#### Overview of Oregon's Revenue System

#### Comparative Analysis

The most comprehensive way to compare Oregon's current revenue system with other states is to examine the most recent U.S. Census Bureau statistics on state and local government finance. These data include all state and local revenue sources (and expenditures) collected on a consistent basis from all states. The most recent data are for the 2015-16 fiscal year.

Census divides state and local revenue sources into six categories. These categories are:

- Taxes
- Revenue from the Federal Government
- Charges—consisting of direct payments for services from governments. The largest components of this category are higher education (tuition & fees) and payments for healthhospital services.
- Miscellaneous Revenue—the largest component of this category is interest earnings on government balances. Also included in this category are asset sales, system development charges and net revenue from lottery.
- Government Enterprises—consisting of gross revenue from government operated enterprises such as liquor sales and public utilities.
- Insurance Trust Revenue—is made up of current revenue generated by public employee retirement funds (mostly earnings on retirement funds), state operated workers' compensation funds and unemployment trust funds.

The Census combines all these sources to get total revenue for the state and local revenue system. Insurance trust revenue and gross revenue from government enterprises are subtracted to get general revenue. General revenue is a better gauge of revenue available for provision of public services because most enterprise revenue goes back into the operation and trust revenue is for specific future beneficiaries such as unemployed workers and public retirees. Finally, the Census Bureau defines own-source revenue as general revenue minus transfers from the federal government. This measure is the best overall reflection of the state and local government revenue burden borne by the residents of a state.

Census data for Oregon's 2015-16 revenue categories can be found in Table 1. The information is presented in a dollar per person format with Oregon's rank among the 50 states. A rank of 50 means lowest per capita revenue.

On a total revenue basis, Oregon ranks 12<sup>th</sup> among the states. However, this measure includes insurance trust revenue and gross government enterprise revenue, both of which are not generally available for the provision of public goods and services. General revenue (excluding the insurance trust and government enterprise categories), provides a better indication of revenue available to fund public services in the current year. In this category, Oregon state and local governments received \$10,163 per person during the 2015-16 fiscal year. Oregon ranked 14<sup>th</sup> among the states in this category. Own source revenue (general revenue minus transfers from the federal government) totaled \$7,463 per person for a ranking of 18<sup>th</sup>.

**Table 1: All Oregon State and Local Government Revenue** 

	\$ Per Person	State Ranking
SUMMARY CATEGORIES		
Total Revenue	\$11,717	12
General Revenue	\$10,163	14
Own-Source Revenue	\$7,463	18
REVENUE SOURCES		
Taxes	\$4,577	25
Federal	\$2,700	9
Charges	\$2,043	7
Miscellaneous	\$843	11
Government Enterprises	\$535	15
Insurance Trust Revenue	\$1,019	3

Table 1 also breaks down Oregon's revenue sources by category. Taxes comprise 45% of Oregon general state and local revenue. Oregon state and local governments collected \$4,577 per person in taxes in the 2015-16 fiscal year, an increase of 3.4% from the prior fiscal year. This ranked the state 25<sup>th</sup> in overall per person tax burden. Oregon ranks 9<sup>th</sup> among the states with \$2,700 in federal revenue (this category does not include federal revenue going directly to individuals such as Social Security benefits). Oregon is relatively dependent on charges for services, ranking 7<sup>th</sup> with \$2,043 in per person revenue. The charges category covers a large number of fees and charges for government services at the state and local level. The largest are charges for hospitals (28.1% of total charges) and higher education (24.2% of total charges). Oregon also ranks in the upper half of states in miscellaneous revenue 11<sup>th</sup>. The state's extensive use of lottery revenue contributes to this ranking. Oregon ranks 3<sup>rd</sup> in insurance trust revenue. The state's relative ranking tends to move up and down with changing financial market conditions because Oregon's retirement funding system is highly dependent on financial market returns.

Table 2 narrows the Oregon revenue system down to taxes only. Taxes play a particularly important role in state and local revenue systems because they are the primary source of revenue for general public goods such as education and public safety. Taxes also potentially have the largest impact on economic activity because they represent a direct extraction of resources from the private sector for use by the public sector.

Table 2: Oregon's Tax Revenue, Per Capita

	\$ Per Person	State Ranking
Total Taxes	\$4,577	25
Personal Income Tax	\$1,911	8
Corporate Income Tax	\$172	16
Property Tax	\$1,466	24
General Sales Tax*	\$0	48
Selective Sales Taxes	\$515	30
Other Taxes	\$513	8

<sup>\*</sup> Tied with 3 other states

Oregon's overall state and local tax burden ranks 25<sup>th</sup> on a per person basis. However, the state personal income tax burden is among the highest in the nation at \$1,911 per person. The ranking for corporate income taxes is 16<sup>th</sup> at \$172 per person. This measures includes only corporate taxes based on income and excludes other business related taxes. The property tax burden in Oregon is right at the middle among the states at 24<sup>th</sup>. The state tax burden on consumption (general sales plus selective sales) is the lowest in the country at \$515 per person. In addition to being one of four states without any general sales tax, Oregon ranks 30<sup>th</sup> in selective sales tax collections per person. Selective sales taxes include gasoline taxes, tobacco taxes, alcoholic beverage taxes, real estate transfer taxes and other excise taxes on specific purchases. It also includes health provider taxes which have risen in Oregon and other states in recent years. The other tax category includes severance taxes and estate taxes.

Another way to look at this same comparative revenue data is to divide the revenue numbers by total state resident income instead of population. This measure accounts for the size of the state economy rather than simply population size. In some cases the two measures can give very different rankings. For example, the state of Mississippi ranks near the bottom (45<sup>th</sup>) of the states in tax collections per capita but above the median (ranked 17<sup>th</sup>) as a percentage of resident income because the state's per capita income is relatively low. Table 3 shows the Oregon 2015-16 total revenue data as a percentage of state personal income for 2015.

Table 3: All State and Local Government Revenue, Percent of Income

	% of Personal Income	State Ranking
SUMMARY CATEGORIES		
Total Revenue	26.4%	7
General Revenue	22.9%	10
Own-Source Revenue	16.8%	10
REVENUE SOURCES		
Taxes	10.3%	20
Federal	6.1%	10
Charges	4.6%	7
Miscellaneous	1.9%	9
Government Enterprises	1.2%	12
Insurance Trust Revenue	2.3%	3

Oregon ranks higher in most revenue categories when percentage of personal income is used. This is not surprising, given that Oregon's per capita income is below the national average. Oregon's ranking in general revenue and own source revenue each increases to 10<sup>th</sup> using personal income. Oregon's ranking in overall taxes as a percentage of personal income is 20<sup>th</sup> on a percentage of personal income basis compared to 25<sup>th</sup> on a per capita basis. Oregon generally ranks higher on a percentage of personal income basis in the other categories.

Table 4 converts Table 2 from a per capita comparison to a percentage of personal income basis for state and local taxes. Both the personal income tax and the property tax burden appear higher on a percentage of personal income basis. Personal income taxes at 4.3% of personal income ranks 2<sup>nd</sup> highest. Personal income taxes are 8<sup>th</sup> highest among the states on a per capita basis. In terms of property taxes, Oregon ranks 18<sup>th</sup> on a percentage of personal income basis, up six notches from its

per capita ranking. The state ranks 16<sup>th</sup> in corporate income tax collections on a percentage of income basis.

Table 4: Oregon's Tax Revenue, Percent of Income

	% of Personal Income	State Ranking
Total Taxes	10.3%	20
Personal Income Tax	4.3%	2
Corporate Income Tax	0.4%	16
Property Tax	3.3%	18
General Sales Tax*	0.0%	48
Selective Sales Taxes	1.2%	31
Other Taxes	1.2%	10

The comparative analysis based on the most recent U.S. Census data leads to the following conclusions:

- Oregon's per capita revenue ranks above the median state as measured by general revenue and closer to the middle in terms of own source revenue. As a percentage of total state personal income, Oregon's general revenue ranks 10<sup>th</sup>, and own source revenue also ranks 10<sup>th</sup> among the states.
- Oregon's taxes are near the national average. Taxes are 25<sup>th</sup> highest on a per capita basis and 20<sup>th</sup> highest on a percentage of income basis.
- Oregon's total revenue is 12<sup>th</sup> highest when measured on a per capita basis and 7<sup>th</sup> on a personal income basis. However, total revenue includes earnings from trust accounts such as the public employee retirement system. These revenue sources are not a good indicator of revenue available for public services because they are obligated to beneficiaries. Trust fund earnings are also highly dependent on short term financial market conditions and therefore very volatile.
- Oregon's personal income tax burden is among the highest in the country 8<sup>th</sup> as measured on a per capita basis and 2<sup>nd</sup> as a percentage of personal income.
- Oregon's consumption tax burden (general sales plus selective sales taxes) is the lowest in the country.
- Oregon's property tax and corporate income tax burdens rank near the middle among the states.

#### Oregon's Revenue System over Time

Table 5 displays Oregon's relative ranking among the states over time for total taxes and the major broad taxes that the state revenue system has traditionally relied upon to fund public services. Throughout the past three decades, Oregon has consistently ranked high among the states in personal income taxes. The state has also consistently ranked near the middle in corporate income taxes. However, Oregon's property tax ranking among the states has declined as voter approved initiatives (Measures 5 and 50) limited revenue growth. As a result, Oregon's overall tax burden dropped from the upper half among the states to the lower half. Over the most recent years, the tax burden has been close to the middle of the states. Not shown on the table is the state's overall consumption tax burden (general sales taxes plus selective sales taxes), which has consistently ranked right at the bottom among the states.

**Table 5: Historical Ranking of Oregon Taxes** 

	Total <sup>-</sup>	Taxes	Pers Income		Corp		Property Taxes

#### **2 % SURPLUS KICKER**

Another unique feature of Oregon's revenue system is the 2% surplus kicker. The kicker was approved by the 1979 Legislature as part of an overall fiscal reform package. The package, which included property tax relief, was approved by voters in the spring of 1980. A complete listing of revenue related votes over the past 50 years can be found in section N1 - N3. In 2000, voters acting on a legislative referral put a large portion of the 2% surplus kicker statute into the state constitution (Article IX, Section 14). In 2012, voters modified the constitution (Measure 85), redirecting corporate kicker revenue to the General Fund for purposes of funding K-12 education.

#### How it Works

The kicker law divides all General Fund money into two pots: (1) personal income taxes plus all other revenue and (2) corporate income taxes. At the end of each biennium, a calculation is made for each pot. If personal income tax collections plus all other General Fund revenue is more than 2% higher than was forecast at the close of the regular session, then a credit must be paid to personal income taxpayers. If actual revenue in the personal income tax pot exceeds the 2% threshold, then <u>all</u> the money in excess of the close of session forecast, including the 2%, is returned to taxpayers.

A similar calculation is carried out for corporate income taxes. If actual corporate income tax collections are 2% or more above the close of session estimate for corporate income tax revenue, then a kicker is triggered. Under Measure 85, revenue resulting from the corporate kicker calculation is allocated to the General Fund for purposes of funding K-12 education instead of being returned to corporations. This constitutional amendment applies to corporate kicker calculations starting with the 2013-15 biennium.

Surpluses in the "all other" pot fund lead to a credit on personal income tax returns. The amount of the credit is an identical proportion of each taxpayer's personal income tax liability, prior to state credits, for the prior year. For example, if the kicker credit is 5% and the taxpayer had a liability before credits of \$1,000, he or she would receive a credit of \$50 on their income tax return.

The estimate upon which the kicker calculation is based can be increased, thereby reducing or eliminating the personal tax credit, on a one-time basis if an emergency is declared and approved by a 2/3 vote in each chamber of the Legislative Assembly prior to the end of the biennium upon which the kicker calculation is based.

#### History

Table 8 shows the history of the surplus kicker. A severe recession dropped revenues far short of the forecast in the first two biennia after enactment. The table actually understates the recession's effect. If the Legislature had not increased taxes in special session the shortfall would have been much larger than shown in the table.

Faced with budget problems associated with Measure 5 (1990), the Legislature suspended the kicker in 1991 and 1993. Kickers would have triggered in just one of the two pots in each of those biennia. The 1995 personal income tax refund was the first one paid by check. Prior to 1995, the personal kicker was paid through a tax credit. Personal kickers would continue to be returned through a refund when triggered until the 1995 law was changed by the 2011 Legislature.

Large corporate kicker credits were applied following the 1993-95 and 1995-97 biennia. Corporations were not eligible for a surplus credit for three biennia following the 1995-97 biennium. Corporate income tax collections exceeded the forecast by \$101 million in the 2003-05 biennium leading to a 35.9% credit on

LRO 1/18/2019 B1 Research Report #1-19

2005 corporate income tax returns. The excess corporate revenue occurred despite the defeat of Measure 30 in January 2004. The revenue from Measure 30 was included in the close of session forecast and therefore part of the base for the kicker calculation.

Personal income tax kicker refunds were distributed four biennia in a row starting with the 1993-95 biennium. These refunds averaged 7.8% with the largest (14.4%) following the 1995-97 biennium. The 2001 recession depressed non-corporate General Fund revenue well below forecast in 2001-03 and the failure of Measure 30 held non-corporate revenue \$401 million below the close of session projection for the 2003-05 biennium.

<sup>\*</sup>Based on December 2018 Forecast

The 2007 Legislature made several statutory changes that affected the kicker. First, using the constitutional exception process that allows the estimate to be changed with a 2/3 vote, the Legislature redirected the corporate kicker credit to the newly established Rainy Day Fund. The Legislature also modified the personal income tax refund process by basing the calculation on before credits tax liability rather than after credit liability. This change affected the distribution of the refund but did not affect the amount. Finally, the Legislature changed the tax year the corporate credit is based on from the current year to the prior year. This brought the corporate calculation into line with the personal refund calculation. This change will no longer apply due to the elimination of the corporate kicker credit brought about by the passage of Measure 85.

LRO 1/18/2019 B2 Research Report #1-19

The largest personal kicker refund was returned to taxpayers following the 2005-07 biennium. The refunds totaled \$1.071 billion or 18.6% of pre-credit tax liability in the 2006 tax year. The refunds were mailed out in the fall of 2007. The Great Recession and its aftermath forced both personal and corporate income tax revenue well short of the 2% kicker trigger for the 2007-09, 2009-11 and the 2011-13 biennia.

