### **Statement from Majority Leader Val Hoyle on House passage of Interstate 5 bridge replacement project**

“Speaker Kotek and Representative Read worked hard to find bipartisan support for replacing the outdated Interstate 5 Bridge over the Columbia River. Smart public investments like this project are essential to Oregon’s economic recovery. When we invest in our roads, bridges and public transit, we create good-paying construction jobs in the short term and get goods to market faster for years to come. I’m also proud to support this bill because of it will make sure that American firms, including minority and small business owners, will have a fair chance to compete for work building this important project.”

The final vote on the House floor on House Bill 2800 was 45 to 11, with four members excused. It now moves to the Oregon Senate.
