access to health care, unions, access to clean water, and the lands we love. We will protect full access to abortion and comprehensive reproductive services. Oregon is a better place because of our diversity; for people of every race, class, creed, and identity, Oregon is home. This principle of inclusivity is a fundamental freedom we will always protect. We won't let anyone divide us or hurt our friends, families, and communities who depend on us.

## Delivering a Roadmap Forward

Oregon is special because we embrace the Oregon Way, a vision for problem solving rooted in collaborative, future-focused ideas. We must hold polluters accountable and make meaningful progress towards reducing greenhouse gas emissions while ensuring our state is resilient in the face of climate change. We will lay the foundation for our state to be economically prosperous, preserve its natural beauty, and develop vibrant and interconnected communities.