Both kickers were triggered following the 2013-15 biennium. The personal kicker was triggered for the first time since 2007 and for the first time since the Legislature changed the return mechanism back to a credit. As a result, personal income taxpayers received a kicker credit equal to 5.6% of their 2014 precredit liability. An estimated \$402.4 million was returned through the credit. Corporate income tax revenue also exceeded the 2013-15 close of session estimate by more than 2% resulting in \$79 million for the 2015-17 State School Fund allocation.

The experience of the 2013-15 biennium was replicated in the 2015-17 biennium. The personal kicker was triggered and personal income taxpayers again received a 5.6% tax credit, this time against their 2016 pre-credit liability. A total of roughly \$464 million was refunded through the tax credit. Corporate collections also exceeded the 2% trigger and resulted in \$111 million being dedicated to the 2017-19 State School Fund allocation.

As of December 2018, collections for the 2017-19 biennium for both pots of revenue are on pace to result in even larger kickers than during the two prior biennia. The non-corporate kicker is on pace to be roughly \$724 million, leading to an estimated 8.3% kicker. The corporate collections are on pace to exceed the Close-of-Session estimate by \$230 million, which would be dedicated to the State School Fund for allocation during the 2019-21 biennium.

For the 19 biennia in which the kicker has been in effect (1979-81 through 2015-17), the personal income tax trigger has been exceeded eleven times. Kicker refunds/credits were distributed on ten occasions and suspended once. Eight times revenue has fallen short of the 2% personal income tax trigger. For the corporate calculation, actual collections have exceeded the trigger ten times and fallen below nine times. Of the ten times in which the corporate trigger was exceeded, the kicker was credited to corporate taxpayers six times, suspended twice and allocated twice to the State School Fund under Measure 85.

#### STATE REVENUE AND EXPENDITURES

Recent state budget history is shown in Table 9. The table shows state General Fund revenue and expenditures and state All Funds revenue and expenditures for the 2005-2021 period. The 2017-19 expenditure numbers are based on the Legislatively Approved Budget. The figures for 2019-21 are from the Governor's Budget. The table also shows values for total personal income of Oregon residents, total Oregon population and the consumer price index for comparison purposes.

#### **EFFECT OF TAX CHANGES**

The table below contains rough approximations of the static revenue impacts of selected tax changes. All figures are in millions of dollars. The estimates assume that the proposed change is fully phased in. Due to time lags in the tax system, a proposed change might not have the effect shown here in the first fiscal year.

TAX REDUCTIONS		Revenu (in mi		
TAX REDUCTIONS	FY 2019-20	FY 2020-21	FY 2021-22	FY 2022-23

#### OREGON INCOME TAXES

Oregon's primary source of revenue is from income taxes – both personal and corporate. Together they account for roughly 93 percent of the General Fund. The personal income tax is imposed on all the income of residents (full-year filers) and the income earned in Oregon by non-residents (non-resident filers.) The tax is also imposed on part-year residents for the portion of the year in which they lived in Oregon. Corporations doing business in Oregon are subject to the excise tax while those that only have income from Oregon sources are subject to the income tax. Nearly all corporations are excise tax filers.

#### Personal Income Tax

Oregon tax rates range from 5% to 9.9% of taxable income. Taxable income is adjusted gross income (AGI) plus Oregon additions less Oregon subtractions and deductions (standard or itemized). Because taxable income is generally less than AGI, the average effective tax rate is roughly 6.0% of AGI. All brackets, except the top income tax bracket, are indexed to inflation. The rate schedule for tax year 2019 is shown below:

#### 2019 TAX YEAR RATE SCHEDULE

SIN	GLE RETURNS	JOINT RETURNS				
Taxable Income	Tax Before Credits	Taxable Income	Tax Before Credits			
Not over \$3,550	5% of taxable income	Not over \$7,100	5% of taxable income			
\$3,550 to \$8,900	\$178 + 7% of income over \$3,550	\$7,100 to \$17,800	\$355 + 7% of income over \$7,100			
\$8,900 to \$125,000	\$552 + 9% of income over \$8,900	\$17,800 to \$250,000	\$1,104 + 9% of income over \$17,800			
Over \$125,000	\$11,001 + 9.9% of income over \$125,000	Over \$250,000	\$22,002 + 9.9% of income over \$250,000			

With the 2013 Special Session, the Legislature made significant changes to the personal income tax

system. These changes are included on Page C5, including the creation of an alternate tax rate structure for individuals with non-passive income from partnerships or S-corporations in which they actively participate. This policy is optional and first took effect in 2015. Changes made in the 2018 Special Session allow certain sole proprietorships to use the alternative rate structure as well. The rate and bracket structure are shown in the table to the right.

Non-Passive Income	Tax Rates
Net Income (\$)	Tax Rate
< \$250,000	7.0%
\$250,000 to \$500,000	7.2%
\$500,000 to \$1 Million	7.6%
\$1 Million to \$2.5 Million	8.0%
\$2.5 Million to \$5 Million	9.0%
\$5 Million or more	9.9%

In 2016, all personal income tax returns reported a total

adjusted gross income of \$125.7 billion. The average adjusted gross income for all returns was \$61,588, an increase of 3.1% from 2015. Oregon taxpayers had a total tax liability of \$7.6 billion, an increase of 6.0% from 2015. The average Oregon tax liability for full-year filers was \$3,961, up 3.3% from 2015.

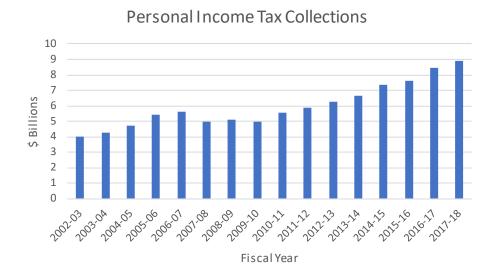

The Oregon standard deductions for tax year 2019 are \$4,545 on joint returns, \$2,270 on single and married-filing-separate returns and \$3,655 for head-of-household returns. Blind or elderly (65+) taxpayers get an extra \$1,200 standard deduction on a single return and an extra \$1,000 per eligible person on a joint return. In 2016, the average deduction amount per full-year tax return was \$9,269, an increase of 2.0% from 2015. A personal exemption credit is allowed for most taxpayers and dependents. This credit is indexed for inflation and is \$206 in 2019. The average total credit amount taken per full year tax return in 2016 was \$440, a decrease of 1.5 percent from 2015.

Oregon also taxes some business income through the personal income tax system. Owners and shareholders of small businesses, like sole proprietors and S-corporations, pay personal income taxes on the profits from these businesses. In 2016, the total number of full year returns reporting

LRO 01/18/19 C1 Research Report #1-19

either income or a loss from a sole proprietorship was 263,486, an increase of 3.9% from the prior year, and the total number of S-corporations was 66,227. The total amount of income that non-farm sole proprietors reported on 2016 full-year returns was \$4.1 billion. Recent trends in Oregon's small businesses can be seen on pages C27 and C28. Between 2000 and 2007, the number of sole proprietor returns increased by 20.5%, or 42,786. Year over year declines then followed in years 2008 and 2009, followed by a five-year period of relative consistency in the number of returns. Years 2014 - 2016 have since seen year over year increases. The number of S-corporations increased by 35% (15,628) between 2000 and 2008, but declined from 2009 to 2011. From 2011 to 2016, the number of S-corporations increased by about 7,200, an annualized average increase of 2.3 percent.

Personal income tax collections are the largest source of state tax revenue and are projected to comprise 87% of the total General Fund revenues in the 2017-19 biennium. (They were 87% of the total General Fund revenues in the 2015-17 biennium). The following chart shows the personal income tax collections since fiscal year 2002-03.

#### History

In 1917, the Oregon Constitution was amended to allow a progressive income tax. In 1923 an income tax was adopted by the legislature and approved by a statewide vote. The tax was collected for only one year. A successful initiative petition repealed it in 1924.

Subsequent to, 1924 three initiative petitions and a legislative referral failed at the polls. The 1929 legislature adopted an income tax dedicated to reducing the state property tax. The tax was brought to a vote by referendum. It was approved by the voters in 1930. By 1938 the state property tax was completely offset by income tax collections, and except for 1940, no state property tax has been collected since.

Here are some major changes in the tax since 1929:

First rate and exemption change, designed to offset depression revenue losses, increased bottom rate from 1% to 2% and top rate from 5% to 7%.

1939 Rates changed again, top rate still 7% but hit at \$4,000 rather than \$5,000.

1943 "Walker Plan" adopted, designed to cope with additional revenue from increased wartime economic activity, reduced tax liability 5% for each extra \$1 million in taxes collected. It was modified in 1945, suspended in 1947 and repealed in 1949. Withholding on wages begins; new rates; 8% bracket added for income over \$8,000. 1947 1953 Income tax placed into general fund rather than property tax relief account. Personal exemption set equal to federal exemption. 1955 45% surcharge imposed, in effect for 1955 and 1956. 1957 Rate structure changed, ranges from 3% at bottom to 9.5% for income over \$8,000. 1959 Special capital gains treatment begins. 1969 Federal income tax base adopted. Rate schedule adjusted, 4% to 10% for income over \$5,000. 1971 Planned federal increases in the personal exemption and standard deduction threaten Oregon revenue. Oregon freezes to IRC as of December 31, 1971. 1975 Oregon reconnects to federal code but maintains separate standard deduction and personal exemption. 1979 9% income tax refund for 1978 taxes. 2% surplus kicker created. Personal exemption increased and indexed for inflation. 1981 Federal changes threaten state revenue. Oregon freezes to federal code as of December 31, 1980. Personal exemption indexing delayed. 1982 Rates increased, 4.2% to 10.8%. 1983 Federal conformity updated to December 31, 1982, except for ACRS. \$85 personal tax credit replaces personal exemption. 1985 Rates revert to 4% to 10% structure. Oregon law fixed to federal code as of December 31, 1984. 1987 Federal conformity updated to December 31, 1986, connects Oregon to the 1986 federal tax reforms (including full taxation of capital gains). Tax rates reduced (5% to 9% over \$5,000), standard deduction increased. 1989 Federal conformity updated to December 31, 1988. Double weighted sales in apportionment formula. Federal conformity updated to December 31, 1990. Tax brackets indexed beginning in 1991 1993. Taxed all pension income, with new retirement credit. Allows nonresident credit for tax paid to other states. 1993 Federal conformity updated to December 31, 1992. 1995 Federal conformity updated to April 15, 1995. Federal conformity updated to December 31, 1996 and permanently reconnected to 1997 future changes. Earned income credit adopted. Lottery jackpots subject to tax. 1998 Federal pension income is excluded from taxable income. Credit for long-term care

Federal tax subtraction increased from 3,000 to 5,000 effective 1/1/2002. Indexed for

insurance adopted.

inflation beginning 2003.

2000

- Standard deductions changed to \$1,640 for single filers and \$3,280 for joint filers effective 1/1/2002. Indexed for inflation beginning 2003. Working Family Childcare credit made refundable effective 1/1/2003.
- 2002 Phase-in the implementation of the higher federal tax subtraction. In 2002 the federal tax subtraction is \$3,250 and in 2003 it is \$3,500; it then increases \$500 annually until \$5,500 in 2007. Beginning in 2008 it is indexed to inflation.
- Federal conformity updated to December 31, 2002, except for changes in depreciation, 179 expensing, deferred compensation plans, pension, employee stock ownership, deferred compensation, individual retirement plans, medical savings accounts, qualified tuition savings accounts or other tax-exempt savings programs. Eliminates the "rolling reconnect" for changes in federal tax law for 3 years until December 31, 2005. Reestablishes the "rolling reconnect" for changes in federal law pertaining to taxable income for federal tax law changes after December 31, 2005.
- Oregon's earned income credit is increased to 6% of the federal credit beginning January 1, 2008. It is also made refundable for tax years 2006 through 2010. The residential energy tax credit is also expanded. New credits are created for volunteer emergency medical technicians and taxpayers who contribute to an individual development account.
- New compliance measures were passed pertaining to the use of listed and reportable transactions. A variety of tax credits were either created or modified, including a credit for donations to university venture development funds or the Oregon Production Investment Fund; producer and consumer biofuels credits; the business and residential energy credits; mobile home closure credit; and diesel truck engine credits. The refundability of the earned income credit was extended through tax year 2013 and the credit for donations to the Child Care Division was extended through 2012. Tax provisions pertaining to the military, veterans, and college savings accounts were enacted. The personal exemption credit was reduced for higher income filers. Withholding was established for certain nonresidents who sell Oregon real property.
- Clarifying language was added to the ORS for the business energy tax credit, the withholding requirement for nonresidents who sell Oregon real property, and the TRICARE tax credit.
- Sunset dates were placed on nearly all income tax credits; they were organized into three groups according to broad policy objectives. Those without a sunset date are the personal exemption credit, the credit for a claim of right income, and the credit for taxes paid to another state.

Federal conformity was updated to May 1, 2009, except for provisions relating to bonus depreciation, the discharge of indebtedness, and Section 179 expensing. Reestablishes the rolling reconnect on January 1, 2011.

The Assembly passed HB 2649 which increased tax rates for taxable income above \$125,000 for single filers and \$250,000 for joint filers. For single filers in tax years 2009 to 2011, income between \$125,000 and \$250,000 is taxed at 10.8% and income above \$250,000 is taxed at 11%; for joint filers, the brackets are \$250,000 and \$500,000. Also, the federal tax subtraction was phased-out for single filers above \$125,000 of income and for joint filers above \$250,000. After the Governor signed the bill, citizens referred it to the ballot for a special election in January 2010. Voters approved Measure 66, gathering 54% of 'yes' votes.

LRO 01/18/19 C4 Research Report #1-19

2010 Federal conformity was updated to December 31, 2009.

A number of changes were made to the Business Energy Tax Credit, including a limit to the amount of certifications for the renewable and manufacturing portions of the program, a reduction in subsidies for wind projects, an extension to six years for the time period over which renewable projects of more than \$10 million may take the credit, and the addition of battery and electric vehicle manufacturers to the manufacturing credit. The sunset for renewable and conservation projects is extended to July 1, 2012 and is based on final certification. The sunset for manufacturing projects is extended to January 1, 2014 and is based on preliminary certification.

