

### **Tobacco Use in Oregon**

# What are the related deaths & economic costs of tobacco use?

- Tobacco use is the top preventable cause of death in Oregon. It caused 6,921 deaths in 2005.
- There are about 800 deaths caused by secondhand smoke in Oregon each year.
- In 2004, tobacco use cost Oregonians more than \$2.0 billion.

### Who uses cigarettes & smokeless tobacco?

- In 2006, 19 percent of Oregon adults (men: 20 percent; women: 17 percent) smoked.
- Some population groups have a higher proportion of smokers than the state average, including African Americans (30 percent), American Indians (38 percent), Medicaid/Oregon Health Plan clients (36 percent), adults who have not completed high school (30 percent), and adults with a household income less than \$15,000 (36 percent).

• Less than one percent of women use smokeless tobacco in Oregon, compared with seven percent of men.

### How many youth use cigarettes?

• Although smoking among youth has declined recently, 9 percent of 8<sup>th</sup> graders and 15 percent of 11<sup>th</sup> graders currently smoke.

# What is being done to prevent tobacco use and educate people?

• Comprehensive statewide tobacco programs have been shown to reduce tobacco use. These programs that include community programs and policies, counter-marketing campaigns, and smoking cessation efforts have proven effective over time.