Federal conformity was updated to December 31, 2010.

Several tax credits were extended, including credits for biomass, E-commerce zones, film & video, fish screening, and residential energy. The Business Energy Tax Credit was allowed to sunset and was replaced by separate credits for manufacturing, renewable energy, conservation, and transportation projects. The structure of the manufacturing credit was not changed, but the other three credits are continued at a much smaller magnitude.

A new credit was created for qualified equity investments in low-income areas.

Federal conformity was updated to December 31, 2011.

2013 Regular Session:

Federal conformity was updated to January 3, 2013.

Seven tax credits were extended without modification: earned income, cultural trust, pension income, rural EMT, employer provided scholarships, farmworker housing construction, and manufactured home part closure.

Two tax credits were extended with modifications: political contributions and rural medical providers.

#### Special Session:

Increased the earned income tax credit to eight percent of the federal credit.

Limited personal exemption credits to taxpayers with income below \$100,000 if single and \$200,000 if joint.

Changed the additional senior medical deduction to a subtraction, phased-out the subtraction based on income, and increased the eligibility age.

Established preferential tax rates for non-passive income from a partnership or S-corporation.

Allows a subtraction for dividend payments received from qualified IC-DISCs.

Federal conformity was updated to December 31, 2013.

Crop donation credit reinstated

Federal conformity was updated to December 31, 2014.

Working Family Child Care and Child and Dependent Care tax credits combined into a single Working Family Child and Dependent Care tax credit for tax years 2016 through 2021.

2016 Federal conformity was updated to December 31, 2015.

Increased the Earned Income Tax Credit (EITC) from 8% to 11% of the federal credit for taxpayers with a dependent under the age of three.

Increased the annual program cap on the Film and Video tax credit from \$10 million to \$12 million in 2016 and to \$14 million in 2017.

Extended the Biomass Manure tax credit through January 1, 2022 but reduced the tax credit rate from \$5 per wet ton to \$3.50 per wet ton.

Federal conformity was updated to December 31, 2016.

Extended or modified five tax credits (reservation enterprise zone, affordable housing lender's credit, rural medical providers, fish screening devices and working family dependent care credit).

Created two new tax credits: bovine manure and employer training for eligible counties.

Extended the Greenlight Oregon Labor Rebate program six years, including the related subtraction. Allows certain deductions from labor rebate amounts.

Modifications made to Oregon Industrial Site Readiness Program.

Federal conformity was updated to December 31, 2017.

Modified four tax credits (affordable housing, film production development contributions, bovine manure production or collection & working family household and dependent care).

Created new credit (Opportunity Grant contributions) and new subtraction from taxable income (home buyer savings account).

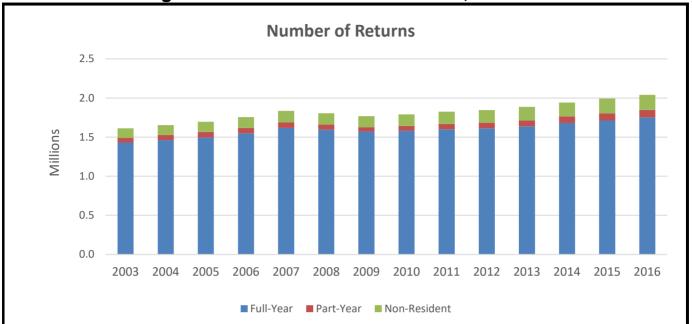

Requires addition to taxable income for amount allowable as a deduction under section 199A(a) of the Internal Revenue Code (i.e. 20% deduction for certain pass-throughs and proprietorships enacted as part of federal Tax Cuts and Jobs Act in December of 2017).

Special Session:

Extended to sole proprietorship income, existing-law preferential tax rates for non-passive income from a partnership or S-corporation.

Schedule E includes income from: rental real estate, royalties, partnerships, S corporations, and trusts.

<sup>&</sup>lt;sup>2</sup>All other includes income from: taxable state income tax refunds, alimony received, unemployment compensation, and other income.

#### Corporate Income and Excise Taxes

Since tax year 2009, Oregon has had a two-bracket corporate rate structure with a 12-tiered minimum tax, as shown in the tables below. For 2018, income up to \$1 million is taxed at 6.6% and income over \$1 million is taxed at 7.6%. In 2013, the Oregon Tax Court ruled that tax credits may be applied to the minimum tax. Thus, conceptually for tax years 2009 through 2014, the minimum tax is better described as a "Minimum Gross Tax". In 2015, the Legislature modified the law so that credits could not be used against the minimum tax for tax years 2015 through 2020; legislation in 2017 made

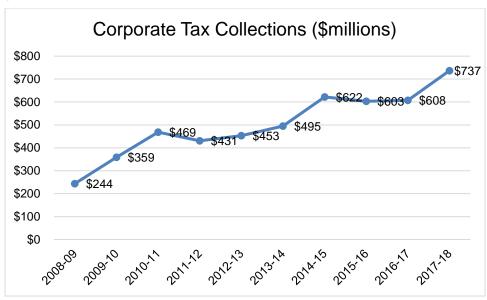

this change permanent.

2018 Tax Year Rate Schedule					
C-Corporations					
Taxable Income	Tax Before Credits				
Not over \$1M	6.6% of taxable income				
Over \$1M	\$66,000 + 7.6% of income over \$1M				

The corporate excise tax is the second largest tax source for the state General Fund. The corporate tax revenue is projected to provide 6.3% of General Fund revenue in the 2017-19 biennium. (It was 6.1% of the total General Fund revenues in the 2015-17 biennium.) Oregon uses federal taxable income, with

C-Corporation Minimum Tax					
Oregon Sales (\$)	Minimum Tax (\$)				
< \$500,000	\$150				
\$500,000 to \$1 Million	\$500				
\$1 Million to \$2 Million	\$1,000				
\$2 Million to \$3 Million	\$1,500				
\$3 Million to \$5 Million	\$2,000				
\$5 Million to \$7 Million	\$4,000				
\$7 Million to \$10 Million	\$7,500				
\$10 Million to \$25 Million	\$15,000				
\$25 Million to \$50 Million	\$30,000				
\$50 Million to \$75 Million	\$50,000				
\$75 Million to \$100 Million	\$75,000				
\$100 Million or more	\$100,000				

some modifications, as its tax base. The following chart shows Oregon's corporate tax collections since fiscal year 2008-09.

<sup>&</sup>lt;sup>1</sup> For more information on how Oregon corporate taxation works, please see the Department of Revenue's Corporate Excise and Income Tax Report.

Corporations pay taxes only on income attributable to Oregon. For multi-state C-corporations, a three-factor formula using property, payroll and sales was historically used to apportion income to Oregon. Over the past 30 years the formula weights have changed from an equally weighted formula (used prior to 1991) to a one-hundred percent weighted sales formula (for tax years beginning on or after July 1, 2005) that is used by most corporations.<sup>2</sup> The following table contains the corporate apportionment formula weights for each factor and their effective dates.

Apportionment Formula Weights							
Tax Year Range	Sales Weight	Payroll Weight	<b>Property Weight</b>				
12/31/1990 and earlier	33%	33%	33%				
1/1/1991 to 4/30/2003	50%	25%	25%				
5/1/2003 to 6/30/2005	80%	10%	10%				
7/1/2005 to current	100%	0%	0%				

C-corporations can be divided into two groups: corporations that do business only in Oregon and those that do business in multiple states and/or abroad. In 2016, the total number of Oregon only corporate returns was 14,283 (47.4% of all 30,110 C-corporations) and the total number of multistate corporations was 15,874 (52.6% of all 30,110 C-corporations). The total tax of multi-state corporations was \$491 million (91% of total C-corporation tax) and the total tax of Oregon-only corporations was \$49 million (9% of total C-corporation tax). Page C23 illustrates the trends in the Oregon only and multi-state corporations between 2006 and 2016. During this period, the number of Oregon-only corporations declined from 63.2% of all C-corporations in 2006 to 47.4% of all C-Corporations in 2016. During the same period, the number of multi-state corporations increased from 36.8% in 2006 to 52.6% in 2016.

S-corporations do not generally pay tax at the entity level, but are required to file a corporate tax return. Roughly 66,227 S-corporations currently file tax returns, with the vast majority (98%) paying the minimum tax. The remaining 2% of S-corporations have a tax liability greater than the minimum due to built-in capital gains or net excess passive income.

#### History

The corporate excise tax was enacted in 1929 with the Personal Income Tax. Initially the Corporate Excise Tax was intended to not only raise revenues to alleviate the State Property Tax but also to provide a means of imposing a state tax on national banks, which had been declared exempt from state property taxes in 1925.<sup>3</sup> Here are some major changes, excluding changes to tax deductions and credits, in the income and excise corporate tax law since its enactment:

1929

The legislature passed a law titled the Corporate Excise of 1929 which enacted a corporate excise tax on corporations doing business in the state of Oregon. The tax rate was set at 5%, with few corporations being exempt. The corporate minimum tax was set at \$25. The excise tax was measured by net income to circumvent the federal prohibition against taxation of income from federal securities. Because the tax was designed to furnish property tax relief and be a state tax imposed upon national banks, corporations were allowed to offset 90% of their tax liability by the amount of personal property tax

<sup>3</sup> Handbook Of Oregon State Taxes, Oregon Tax Foundation, May 1983

<sup>&</sup>lt;sup>2</sup> The two exceptions are utilities & telecommunications corporations, which may elect to use the double-weighted sales formula, and interstate broadcasters who for tax years 2014-2016, apportioned their income based on their Oregon domiciled customers. For more information on the exceptions, please see the *State of Oregon 2017-2019 Tax Expenditure Report*, available at <a href="http://www.oregon.gov/DOR/Stats">http://www.oregon.gov/DOR/Stats</a>.

paid. The corporate apportionment formula was to be decided by tax commission regulations. Generally, the tax commission adopted a three factor formula based on the amount of property, payroll and sales in Oregon, equally weighted.

- Tax rate increased to 8%. Corporate minimum tax was reduced to \$10.
- 1933 Personal property offset reduced from 90% to 75% of State Excise Tax liability.
- A law change added segregated accounting or apportionment as reporting methods as defined by rules and regulations adopted by the Oregon State Tax Commission. Personal property offset was reduced from 75% to 50% of State Excise Tax liability.
- "Walker Plan" enacted which permitted a reduction in the Personal Income and Corporate Excise Taxes when a state budget surplus occurred. Tax Liabilities discounted 75% in 1943 and 30% in 1944 as provided by the "Walker Plan" law.
- 1951 Revenues from the Corporate Excise Tax were directed into the General Fund rather than as an offset to the statewide property tax levy.
- A 8% corporate income tax was enacted to cover two classes of corporations not covered by the excise tax: those doing business only in interstate commerce and those with no property or offices in the state but which solicit orders from users of their products within the state. Public utilities were subject to taxation at a 4% rate. The corporate tax of 8% was assessed on the earnings of corporations deriving 95% or more of their income from rental of real property or whose assets consist of at least 95% or more of real property.
- Business corporate tax rate decreased to 6%. Financial corporation rate increased to 9%. Public utilities rate increased to 7%. Personal property tax offset was eliminated for all corporations except those corporations engaged primarily in manufacturing, processing or assembling materials into finished products and their offset was reduced from 50% to 33%.
- Federal Public Law 86-272 was enacted to allow some corporations to be exempt from state taxes when the corporation's only business activity is the solicitation of orders for the sale of tangible personal property. Public utilities and other centrally assessed corporations were brought under the regular corporate excise tax law. Certain exempt corporations (labor, and agriculture; religious, charitable, etc.; business and civic leagues) made taxable on "unrelated business income."
- Financial institution tax rate decreased to 8%. Exempted People's Public Utility Districts from the Corporate Excise Tax.
- U.S. court cases influenced the legality of using worldwide apportionment in states from the early 1960s. Oregon had an equally weighted three-factor corporate apportionment formula for multi-state corporations and the Uniform Division of Income For Tax Purposes Act was adopted into the Oregon statutes in 1965.
- The legislature adopted the Multi-state Tax Compact to have consistent tax provisions among states.
- Depreciation options were frozen at 1970 levels to compensate for revenue losses resulting from the use of Federal asset depreciation range schedules. Federal government passed the Domestic International Sales Corporation (DISC) law which provided a tax deferral for the export earnings of multi-national corporation.

LRO 01/18/19 C15 Research Report #1-19

1973	Semi-annual estimated tax payments required for corporations beginning Jan. 1, 1974. Imposed corp. excise tax on real estate investment trusts (REIT).
1975	Supreme Court ruling on Coca-Cola case upheld combined reporting for tax years 1962-1964. The ruling stated that the Oregon State Tax Commission had authority to permit or require corporations to use either segregated accounting or apportionment, even though there was no specific reference to a combined reporting in the law. The legislature adopted a combined reporting law which clearly stated the current practice by the Dept. of Revenue. Credit unions are taxed on their unrelated business income.
1976	All corporations taxed at the same rate, 6.5% for 1976.
1977	All corporations taxed at the same rate, 7% for 1977 and 7.5% for subsequent years.
1977	Use of Federal depreciation options allowed.
1980	Personal property tax offset expired.
1981	Depreciation schedules frozen at 1980 levels for two years, to compensate State budget for revenue losses resulting from changes in Federal law.
1982	Quarterly estimated tax payments required beginning Jan. 1, 1982.
1983	Corporate tax law in Oregon tied to federal tax law enacted as of Dec. 31, 1982. Enactment of the corporate dividend exclusion.
1984	The legislature adopted a "Waters Edge" unitary reporting requirement instead of a worldwide reporting requirement. Only business in the U.S. would be reported on a consolidated federal corporate tax return of both U.S. and foreign corporations. Corporations filing a consolidated federal return are required to file an Oregon consolidated return. Provides 85% corporate dividend exclusion.
1985	Oregon corporate and personal tax law tied to federal tax law as in effect Dec. 31, 1984, including Tax Reform Act of 1984 (TRA). The legislature chose not to connect to the federal law changes in the Foreign Sales Corporation (FSC) law change which repealed the Domestic International Sales Corporation (DISC) laws. Oregon added back the income earned by Foreign Sales Corporations to the multi-national corporations' taxable income. Provides 100% corporate dividend exclusion.
1987	Oregon tied to the Internal Revenue Code as amended on or before Dec. 31, 1986. Reduced the corporate tax rate from 7.5% to 6.6% beginning Jan. 1, 1987.
1989	Corporate excise tax law tied to the Internal Revenue Code as amended on or before Dec.31,1988. Add S-corporations to the corporations required to pay the corporate

1991 Corporate tax law tied to the Internal Revenue Code as of Dec. 31, 1990.

1993 Corporate tax law tied to the Internal Revenue Code as of Dec. 31, 1992.

1995 Corporate tax law tied to the Internal Revenue Code as of April 15, 1995.

Oregon establishes "rolling reconnect" for federal changes made after April 15, 1997.

allowed on dividends received from 20% or more owned corporations.

minimum tax. Oregon shifts to a doubled weighted sales corporate apportionment formula beginning tax years on or after Jan.1,1991. Dividend deduction is allowed for 70% on dividends received from a corporation owned less than 20%. 80% exclusion is

The federal government passed the Exterritorial Income Act (ETI) which replaced the foreign sales corporate laws which were found to be an unfair trade practice by the World Trade Organization. Due to Oregon's automatic connection to the federal

LRO 01/18/19 C16 Research Report #1-19

definition of taxable income, Oregon excluded exterritorial income from the taxable income of multi-national corporations. Prior to 2000, Oregon included the income of foreign sales corporations in the definition of taxable income.

Oregon moved to a "super sales" corporate apportionment formula where the sales factor was weighted (.8) and payroll and property factors are each weighted (.1). This applied for corporate tax years beginning May1, 2003.

Oregon will increase the sales factor of the corporate apportionment formula to (.9) and payroll and property factors are each (.05). This will apply to corporate tax years beginning July 1, 2006. Oregon will adopt a single sales corporate apportionment formula (100% sales) beginning corporate tax years after July 1, 2008. Established a date specific connection to federal tax law, as in effect on Dec. 31, 2002, for federal law changes occurring in 2003-2005 except for federal law changes pertaining to the following: depreciation, 179 expensing, pension, employee stock ownership, deferred compensation, individual retirement plans, medical savings accounts, education IRAs, qualified tuition savings accounts or other tax-exempt savings programs. Re-establishes the "rolling reconnect" for changes in federal law pertaining to taxable income for federal law changes after December 31, 2005.

The corporate single-sales apportionment formula became effective for tax years beginning on or after July 1, 2005. The maximum research and development tax credit increased to \$2 million, beginning January 1, 2006.

New compliance measures were passed pertaining to the use of listed and reportable transactions. The apportionment formula for insurance companies was changed to a single sales factor. A variety of tax credits were either created or modified, including a credit for donations to university venture development funds or the Oregon Production Investment Fund; biofuels producer credit; the business energy credit; diesel truck engine credits; and affordable housing loans credit. A one-time small corporation tax credit was created for tax year 2007. Withholding was established for certain C-corporations that sell Oregon real property.

Clarifying language was added to the ORS for the business energy tax credit, and the withholding requirement for certain C-corporations that sell Oregon real property. The cap on the affordable housing credit was increased to \$17 million.

Sunset dates were placed on nearly all income tax credits; they were organized into three groups according to broad policy objectives.

Federal conformity was updated to May 1, 2009, except for provisions relating to bonus depreciation, the discharge of indebtedness, and Section 179 expensing. Reestablishes the rolling reconnect on January 1, 2011.

The Assembly passed HB 3505 which added a second tax bracket for taxable income above \$250,000. For tax years 2009 and 2010, the top rate is 7.9%; for tax years 2011 and 2012, the top tax rate is 7.6%. Beginning with tax year 2013, the top rate of 7.6% applies only to income exceeding \$10 million. The C-corporation minimum tax was changed from a flat \$10 to an amount ranging between \$150 and \$100,000, depending on the level of Oregon sales. After the Governor signed the bill citizens referred it to the ballot for a special election in January 2010. Voters approved Measure 67, gathering 53% of 'yes' votes.

LRO 01/18/19 C17 Research Report #1-19

2010 Federal conformity was updated to December 31, 2009.

Several changes were made to the Business Energy Tax Credit, including a limit to the amount of certifications for the renewable and manufacturing portions of the program, a reduction in the subsidies for wind projects, an extension to six years for the time period over which renewable projects of more than \$10 million may take the credit, and the addition of battery and electric vehicle manufacturers to the manufacturing credit. The sunset for renewable and conservation projects is extended to July 1, 2012 and is based on final certification. The sunset for manufacturing projects is extended to January 1, 2014 and is based on preliminary certification.

Federal conformity was updated to December 31, 2010.

Several tax credits were extended, including credits for biomass, fire insurance, E-commerce zones, long-term rural enterprise zone, research activities, film & video, fish screening, and affordable housing. The Business Energy Tax Credit was allowed to sunset and was replaced by separate credits for manufacturing, renewable energy, conservation, and transportation projects. The structure of the manufacturing credit was not changed, but the other three credits are continued with a much smaller magnitude.

A new credit was created for qualified equity investments in low-income areas.

The definition of Oregon Sales was changed to reduce the impact of the corporate minimum tax on agricultural co-operatives.

Federal conformity was updated to December 31, 2011.

The Legislature granted the Governor authority for one year (2013) to enter into contracts with businesses that meet certain investment requirements. In return for making such investments, the Governor is authorized to enter into a contact that guarantees use of the single sales factor apportionment for a period of between five and 30 years.

#### 2013 Regular Session:

Federal conformity was updated to January 3, 2013.

Clarified existing law by withdrawing from the provisions of the Multi-State Tax Compact pertaining to apportionment.

Corporations that include a member that is incorporated in certain countries considered to be a tax haven are required to include the net income from those countries on their Oregon tax return.

#### Special Session:

Modifies the tax brackets by applying the top tax rate of 7.6% to taxable income above \$1 million.

Recognize IC-DISCS in tax law and allow a subtraction for dividend payments made and establish a 2.5% tax on such IC-DISCs.

Federal conformity was updated to December 31, 2013.

The basis for the corporate apportionment of business income for interstate broadcasters was changed from viewing audience to gross receipts from Oregon domiciled customers. Applies to tax years 2014 through 2016.

- 2015 Federal conformity was updated to December 31, 2014.
- 2016 Federal conformity was updated to December 31, 2015.
- Federal conformity was updated to December 31, 2016.

The Cost-of-Performance apportionment method was replaced with a market-based approach. Other apportionment changes include allowing the Department of Revenue to consider the role of foreign affiliates when making a unitary determination, and removing the functional test for determining apportionable income.

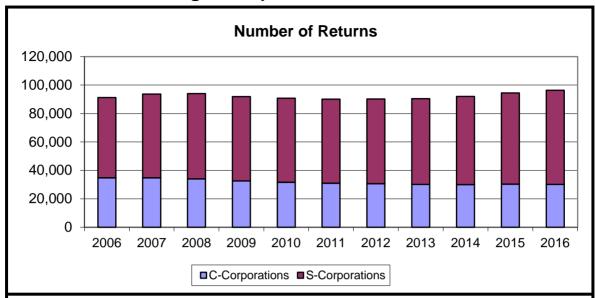

Federal conformity was updated to December 31, 2017.

Requires addback of federal dividends related to repatriation that are excluded from federal taxable income under the Tax Cuts and Jobs Act. Also creates a tax credit for amounts received under the tax haven law.

Method of income apportionment for broadcasters based on customer domicile was extended though tax year 2018.

Opportunity Grant contributions were changed to be eligible for credit against corporate income and excise taxes.

### PROPERTY TAX

The property tax in Oregon is a local tax. It funds most local services and many functions of county and city governments. Large portions of school districts' and community college budgets also depend on property tax receipts. Taxable property includes real property, mobile homes, some tangible personal property used by business and in the cases of centrally assessed property, intangible property. Prior to the passage of the property tax limitations of Measure 50, property tax was generally based on a property's real market value. Since 1997-98, each property has a real market as well as an assessed value. Property value assessment and taxation is conducted at the county level, except for large industrial properties and "centrally" assessed properties, where Oregon Department of Revenue plays a major role.

Property tax rates differ across the state. The rate on any particular property depends on the tax rates approved by local voters and the limits established in the Oregon Constitution. Most properties are taxed by multiple districts, such as city, county, school, community college, port and fire districts. The total tax rate on a particular property is calculated by adding all the local taxing districts' rates in the area. The tax on each property is computed by multiplying the total tax rate by the assessed value of the property and then (if needed) reducing the calculated tax in response to constitutional limits. Annually, the county assessor verifies the tax rates and levies submitted by each local taxing district. Collection of taxes and distribution of the funds to local districts are done by the county tax collector.

In 2017-18, the total Real Market Value (RMV) of taxable property in Oregon was \$620 billion, an increase of 11% from 2016-17. The total Net Assessed Value of \$390 billion reflects a 4.4% increase over 2016-17. Excluding \$267¹ million in taxes imposed for Urban Renewal, taxing districts imposed \$6.492 billion in 2017-18. This reflects an overall 6.7% increase from the prior year.

### **Exemptions**

Not all properties are taxable. Major exemptions include: tangible personal property of individuals (household furnishings, sporting equipment), licensed property (cars, trucks), business inventories, government property (unless leased to a taxable business or individual), and property used for charitable or religious purposes. Electric cooperatives, rural telephone exchanges and some other property are exempt from property taxation because other taxes are paid *in lieu of* property tax.

Some properties are taxed at lower values. These "specially assessed" properties include some forest land, farm land, and open space land. These properties are taxed at their values in the restricted use and are subject to penalties if not continued in the use for which they are specially assessed.

### Limitations

### Measure 5

Measure 5 is a tax limitation constitutional amendment approved by Oregon voters in 1990. It restricted taxes on any parcel of property per \$1,000 of real market value: the education category is limited to \$5 and general government to \$10. Tax "compression" occurs if the tax extended on a property exceeds either of the Measure 5 limits. That is, if taxes for an individual property exceed the limits, then the taxes for that property are reduced to the limits. Local option levies are the first levy type to be reduced. General obligation bonds are not restricted by Measure 5 limits.

<sup>&</sup>lt;sup>1</sup> DOR property tax statistics Table 3.1

### Measure 50

In May 1997 voters passed a second constitutional amendment to limit property tax. Measure 50 did not replace Measure 5, but rather established a second level of restrictions. Measure 50 gave each district a permanent tax rate which cannot be increased without a constitutional amendment. However, voters can approve local option levies for up to five years for operations, and up to the lesser of ten years or the useful life of capital projects. Local option levies, as well as general obligation bonds, must be approved by a majority vote at a general election. Prior to November 2007, a double majority (i.e., a majority of at least 50% of eligible voters) was needed to approve either a local option tax or a general obligation bond proposal.

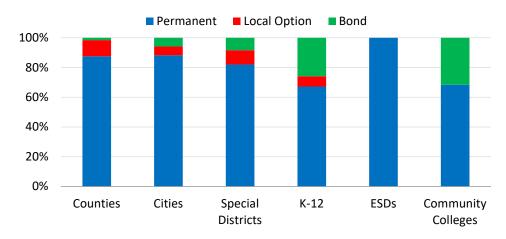

Measure 50 also defined the concept of Assessed Value (AV). The 1997-98 Maximum Assessed Value (MAV) for each property was set at 90% of its 1995-96 real market value (RMV). If no new construction occurs on the property, then the growth in maximum assessed value is capped at 3% a year. However, assessed value cannot exceed real market value. The ratio of MAV to RMV is known as the Changed Property Ratio (CPR). Prior to the great recession, changes reflected high appreciation in real market values of property that occurred in many areas of Oregon relative to the 3% constitutionally capped growth rate in MAV. Across all taxing districts, the ratio of AV:RMV was at its lowest in 2008-09 at 55.6%. In part due the recession's impact on residential and business property values, the statewide ratio reached an interim high of 78.4% in 2013. As the real estate market has recovered, the ratio has fallen to its current level of 63% in 2017-18.

The table on the following page breaks down 2017-18 property taxes by type of taxing district and tax source. Generally the largest portion of property tax revenues come from a district's permanent rate. Taxes from this source totaled \$4.9 billion in 2017-18, accounting for 76% of all property taxes imposed. The 2017-18 tax revenue attributable to the permanent rate registered an annual growth rate of 4.8%. districts, while K-12 districts and Education Service districts revenues from all sources over the prior year increased by 9.2% and 4.4%, respectively. A 4.6% increase in Community College permanent rate collections was offset by a decrease in bond collections, resulting in an increase of .8% for Community College revenue accounting for all sources. County taxing districts, City districts and Special Districts total revenues grew over the prior year by 5.2%, 5.3% and 6%, respectively.

General obligation bond revenue in 2017-18 totaled \$955 million or 14.7% of all taxes listed in the table. Across all taxing districts bond revenues increased 16% in 2017-18, with 41.5% of the total accounted for by K-12 taxing districts. Historically these funds have been an important source of revenue for the K-12 taxing districts. Since 1999-00, the average growth in K-12 bond revenue has been 5.2%. In 2017-18, K-12 bond revenue increased 23% from the previous year. Since the timing of bond maturities affects the level of bond revenues in any one year, one or more years of data is needed to determine a significant trend.

Bond revenues for community colleges decreased by 6.5% over the prior year. Bond revenues for cities increased 2.2% from a year ago. In 2017-18, county taxing district's bonds increased 1.5%<sup>2</sup> and special district's bond revenues increased 7% from the previous year.

<sup>&</sup>lt;sup>1</sup> Includes Taxes Levied for City of Portland's Fire and Police Disability and Retirement Fund

Across all taxing districts in 2017-18, local option tax revenues increased 8.4% over the prior year, totaling \$476 million. Cities and county taxing districts accounted for 42.4% of local option tax revenue in 2016-17. The share of local option revenues generated for K-12 education was 39.1% in 2016-17. Special taxing districts accounted for 18.5% of local option taxes in 2016-17.

Passed in 1990, Measure 5 introduced limits on taxes paid by individual properties. When a property's taxes are reduced due to the limits, the reduction is referred to as "compression".<sup>3</sup>

D3

LRO 1/18/2019

<sup>&</sup>lt;sup>3</sup> Compression occurs when a property's tax rate must be lowered so that the tax imposed on the assessed value of a single property does not exceed \$10/\$1,000 of the property's real market value for non-school taxing districts and \$5/\$1,000 for school taxing districts. The maximum assessed value of a property is allowed to increase 3% each year, but it may not exceed a property's real market value. Therefore, in cases where the real market value of a property grows by less than 3% annually or its real market value has declined, that

Districts are not in compression per se, rather specific properties located within taxing districts may be in compression. Permanent and local option levies are subject to the Measure 5 rate limits, bond levies are not.

There are two primary components that cause compression. Foremost are tax rates. If applied tax rates are below the \$5 and \$10 limit thresholds then no compression will exist. Rate limitations are calculated against a property's real market value (RMV), however, tax rates are applied to a property's assessed value (AV). Because of this, a property's ratio of RMV:AV can impact whether the property is "in compression". As illustrated when comparing 2006-07 with 2017-18, a widening RMV:AV ratio will decrease the overall level of compression whereas a contracting ratio will increase compression reduction. In 2006-07, compression reduction as a percent of tax extended was 1.4% with a statewide CPR of 0.611 compared to 2017-18 when compression was 2.3% corresponding to a statewide average CPR of 0.65.

In 2017-18, various taxing districts were affected to some degree by 'compression' which is the difference between 'extended' taxes and a lesser amount that can actually be imposed on an individual property because of Oregon's Constitutional limitations. Appreciation of property values during Oregon's housing market boom in the early 2000s helped lower compression reductions statewide and the subsequent recession increased them again. Compression reduction ranged from \$48.8 - \$53.0 million between 2005-06 and 2008-09 increasing to \$164.0 million in 2015-16, and dropping to \$128 million in 2017-18. Regional disparities persist with respect to the importance of compression, as measured by the dollar value of the compression reduction relative to the amount of tax imposed. In 2017-18, compression reduction statewide totaled 2.3% of taxes extended, 52% (totaling \$67 million) of total compression occurred in Multnomah County. In other counties, the dollar value of compression reduction was lower, but in relative terms, reduction in some counties was similarly significant. For example, in Morrow County, the compression reduction totaled \$1.5 million but it accounted for over 5% of this county's property tax extended.

The fiscal significance of compression reduction also varies across taxing districts. For example, a number of counties had their Measure 50 permanent rates established at a time when the counties were receiving significant funding from federal forest timber payments. These federal forest payments have declined since the permanent rates were established and more recently have been under constant threat of being significantly reduced or eliminated. Compression may be a significant issue for the recipients of federal forest payments because it may restrict these districts' ability to offset some portion of the lost federal revenue by raising their revenues from a voter approved local option property tax.

-

property's tax rate may have to be reduced (i.e., compressed) in order to satisfy the \$5/\$1,000 or \$10/\$1,000 requirements.

<sup>&</sup>lt;sup>4</sup> Tax extended relating to bond levies is not included as bonds are not subject to measure 5 compression limits.

1970-2017 Notes:	Market value is		nronertyva		l hythe Den	artment of	Pavanua (OR	2 300 360)

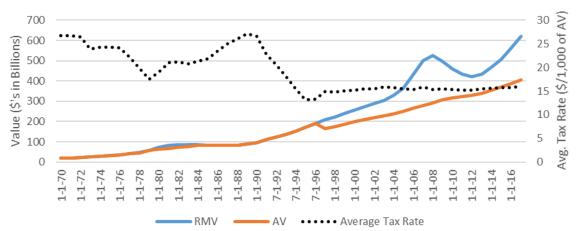

Notes: Market value is the taxable property value certified by the Department of Revenue (ORS 309.360). Assessed value is the total value on the roll at the time the levy is extended. Value may be reduced by appeals. Beginning in 1998, excess urban renewal value, both used and unused value, is included in the assessed value.

1991 value growth is for 18 months with change in assessment date to July.

1998 value growth is for 6 months with change in assessment date back to January.

Notes: Thousands of Dollars. Levies for joint districts are apportioned among counties.

Compression loss equals the M5 compression losses for local taxing districts, excluding urban renewal agencies.

Source: Summary of Assessment and Levies as compiled by Department of Revenue

<sup>&</sup>quot;% of tax" refers to compression loss as a percent of tax extended within Measure 5 limits.

<sup>&</sup>quot;% Change" refers to the year over year percentage change in total loss due to compression.

### PROPERTY TAX RELIEF

General property tax relief began with the Property Tax Relief Act of 1929. This act imposed a personal income tax and dedicated the revenues to offset the State's property tax levy. As a result, the State has not levied a property tax since 1940.

### Homeowners and Renters Refund Program (HARRP)

HARRP was created in 1973 and discontinued by the 1991 Legislature. Refunds were phased down in 1991 and then ended. In 1991 HARRP gave property tax refunds to homeowners and renters with household income of less than \$10,000. Assets (excludes homestead, personal property and retirement plans) could not exceed \$25,000 unless age 65 or older. The program refunded property taxes up to a maximum for each income group.

### Property Tax Relief Program (PTR)

PTR was enacted in 1979 and repealed by the 1985 Legislature. The program, when originally enacted, refunded 30% of qualifying operating levies up to a maximum of \$800 for each homeowner. Renters were refunded 4.7% of contract rent up to \$400 for each renter.

### Elderly Rental Assistance (ERA - pre 2017)

ERA was enacted in 1975. ERA makes payments to renters age 58 and older with annual household income less than \$10,000. Assets (excludes homestead, personal property and retirement plans) must be less than \$25,000 if under age 65. No asset limit exists for participants older than 65. Rent, fuel and utility costs must exceed 20% of participant household income for calculating a payment. The payment is gross rent (including fuel and utilities) up to the \$2,100 limit less 20% of household income, such that the payment reaches the maximum of \$2,100 when income is zero and a minimum payment of \$100 at \$10,000 income. Taxpayers must file Form 90R by July 1 of the year following the year rent was paid to apply for payment the following November. Payments are made by check in November of each year out of a single appropriation to fund this program and make payments to counties in lieu of property taxes for exempt nonprofit corporation housing for elderly persons. If the appropriation is insufficient to cover the payments, payments to both programs are prorated.

In 1992, the total cash outlay from the General Fund reached its highest level with an average refund of \$711 per renter. Between 1992 and 2006, the number of participants declined by 63%; and the average refund declined by 34%. One plausible explanation is that between 2002 and 2005, mortgage interest rates declined; and the availability of financial instruments such as the 'interest only' mortgages may have enabled a number of former renters to purchase homes. Another reason is that the income limits to participate in the program are less than the minimum Social Security benefit amount for couples established in 2005. The declining trend continued through 2016, with 1,754 participants and an average refund of \$331.

\_

<sup>&</sup>lt;sup>1</sup> There are other potential reasons for this decline that worked against eligibility. First, unless a husband and wife or registered domestic partners are living apart permanently on December 31, their income must be combined to determine their household income. Second, in 2005, cost of living allowance raised the minimum social security benefits for a couple to \$10,015.

### Elderly Rental Assistance (ERA - after 2017)

SB 296 (2015) transferred administration and funding of the ERA program from Department of Revenue (DOR) to Oregon Housing and Community Services (OHCS) department effective July 1, 2017. DOR's final program processing and check mailing took place in July and November 2016. After which, OHCS integrated the ERA program into existing rent relief programs. The OHCS describes the program as assisting very low income seniors who are homeless or are unstably housed and at risk of being homeless. With the OHCS administration of the program, individuals are no longer assisted through a tax refund but are financially assisted with various costs related to housing, by OHCS. These various costs may be related to transitional housing, rapid re-housing, homelessness prevention, supportive in-home services, data collection, case management and housing stabilization services.

### Senior Citizens Property Tax Deferral Program

The senior deferral program was enacted in 1963. Homeowners age 62 and older may defer payment of property taxes until the owner dies or sells the property. The State pays the tax and obtains a lien on the property for the tax and accrued interest at the rate of 6% per year. At the time of enactment, the owner's household income was required to be under \$24,500 in the year prior to applying. Once in the program, a taxpayer could defer only in years when federal adjusted gross income was less than \$29,000. In 1977, the Legislature expanded the program to include special assessments. Special assessment deferment was discontinued in 2011 (HB 2543). The 1999 Legislature opened the deferral program to the disabled community and increased the initial income threshold to \$27,500 in the year prior to applying and raised household income once in the program to \$32,000. The 2001 Legislature raised the initial household income to match the "once in the program limit" of \$32,000. These income limits are indexed to the U.S. Urban CPI. The current household income limit is \$43,000 for the 2016-17 tax year.

Participation in the senior deferral program grew rapidly from the late seventies into the mid-eighties, going from 1,976 paid property tax accounts in fiscal year 1978-79 to 12,228 in 1985-86. Participation peaked in fiscal year 1989-90 at 13,165 paid senior deferral accounts. Participation then steadily declined until 2001-02 when the first group of disabled participants began receiving deferral. Participation then held relatively steady until 2008-09 when overall participation began to increase.

Nominal tax paid on behalf of deferral participants followed a relatively similar pattern. A high of \$20.2 million in tax paid was reached in 1989-90 followed by a period of steady decline. In 2001-02 when disabled participants were added to the program, tax paid began to increase modestly until 2009-10 when rapid growth occurred.

Repayment of deferred balances followed a different trend. From 1978-79 to 1993-94, repayments increased rapidly before maintaining a steady annual amount ranging between \$18 and \$22 million per fiscal year. This dynamic required continuous appropriations to the deferral revolving account through the 1994-95 fiscal years. From 1995-96 through 2007-08, as repayments continued to outpace tax payments, the deferral account was able to appropriate out over \$90 million, including payments of just over \$14.5 million to Oregon Project Independence (discussed in more detail later).

Beginning in fiscal year 2007-08, a combination of factors began to occur that would reverse the cash flow of the deferral account. Annual repayments dropped below \$18 million for the first time in over fifteen years while tax payments began to grow at an increasing pace. Fiscal year 2008-09 was the first fiscal year in which tax payments exceeded repayments since the 1991-92 fiscal year. Due

to cash flow issues, Department of Revenue was forced to pay only two thirds of property tax account balances in November of 2010 with the remaining third being paid in May of 2011. In response to the cash flow issues, multiple changes were made to the deferral programs. Changes are described below.

### 2009 - HB 3199

- Removed continuing appropriation from state General Fund to deferral revolving account in times of insufficient funds to make deferral payments
- Established authority of State Treasurer to lend moneys to the Department of Revenue in amounts needed to make deferral payments. Required repayment of funds to Treasury within five years with interest.

### 2011 - HB 2543

- Limited net worth (excluding value of home) for new and existing participants to \$500,000
- Adjusted continuing qualification income criteria to household income rather than adjusted gross income
- Instituted home occupancy requirement of owning and living in home for at least five years prior to applying for program
- Required proof of homeowner's insurance
- Limited qualifying properties to those at a certain percentage of the county median real market value of residential properties. Limit is dependent in part on number of years a participant (or applicant) has owned and lived in the home.
- Changed interest rate from six percent simple to six percent compound for deferred amounts on or after November 2011
- Required participant re-certification every two years
- Properties with reverse mortgages no longer allowed to participate
- Eliminated five year extension for heirs to repay deferred taxes
- New special assessment deferrals no longer accepted
- Eliminated transfer of excess funds to Oregon Project Independence.

### 2012 - HB 4039

- Allowed participants removed from program solely due to reverse mortgage disqualification stemming from HB 2543 (2011) changes to receive deferral in 2011 and 2012
- Changed recertification requirement to "not less than once every three years" allowing for a staggered recertification process
- Refined definition of county median RMV.

### 2013 - HB 2510. HB 2489

- HB 2510 allowed reverse mortgage participants brought back into deferral program by HB 4039 (2012) to remain in program in perpetuity so long as they meet all other qualification criteria
- HB 2489 created ability for participants that participated in program in 2011 and no longer qualify due to reverse mortgage or five year property requirements to reapply for deferral in the program beginning in 2014. Limited re-approval of participants to first 700 to reapply.

### 2014 - HB 4148

• Changed interest rate back to 6% simple rather than 6% compound. Applies interest retroactively for program participants that pay balances on or after July 1, 2016.

### 2015 - HB 2083

- Created exception to five-year ownership requirement for certain homesteads
- Required homesteads to be insured for fire and other casualty while allowing DOR to purchase insurance for uninsured homesteads

- Increased county median RMV qualification limits for taxpayers that have continuously owned and lived in homestead at least 21 years
- Required DOR to increase outreach to senior community if recertification is not received within 35 days following notification to homeowner.

Following the changes to the program in HB 2543 (2011), paid tax accounts in 2011-12 fell to about half the number in the previous year and overall taxes paid were about 62% of the previous year's taxes. Subsequent changes have allowed some of the previously eliminated participants to requalify for the program contributing to the moderate growth in the number and total tax paid. In 2015-16, 6,449 senior and disabled accounts were paid.

### Operation Project Independence

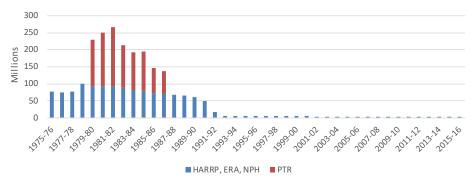

In 2005, the Legislature created Oregon Project Independence (OPI) and funded it from excess balances that accumulate in the Senior Deferral Account. Excess balances accumulate if the property tax plus interest repayments are greater than the amount that the State of Oregon pays counties on behalf of the qualified seniors and disabled who are in the Senior and Disabled Deferral Program. The first payment sent in 2006 from the Deferral Account was in the amount of \$250,000. No payment was made in 2007. The January 2008 payment was in the amount of \$14.29 million. Funding challenges related to the Senior and Disabled Deferral Program in recent years have resulted in a loss of funding to OPI. To stabilize the program's funds, the 2011 Legislature removed the program as a source of OPI funding in HB 2543.

(HARRP program ended in 1991) HARRP NOTES:

Refunds for 1971 and 1972 were under the Homeowners Property Tax Relief Program (HOPTR).

Mobile homes are included in homeowners and renters for 1973 and 1974.

In 1973 the household income limit increased to \$16,000 and the maximum refund schedule increased.

In 1977 the household income limit increased to \$17,500 and the maximum refund schedule increased.

In 1982 the HARRP packet was separated from the income tax packet and mailed late in March of 1983.

In 1985 each qualified renter filed separately - previously only one return was allowed per household.

In 1989 asset test added for those under age 65. Assets must be less than \$25,000 excluding the homestead, tangible personal property and retiremnet plans.

In 1990 the household income limit decreased to \$10,000 and the maximum refund schedule decreased. ERA NOTES:

In 1975 renters eligible if age 65 or older with income less than \$3,000 and rent exceeds 60% of income.

In 1977 age reduced to 58 or older, income increased to \$5,000 and rent (up to \$2,100) exceeds 40% of income.

ons) added if under age 65.

to \$10,000 and percent of income reduced to 20%.

6 of household income (\$10,000 limit).

filed in the Spring. Returns may be filed up to 3 previous years.

NOTES: Senior repayment excludes special assessments until 1983-84. Balance owed includes interest from 98-99 forward.

 $Interest\ rate\ of 6\%\ is\ calculated\ as\ simple\ interest\ prior\ to\ changes\ for\ the\ 2011-12\ Tax\ Year,\ where\ it\ is\ changed\ to\ compound.$ 

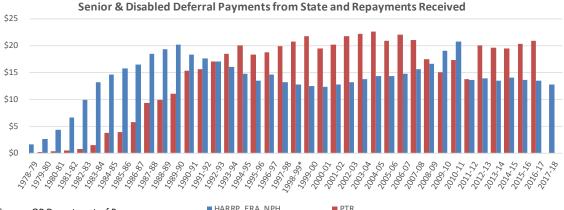

In 1984 household Income limit of \$17,500 added for tax deferral and special assessment.

Property tax deferral income limit was \$18,500 in 1990, \$19,500 in 1991, and \$24,500 through tax year 2000-01.

In 2001-02, the annual income to remain eligible for the tax deferral program was increased to \$32,000 indexed to CPI.

The 1999 Legislature opened the deferral program to the disabled community beginning 2001-02.

\* In 1998-99 while converting from one mainframe system to another, the DOR discovered that interest for prior years had not been posted to the senior deferral account. The increase in the 'balance owed' in 1998-99 reflects the impact of this interest.

### OREGON ESTATE AND INHERITANCE TAXES

### Overview of Oregon's Estate Tax

Estate, Inheritance, Gift, and Generation Skipping taxes are different forms of taxes on the transfer of wealth. Estate tax is imposed when the property transfer is caused by death and is levied on the value of property left by the deceased. Inheritance tax is also imposed after death, but levied on the amounts that each relative receives depending on their income and relationships to the deceased. Gift taxes are imposed when the property owner is still living and transfers property to different relatives. Generation Skipping tax can be imposed either at time of death or at time of shift in property rights by gift. Gift and generation skipping taxes are often administered as compliments to estate or inheritance taxes. House Bill 2541 (2011) replaced the federally connected tax to an Oregon specific estate tax. Oregon's estate tax currently is connected only to the definitions used in many of the tax forms as the federal estate tax that was in effect on December 31, 2010.

Estates with gross values (total estate value both inside and outside of Oregon) greater than or equal to \$1 million are required to file estate tax returns while estates valued less than \$1 million are not subject to the tax and no return is required. Calculation of Oregon's estate tax is determined by applying the rates listed at the bottom of the page to the Oregon taxable estate value.

Oregon Taxable Estate Value = Federal Taxable Estate (as in effect on 12/31/2010)

+ Federal state deduction

± Marital property deduction (if applicable)

- Any other exclusions or deductions

If the Oregon taxable estate is at least the amount in column 1 below, but less than the amount in column 2, the tax is the amount in column 3, increased by the excess above the amount in column 1 multiplied by the percentage in column 4. For example, the tax imposed on an Oregon taxable estate worth 5,000,000 would be \$425,000.1

<sup>&</sup>lt;sup>1</sup> Calculated as \$367,500+(5,000,000-4,500,000) x 11.5%

For estates with property inside and outside of Oregon, a ratio is applied to apportion the value of the property subject to Oregon's estate tax. The ratio is calculated in two ways depending on whether the decedent was an Oregon resident on the date of death.

Oregon Resident Ratio

 $OR\ Real\ Property + OR\ Tangible\ Personal\ Property + Intangible\ Personal\ Property^2$ Total Value of Decedent's Gross Estate

Non Resident Ratio

OR Real Property + OR Tangible Personal Property Total Value of Decedent's Gross Estate

In calculating taxable estate, a number of deductions are available including: funeral expenses, debts, mortgages and liens, bequests and gifts to charities, and bequests to a surviving spouse. Beguests to a surviving spouse act effectively as a deferral of tax as the property for which a marital deduction is allowed must be included in the value of the gross estate when the spouse that received the benefit of the deduction dies.

An optional natural resource credit (NRC) is available for natural resource property (NRP) which includes farm use and forestland use in addition to property used in commercial fishing business operations. The credit is unavailable to estates with a value greater than \$15 million and where the value of the natural resource property in Oregon constitutes less than 50 percent of the value of the estate in Oregon. The natural resource credit is calculated as follows:

Tax that would be payable absent the credit \* lesser of: value of NRP claimed or \$7.5M

To qualify for the NRC, the natural resource property must be transferred to a family member, and in five of the previous eight years must have been part of a farm, forestry, or fishing business. The property must also continue to be used in the operation of a farm, forestry or fishing business in at least five of the following eight calendar years following the decedent's death.

The American Taxpayer Relief Act of 2012 made several permanent changes to the federal estate tax which changed the way in which Oregon's estate tax interacts with the federal tax. The federal tax allows for a deduction of state death taxes paid. As the federal tax applies to estates with a gross value equal to \$5.43 million<sup>3</sup> or more. Oregon estates with values above the federal exemption threshold receive a reduction in federal tax owed equal to the value of tax paid in Oregon multiplied by their federal estate marginal tax rate.4

### Brief History of Oregon's Inheritance and Estate Tax

Oregon first enacted an inheritance tax in 1903. The inheritance tax prior to 1978 was calculated as a variable percentage of taxable estate value. The tax varied with the amount of the transfer and the relationship of the beneficiary to the decedent. The 1977 Legislature simplified and enacted a gradual repeal of the Oregon inheritance tax. The new tax rate was fixed at a flat 12% of net taxable estate value for all beneficiaries. Beginning January 1, 1987 the statutory inheritance tax rate became zero and the portion remaining was the "pick-up tax". The pick-up tax refers to the credit against the federal estate tax that existed. Oregon's inheritance tax was equal to the maximum state inheritance tax credit allowed federally.

<sup>&</sup>lt;sup>2</sup> Only includes intangible personal property not subject to tax in another state.

<sup>&</sup>lt;sup>3</sup> The exemption is indexed to inflation. The exemption amounts for deaths occurring in 2015 & 2016 are \$5.43 and \$5.45 million respectively.

<sup>&</sup>lt;sup>4</sup> The top federal estate tax rate was 40% in 2015.

This simultaneous determination allowed Oregon to impose an inheritance tax without causing an overall increased tax burden.

The 2001 federal Economic Growth and Tax Relief Reconciliation Act (EGTRRA) made significant changes in a number of tax areas, including federal estate taxes. The 2001 federal estate tax law changes included a phase-out of the state death tax credit, an increase in the gross estate value filing threshold, a decrease in the highest federal estate tax rates and a complete elimination of the federal estate tax effective 2010 for one year. The phase-out of the total state death tax credit eliminated states' abilities to capture a portion of each estate's federal tax liability beginning in 2005.

Partially in response to EGTRRA, Oregon passed HB 3072 (2003) which codified in law Oregon's connection to the Internal Revenue Code as in effect on December 31, 2000. For deaths that occurred in 2003-2011, Oregon's filing requirement differed from federal requirements. As Oregon's filing requirement was less than the federal requirement, in some cases estates were required to file with Oregon even if no federal return was required.

The 2007 session attempted to preserve family owned farms, fishing business and small forest owners by increasing the threshold for these estates to \$7.5 million. However, HB 3201 faced difficulties in the implementation phase. The February 2008 session introduced a credit schedule for the small family owned natural resource properties.

In 2012, HB 2541 changed the Oregon inheritance tax into the current Oregon estate transfer tax. The bill contained many of the recommendations provided by an Inheritance tax work group of the Oregon Law Commission. Included in the reforms was a credit for natural resource properties.

SB 864 (2015) modified the Natural Resource Credit (NRC). Qualification for the NRC was affirmed to be calculated based upon property within the state of Oregon only, rather than the "gross estate". To qualify for the credit, 50% of the Oregon adjusted gross estate value must be natural resource property.

## Inheritance / Estate Tax Receipts FYs 1973 - 2018

## Inheritance / Estate Tax Receipts as % of General Fund FYs 1973 - 2018

### SCHOOL FINANCE

### K-12 School Districts

Oregon has 197 school districts serving about 576,000 students in kindergarten through high school. These districts operate with relative autonomy within guidelines specified by both the Legislature and the State Department of Education. The federal government also requires certain mandated programs.

### **Local Revenue**

School districts receive general operating revenue from various sources. Property taxes are the primary source. Other sources include federal forest payments, county school funds, the state Common School Fund and state timber sales. These local revenues are included in the school distribution formula and are about 33% of state and local formula operating revenue.

### **State Support**

The Legislature through the State School Fund (SSF) provides about 66% of school formula operating revenue. This revenue is mostly from state income taxes and lottery revenue. The state's share increased from about 30% before Measure 5 (1990) to about 70% after Measure 50 (1997). State revenue replaced reduced local revenue because of these property tax limitations. Along with increased state aid, the school finance distribution method for state support changed dramatically.

### **Funding Equity**

The 1991 Legislature adopted the school equalization formula and phased in its implementation. Equity as measured by the equalization formula applied to all school districts beginning in 1992-93. Past Legislatures have also provided some funding outside the equalization formula. The 2007 Legislature provided funds for small high schools, special education and other programs from the SSF outside the formula. Currently state aid and local revenue for school districts equals 95.5% of the statewide K-12 school and education service district (ESD) formula revenue for general operating purposes. The remaining 4.5% goes to ESDs.

### **Equalization Formula**

The SSF equalization formula allocates an amount to each school district based primarily on number of students. The state grant is this formula amount reduced by local revenues. The formula equalizes revenues per student by removing past differentials caused by widely varying local tax rates and property wealth per student. To recognize that some students need more school services and that their schools may face higher costs, the formula assigns weights to certain students. For example, special education students count as 2.0 students to recognize their need for special programs. Additional student weights are for English as a second language programs, students from families in poverty, remote small schools and others. A general purpose grant per weighted student is adjusted for the experience level of teachers and set at a level that allocates available funding. The formula also funds 70-90% of transportation costs, costs above \$30,000 per high cost disability student (limited to \$35 million per year statewide) and up to 8% of classroom construction costs (limited \$9 million per biennium).

### **Local Property Tax Option**

School districts may ask voters to approve temporary local option levies. Local option revenue is limited to the lesser of (1) the district Measures 5 and 50 tax gap, (2) 25% of formula revenue or (3) \$2,000 per weighted student. The \$2,000 is indexed to increase 3% per year beginning in 2018-19.

LRO 1/18/2019 G1 Research Report #1-19

The levies may be approved for up to 5 years for operations and up to 10 years for capital projects. Local option revenue is in addition to equalization formula revenue.

### **Construction Tax Option**

The 2007 Legislature granted school districts new taxing authority. School districts may impose a tax on new construction in the district. The tax rate cannot exceed \$1 per square foot for residential use and \$0.50 for nonresidential use. The maximum rates are indexed beginning in 2009. The tax on nonresidential use is also restricted to \$25,000 per structure or building permit, whichever is less. The legislation exempts certain properties from this tax. In the school year 2016-17, 62 school districts used this option, raising a total of \$25.7 million.

### **Education Service Districts**

The school system also includes education service districts (ESDs). Nineteen ESDs provide regional educational support services. The ESD share of statewide K-12 school and ESD general operating revenue is 4.5%. This includes both state aid from the State School Fund and ESD property tax revenue. Before Measure 5 (1990), they received no state aid. Subsequently state support helped replace reduced property taxes. The 2001 Legislature adopted a 5 year phase-in plan to equalize ESD revenue. Those below the state ESD average revenue per student gradually received more and those above the average gradually received less. Final equalization began in 2005-06. Beginning in 2011-12, ESD revenue is 4.712% of the sum of component district formula revenue. This makes the ESD share of total ESD and K-12 school formula revenue 4.5%. Also starting in 2011-12, some school districts can opt out of ESD's and get reimbursement of their share of prorated formula revenues.

### School Improvement Fund

The 2007 Legislature appropriated \$260 million to the School Improvement Fund from the General Fund. School districts and ESDs received \$126.6 million in 2007-08 and \$133 million in 2008-09. Funds were targeted for a number of uses to improve student achievement. The Legislature has not made an appropriation to the School Improvement Fund since the 2007-09 biennium.

### Network of Quality Teaching and Learning

In the 2013 regular session, the Legislature created the Network of Quality Teaching and Learning (NQTL) and appropriated \$33 million to the network for 2013-15 biennium from the SSF. Later in 2013, the Legislature approved an additional \$12 million to the Network, using an additional distribution from the Common School Fund. In the 2017-19 school years, school districts and ESD's will respectively contribute \$17.3 million from the shares of the formula revenue. With \$5 million coming from outside the formula, the total budget stands at \$39.5 million.

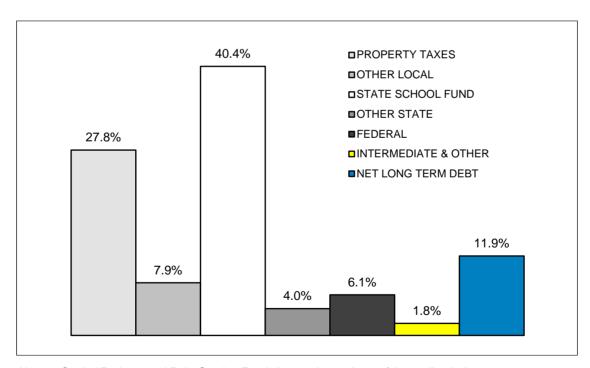

### **Education Stability Fund**

Voters approved a constitutional amendment converting the Education Endowment Fund to the Education Stability Fund in 2002 allowing the principal to be used to fund education.

The fund receives 18% of lottery net proceeds. The size of the fund is limited to 5% of General Fund revenue. Use of the principal requires meeting criteria reflective of an economic recession and approval by a 3/5 majority vote in each legislative chamber. The principal can also be used if the Governor declares an emergency and both chambers approve by a 3/5 majority vote. The principal can only be used to fund pre-kindergarten through higher education, continuing education and workforce training. Fund earnings currently are used to pay education lottery bond debt (75%) and provide scholarships (25%).

<sup>2.</sup> Operating revenue does not include federal and other non-formula revenue.

<sup>3. 1993-94</sup> to present, SSF includes funds for state youth correction schooling.

<sup>4. 1997-98</sup> to 99-00 State School Fund excludes funds not used due to a state and local revenue cap.

Additional funding outside the State School Fund: 1997-98 \$50 million for classroom needs;
 1998-99 \$150 million lottery bond for capital;
 2000-01 \$71 million lottery bond for capital;
 2001-02 \$108 million for school improvement.

<sup>6.</sup> The 1999-01 interim Emergency Board added revenue to the State School Fund appropriation.

### K-12 SCHOOL EQUALIZATION FORMULA

### STATE SCHOOL FUND DISTRIBUTION

District Formula Revenue (Equalization Funding)

General
Purpose Grant

Transportation Grant

High Cost Disability Grant Facility Grant

### **School District Revenue**

The school equalization formula determines each school district's general operating revenue from the State School Fund (SSF) in combination with local revenue. It is the sum of a general purpose grant, a transportation grant, a high cost disability grant and a facility grant. The formula allocates state and local revenue based on relative need for the formula component grants given the funding level available.

### State School Fund

The Legislature allocates money to the State School Fund primarily from the state General Fund and lottery revenue for distribution to school districts.

### Local Revenue

Statutorily, the school formula only includes district local revenue from the following sources:

Operating property taxes collected (including prior years)

Common School Fund County School Fund

Federal forest related revenue

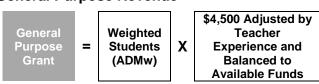

State managed county trust forests (Chapter 530)

ESD funds required to be shared with school districts

Revenue in lieu of property taxes

Supplantable federal funds

### **General Purpose Revenue**

### Weighted Students (ADMw)

Weighted student count is measured by average daily membership with extra counts or weights for students in special categories. Average daily membership (ADM) is the average number of resident students during the school year. Weighted ADM or ADMw counts students in special enrollment categories as more than one student.

The higher of the current year or prior year ADMw is used. The higher count is called extended ADMw.

### Student Weights

Student weight categories are as follows:

Category	Additional Weight	Count (ADMw)
Special Education and At Risk		
Individual Education Program	1.00	2.00
English Language Learner	0.50	1.50
Pregnant and Parenting	1.00	2.00
Students in Poverty Adjusted	0.25	1.25
Neglected and Delinquent	0.25	1.25
Students in Foster Care	0.25	1.25
Grade and School		
Kindergarten (Half-day)	-0.50	0.50
Elementary District	-0.10	0.90
Union High District	0.20	1.20
Remote Small School	Varies	

### Individual Education Program Weight

Students with various limitations such as hearing, speech, and visual impairments receive special individual education. The count cannot exceed 11% of ADM without approval by the Department of Education.

### Remote Small School Weight

A school site qualifies for additional ADMw if

Elementary High

ADM less than (varies with grades) 252 (9gr) 350 (4gr) Distance to nearest same district school more than 8 miles

The additional ADMw varies with number of students and distance. Generally, the smaller the school the greater the additional weight per student. The high school distance adjustment, for being less than 20 miles from the nearest high school, was phased out and sunset at the end of 2004-05. The weighting scheme will change when full-day kindergarten ADM weight becomes the same as other grades.

### Teacher Experience and Balance to Funding

The dollars per weighted student target is arbitrarily set at \$4,500 (adopted in 1991) before adjustment for teacher experience.

The teacher experience adjustment increases (or decreases) the target by \$25 for each year the district average teacher experience is more (or less) than the statewide average teacher experience.

A calculated multiplier balances funds available to funds allocated. The multiplier modifies the adjusted target amount to distribute the available state appropriation. The multiplier changes over time and is estimated to be 1.7068 using \$4,500 per ADMw in 2017-18. The equivalent amount is \$7,681 per ADMw.

### **Transportation Revenue**

Transportation Grant

70% to 90% of Transportation Costs

Districts are ranked by approved transportation costs per student from highest to lowest. The district grant depends on the following ranking:

District Rank	% of Costs
Top 10%	90%
Next 10%	80%
Bottom 80%	70%

The grant is the percent of costs corresponding to district rank times approved transportation costs.

Approved transportation costs are the following:

Preschool handicapped students

Elementary students more than 1 mile from school Secondary students more than 1.5 miles from school

Students going between school facilities

Students on field trips

Health or safety needs

Room and board in lieu of transportation

### **High Cost Disability Revenue**

High Cost Disability Grant Up to Sum of Costs above \$30,000 per Disability Student

For a student with approved disability costs above \$30,000, the grant is the cost minus \$30,000. The district grant is the sum of the grants for each student with disability costs above \$30,000. ESD costs for each student can be included in the student total. Total district grants cannot exceed \$35 million per year. If total grants initially exceed this amount, the grants are reduced proportionally.

### **Facility Revenue**

**Facility Grant** 

Up to 8% of Construction Costs

Districts adding new classroom space receive up to 8% of construction (excluding land) and portable unit costs for furnishings and equipment. Total grants are limited to \$9 million per biennium. If grants at 8% exceed the limit, the reimbursement percent is reduced.

### **School Revenue Share**

The school share of both school district and ESD formula revenue is 95.5%. Formula revenue is State School Fund dollars available for distribution to school districts and ESDs and designated local revenue (primarily property taxes) included for each in their respective formulas. The K-12 equalization formula uses 95.5% of this total to allocate to school districts.

### **State Payment Schedule**

The July payment is 16.67% of the estimated State School Fund grant with 8.33% in each of the following 10 months. There is no June payment. Adjustment for audited data occurs in the following year.

#### Other State School Fund Allocations

The 2017 Legislature allocated \$7.6 million of the State School Fund for special programs and grants for the 2017-19 biennium. The largest were \$5 million to small districts with small high schools and \$1.6 million for the purposes of the Oregon virtual school district.

The 2017 legislature appropriated \$39.5 million from the SSF to the Network of Quality Teaching and Learning for the biennium. The Network is funded by \$5 million carve-out and \$17.3 million each from the school districts and education service districts. The 2017 Legislature also decided to provide Local Option Equalization Grants by transferring \$2.8 million from the SSF to the General Fund.

FORMULA GRANT PERCENTAGE by DISTRICT SIZE										
		2017	-18							
District Size by ADM	# of Districts	General Purpose	Transportation	High Cost Disability	Facility					
0- 500	77	93.95%	5.91%	0.08%	0.05%					
500- 1,000	32	95.26%	4.47%	0.26%	0.01%					
1,000- 3,000	41	95.78%	3.92%	0.22%	0.07%					
3,000- 5,000	16	95.92%	3.64%	0.44%	0.00%					
5,000-10,000	18	95.93%	3.56%	0.45%	0.07%					
10,000 and Greater	13	95.53%	3.44%	0.91%	0.12%					

### **ESD EQUALIZATION**

### STATE SCHOOL FUND DISTRIBUTION

General Services Revenue

Higher of

- (1) Base Revenue X Percent to Balance
- (2) \$1.165 million (proportional change with SSF)

### **Equalization**

The ESD equalization formula determines each ESD's operating revenue from the State School Fund and local revenue. The allocation formula basically assumes that ESD revenue should be proportional to the equalization formula revenue of component school districts.

#### **Revenue Share**

Starting from 2011-12 school year, the ESD share of both school district and ESD formula revenue is 4.5%. Formula revenue is State School Fund dollars available for distribution to school districts and ESDs and designated local revenue (primarily property taxes) included for each in the respective formulas. Starting from 2011-12, some school districts can opt out of ESD's and get reimbursement of their share of prorated formula revenues.

### **Component School Districts**

The school districts within the boundary of an ESD are the ESD's component school districts.

### **General Services Revenue**

General services revenue equals the district base revenue. The source is State School Fund revenue and the local revenue of the ESD.

General		State		Local
Services	=	School	+	Local
Revenue		Fund Grant	_	Revenue

#### **State School Fund Grant**

The State School Fund Grant is the ESD's allocated general services amount less its local revenue.

### **Local Revenue**

Local revenue is the sum of these two sources:

Operating property tax collections
(including prior years)

State managed county trust timber (Chapter 530).

### **Excess Local Revenue**

If an ESD's local revenue is greater than its general services revenue, then the State School Fund grant is zero. Any local revenue in excess of the general services revenue is distributed to component districts proportional to ADMw (extended) and is included as local revenue for them in the school formula the following year.

### **Base Revenue and Minimum Base**

The base revenue is 4.712% times the sum of the school formula revenue for the ESD's component districts. With the ESD total state and local share set at 4.5%, the ESD percent applied to the school district 95.5% must be more than 4.5% (4.712%\*95.5%=4.5%).

				Sum of
Base		4.712%	v	Component
Revenue	=	4.7 12 /0	^	School District
				Revenue

By using school district formula revenue as the basis for allocating general services revenue, ESD equalization depends on the same factors as school district equalization. ESDs in their role of assisting component school districts are assumed to have the same relative need for funds as their school districts. The district minimum allocation is \$1.165 million beginning in 2015-16. This minimum allocation will fluctuate proportionately as the SSF fluctuates after 2015-16.

### Percent to Balance

Applying the 4.712% to the sum of the component district formula revenue uses up the 4.5% of total revenue available for schools and ESDs. So if extra funds are necessary to meet the \$1.165 million minimum, then the higher total must be reduced to stay within the 4.5% of available funds. Multiplying allocated revenue excluding minimums by a percent slightly less than 100% brings the total down to available funds. The percentage has to be further reduced to accommodate (1) ESD's share of \$15.5 million per biennium to the Quality Teaching and Learning Network, and (2) up to \$484,000 per year for 10th grade assessment testing.

### **State Payment Schedule**

The July payment is 16.67% of the estimated State School Fund grant with 8.33% in each of the following 10 months. There is no June payment. Adjustments for audited data are made the following year.

### **ESD Students**

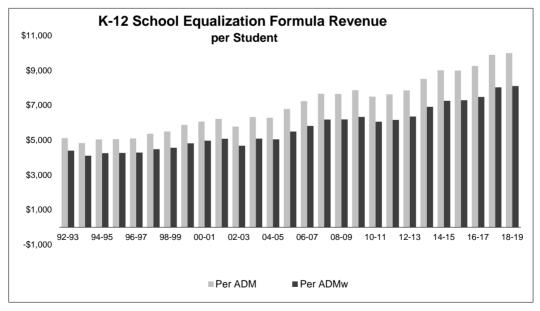

The student count for an ESD is considered to be the sum of the students in its component school districts. However, the formula does not directly use an ESD student count.

Notes

Excludes revenue outside the school formula like school improvement funds, lottery revenue bonds and federal funds. ADMw is extended ADMw (higher of current or prior year ADMw).

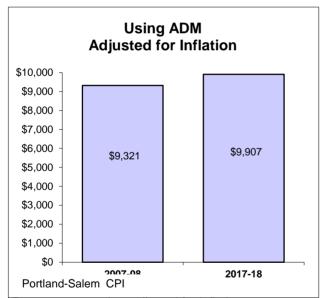

Includes students in the state youth corrections program beginning in 1997-98.

Includes students in the state youth detention program beginning in 2001-02.

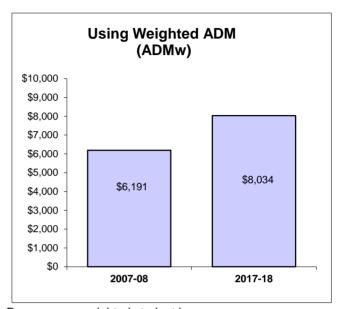

# K-12 SCHOOL FINANCIAL TRENDS STATE AND LOCAL FORMULA REVENUE PER STUDENT 10 Year Comparison

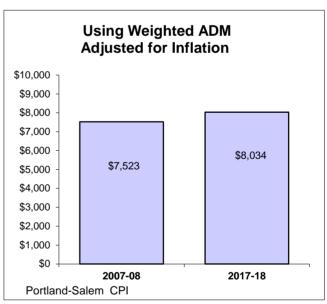

Revenue per student increases about 29%.

Revenue per student adjusted for inflation increases about 6%.

Revenue per weighted student increases about 30%.

Revenue per weighted student adjusted for inflation increases about 7%.

### **HIGHWAY and TRANSPORTATION TAXES**

Highway finance interacts with several aspects of Transportation policy and regulations. However, the following major revenue sources constitute the five pillars of Highway finance in Oregon:

**Fuel taxes** include Motor Fuel Tax (gasoline) and Use fuel tax (diesel, natural gas, etc.) currently at 30 cents per gallon. Motor Fuel Tax is paid by the wholesaler and is included in the price at the pump. Non-highway or exempt users can apply for refunds of the taxes they paid. Use-Fuel tax is paid by the retailer when purchased for highway use. Heavy vehicles pay the weight-mile taxes and not fuel tax.

Weight-Mile taxes (WMT) on heavy vehicles (trucks) are paid monthly to the Motor Carrier Division of the Department of Transportation for each mile traveled on Oregon roads. The cost per mile is based on the declared gross weight of the truck. The rate schedule ranges, in 2,000-pound increments, from 26,000 to 105,500. The rates increase from 4.98 cents per mile to 16.38 cents per mile for trucks below 80,000 pounds. The rates for trucks over 80,000 lb. increase while allowing a discount for a higher number of axles on the truck (table B). Over weight and dimensional vehicles pay additional fees. Log, sand, gravel, wood chip and other dump trucks may elect to pay monthly fees in lieu of weight-mile taxes (flat fees). These are based on gross vehicle weight and do not vary with miles traveled.

**Motor vehicle registration fees** are imposed on cars and trucks. Cars and other vehicles less than 10,000 pounds pay \$86 a biennium or \$172 for a new vehicle 4-year registration (HB 2001, effective on Oct, 1, 2009). Truck registration fees are based on gross weight. Fees for vehicles with weights below 26,000 lb. range from \$391 to \$764. Registrations for trucks heavier than 26,000 lb. range from \$375 to \$1,295. Nonprofit organizations, tow trucks, and farm vehicles pay reduced fees based on separate registration schedules.

**Vehicle Titling Fees** are imposed on cars and trucks. Vehicles under 26,000 pounds pay \$77 and vehicles over 26,000 pounds pay \$90. Salvage and duplicate titles are \$27.

**Bonding** started taking a bigger role in funding transportation with the introduction of the Oregon Transportation Improvement Act (OTIA) in 2001. OTIA I (HB 2142) dedicated \$71.2 million a biennium for debt service on \$400 million bonds for modernization projects. OTIA II (HB 4010 of 2002 first special session) took an advantage of lower interest rates and increased the limit on net proceeds to \$500 million. OTIA III (HB 2041 of the 2003 session) increased most fees and rates to provide debt service for \$1.6 billion in bond proceeds for bridge repair and replacement, and \$300 million in net proceeds for highway modernization. HB 2001 of the 2009 session (Jobs and Transportation Act) allowed new bonding for projects using \$70 million from the new revenue for annual debt service.

The above revenue sources make up the majority of state funds available for highways. There are, however, other fees on recreational vehicles, motor homes, personalized license plates, and driver's licenses. The different fees address multiple facets of the operation or regulation of the transportation system, and some of the fees are dedicated to non-highway uses, such as state parks. Connect Oregon (I, II, III and IV), which funds multimodal projects, was financed mostly by Lottery backed bonding. Expect for the fourth act which was \$40 million in bonds, the first three acts were all \$100 million.

### **HB 2017, Transportation Funding Package:**

The 2017 session adopted a historic funding package. The increases in rates and revenue raised ranged from the traditional, to somewhat new, to innovative.

The traditional increases included a total of 10 cents in Gas Tax and Use Fuel increase,

4 cents on January 2018, moving from 30 to 34. In January 2020, a 2-cent (34 to 36) increase, conditional on OTC report (sec 45) will take place. In January 2022, a 2-cent increase from 36 to 38 will occur, conditional on an OTC report. Finally, during January 2024, another 2-cent increase is scheduled (38 to 40), conditional on OTC report.

**Vehicle Registration Fee** increased \$13 on January 1, 2018 to December 31st, 2019 (current \$43).

Many other fixed fees changed. Example fixed load, for hire, Antique, special-use, motorcycle, racing and government owned. (Sections 34-36)

**Title Fees Surcharge**, adds a surcharge of \$16 to the current title fee of \$77 on January 1st, 2018 to December 31st, 2019.

**On January 1st, 2020,** a new way of treating Vehicle fees that is based on MPG rating (tiered) will take place. Also, a change in the recovery (registration) fee in alignment to use (responsibility) of the road (sec 32-37) will occur. The fee is variable and based on MPG rating.

0-19 MPG, \$18

20-39 MPG, \$23

Over 40 MPG, \$33

Electric vehicles, \$110 unless the owner has registered the vehicle in the OReGO program. The variable MPG fee is increased again on January 1st, 2022. The fee schedule is listed below.

0-19 MPG, \$20

20-39 MPG, \$25

Over 40 MPG, \$35

Electric vehicles, \$115 unless the owner has registered the vehicle in the OReGO program. Title fees also changed in alignment with (potential) use of the road. The fee is variable (tiered) and based on MPG rating starting on January 1st, 2020.

0-19 MPG, \$21

20-39 MPG, \$26

Over 40 MPG, \$36

Electric vehicles, \$110

The variable MPG Title surcharge is increased one more time on January 1st, 2022. The fee schedule is listed below.

0-19 MPG, \$24

20-39 MPG, \$29

Over 40 MPG, \$39

Electric vehicles. \$115

The OTC Transportation commission is tasked with studies and reports on the different vehicles contributions to cost by 2023 to find the right level for the MPG tiered fee.

The new package also increases the weight mile and flat fees to 53.3% in four increments 2018, 2020, 2022, and 2024. Additionally, cost responsibility is aligned at 62.87% light, 37.13% heavy.

The bill also had changes in distribution and other innovations.

State wide importance projects (off the top and before distributions)

30 million a year to rose quarter bonding (\$400-\$500 million)

\$10 million/year, going to \$15 million by 2022 to Safe routs to school The balance is distributed 50,30,20

<u>Small cities</u> program gets \$4 million a year off the top of city distributions. keeping the current \$1 million to become \$2.5 million contribution from ODOT, and \$2.5 million contribution from cities. <u>Special County</u> distribution gets \$5 million a year to counties with less than 200,00 vehicles with proportion of lane miles over vehicles. Special counties receive \$750,000 distributed to the small 4 counties.

Other distributions from the state share of the revenue

State Share Pays the OTIC for Rest Areas specified in sec (125-131)

Special projects are funded through a \$450 million bond from revenue of the earlier stream Safety dedication of \$10 million a year increasing to \$15 by 2022.

The remainder of the revenue stream going to the state is to be spent per the following percentages: 40% bridge, 30% seismic, 24% maintenance and culvert, 6% preservation & safety

### Highway Fund

The Oregon Constitution requires all tax revenues levied upon ownership or operation of motor vehicles (except recreational vehicles) be used for road related expenditures. In 1999, the cost responsibility clause was added to require that light and heavy vehicles pay fees in proportion to the costs exacted on the system by each vehicle class. Net revenues from the dedicated taxes and fees are deposited in the Highway Fund. The Highway Fund is distributed among the state, cities and counties for road construction and maintenance. Moneys are distributed among Oregon counties in proportion to vehicle registrations, while city distributions are in proportion to population. As a result of the three OTIA legislations mentioned above, ODOT will have to track revenues separately before and after each of those legislations.

Increases for various registration fees, license, and titles with their heavy vehicle equivalents and other fees need to be tracked before and after HB 2041. The different distribution formulas for the different revenue streams are shown in the table below. The Base includes all revenues from taxes and fees before the increases in HB 2142 and HB 2041. The distribution for OTIA is any excess of the \$71.2 million that is not required for debt service. In the case of the Bridge Distribution (OTIA III), any revenue not used for debt service goes to the indicated jurisdiction. The 2003 session also allocated a small number of vehicle and driver transaction revenues to be distributed to cities and counties with 60% to 40% split. HB 2001 of the 2009 session is meant to raise \$300 million a year, and distributes \$3 million per year to the Travel Information Council, \$24 million per year to ODOT special plan programs. The balance (\$273 million) goes 20% (\$54.6 million) to city streets and 30% (\$81.9 million) to county roads, the remainder 50 percent (\$136.5 million) to state highways.

### **HIGHWAY FUND DISTRIBUTION**

Recipient	Base	OTIA	Bridge*	Misc.	HB 2001	HB 2017		
State	60.05%	50%	57.53%	0%	50%	50%		
Counties	24.38%	30%	25.48%	60%	30%	30%		
Cities	20%	20%						
* All revenues go to ODC

SOURCE: Compiled by FTA from various sources.

<sup>/1</sup> Tax rates do not include local option taxes. In AL, 1 - 3 cents; HI, 8.8 to 18.0 cent; IL, 5 cents in Chicago and 6 cents in Cook county

<sup>(</sup>gasoline only); NV, 4.0 to 9.0 cents; OR, 1 to 5 cents; SD and TN, one cent; and VA 2.1%.

<sup>/2</sup> Local taxes for gasoline and gasohol vary from 11.1 cents to 19.1 cents. Includes Inspection Fee, SCETS, & Additional Local Tax.

<sup>/3</sup> Carriers pay an additional surcharge equal to IL-19.3 cents (g) 20.1 cents (d), IN-11 cents, KY-2% (g) 4.7% (d).

<sup>/4</sup> Tax rate is based on the average wholesale price and is adjusted annually The actual rates are: KY, 9%; and UT, 12%.

<sup>/5</sup> Portion of the rate is adjustable based on maintenance costs, sales volume, cost of fuel to state government, or inflation.

<sup>/6</sup> Large trucks pay an additional (d) 3.5 cents (g) 12.6 cents. Actual rates (g) 5.1%, (d) 6%.

<sup>/7</sup> Tax rate is reduced by the percentage of ethanol used in blending (reported rate assumes the max. 10% ethanol).

<sup>/8</sup> Califonia Gasoline subject to 2.25% sales tax. Diesel subject to a 9.25% sales tax.

<sup>/9</sup> Diesel rate specified is the fuel use tax rate on large trucks. Small vehicles are subject to 18 cent tax rate.

 $<sup>/10\</sup> Tax\ rates\ scheduled\ to\ increase\ to\ 49.4\ cents\ in\ WA,\ 7/1/16,\ 18\ cents\ in\ AL\ (g),\ 10/1/16.\ Decrease\ to\ 34\ cents\ in\ NC,\ 7/1/15.$

### TIMBER TAXATION

### A Brief History

Prior to 1929, all private forestland in Oregon (8 million acres) was taxed based on the value of standing timber and the land beneath it. At the time, it was common for landowners to log old growth, and to not invest further in replanting. Lands would often revert to farm or urban uses after being logged. Some lands even reverted to county ownership, as private landowners stopped paying property taxes on logged lands that were viewed as worthless. In response to these foreclosures, the 1929 Legislature implemented an optional Forest Fee and Yield tax.

This new tax applied to reforestation lands (860,000 acres) and allowed taxation on the value of timber upon the cutting of trees rather than a property tax each year as the trees grew. Forests that qualified as reforestation lands were subject to a 5 cents per acre "forest fee" annually as well as a 12.5% "Yield Tax" on the value of timber that was harvested. This system continued until it was repealed in 1977. In 1947, a Forest Products Harvest Tax was imposed per thousand board feet on all merchantable harvests from both public and private land (first 25,000 bf exempt). Under 1961 legislation, most Western Oregon land was subject to partial property tax exemption where all timber under 12" in diameter was exempt from property tax due to its designation as "reproduction timber." Larger trees were placed on the property tax roll at a percentage of their immediate harvest value. In the year of harvest, the local property tax rate was applied to 70% of the value of the harvested timber. For small tracts, the Western Oregon Small Tract Optional Tax (WOSTOT) allowed small forestland owners to pay property tax on the productivity value of qualified forestland (200,000 acres). Forest land's productivity value was categorized by site class ranked I (most productive) through V (least productive) and values were set accordingly. Eastern Oregon began a severance tax during this time, where owners paid 5% of the market value of all private timber harvested.

Beginning in 1962 (eastern Oregon) and in 1978 (western Oregon), severance taxes on timber harvest were imposed on the value of timber harvested in lieu of property tax on the value of standing timber (not applicable to forestland under WOSTOT). The 1977 Legislature repealed the Forest Fee and Yield Tax, returning the reforestation lands to the regular program phased in over the next 20 years. State collected severance taxes were distributed to local taxing districts as an offset to property taxes.

In 1991, in response to Measure 5 (1990), severance taxes were converted to privilege taxes with temporary rate reductions. The 1993 Legislature exempted standing timber from property tax, set new statutory forestland values, assessed forestland at 20% of the statutory value, reduced privilege tax rates, and completed the transition for reforestation lands. Privilege taxes were imposed in lieu of property tax on 80% of forestland value.

Under Measure 50 (1997), WOSTOT productivity values were converted to statutory forestland values and maximum assessed values were established for all forestland (see RR #6-00 for more detail). The 1999 Legislature phased in a new program for forestland in ownerships of 5,000 or more acres and the 2001 Legislature extended this program to all forestland as of 2003. Forestland was assessed at 100% of the lesser of its maximum specially assessed value or its specially assessed value as determined by the Department of Revenue (Department). The 2003 Legislature passed HB 2197, which extended the 1999 phase in for one year for ownerships of less than 5,000 acres and created an optional Small Tract Forestland (STF) program (see below). The 2005 Legislature simplified the time requirements for filers who apply for a continued classification of a parcel as STF; and clarified that unless the Tax Assessor

determines that the property does not constitute forestland, a disqualified STF parcel will automatically be qualified as either Western or Eastern Oregon forestland. A \$200 late filing fee was also enacted for applications for continued classification as STF parcels if the applications are filed after a 30 day notification period has ended.

### Current Law

As of July 1, 2004, all forestland is subject to the Forest Products Harvest Tax and all private forestland is taxed under the Oregon Forestland program (sometimes referred to either as the 100% program or the industrial program) unless the owner elects to have qualified parcels taxed under the Small Tract Forestland (STF) program. Under the Oregon Forestland program, forestland is assessed for property tax at the lesser of either its maximum specially assessed value or its specially assessed value as determined by the Department. There are no privilege or severance taxes imposed at the time of harvest other than the Forest Products Harvest Tax. The Forest Products Harvest Tax Rate is established annually.

Under the STF program, forestland has an assessed value equal to 20% of the specially assessed forestland values determined by the Department. The 2015-16 values are shown in the table below. The amount of tax that is not imposed due to the 80% reduction is recovered when a severance tax is applied to harvested timber. The severance tax applies to the net volume of logs from harvested timber. The Forest Products Harvest Tax also applies to this volume. The severance tax rates for calendar year 2016 are \$5.49 (Western Oregon) and \$4.27 (Eastern Oregon) per 1,000 board feet harvested. These rates are indexed annually in proportion to the increase in value of forestland in the Program in each area.

For a parcel of forestland to qualify for the STF program, it must be held in common ownership of at least 10 acres but less than 5,000 acres of Oregon forestland and meet minimum stocking and species requirements. The owner must apply to the relevant county assessor(s) and the application must include all forestland owned in contiguous parcels. Assessors must disqualify forestland from the STF program if it fails to meet minimum stocking and species requirements or becomes part of an ownership of less than 10 acres or more than 5,000 acres. Disqualification from the program is subject to additional taxes equal to the tax on the 80% of value not assessed while in the program to a maximum of 10 years.

The values per acre shown in the table below are the maximum assessed values for forest land in the Oregon Forestland program (OFP) and the value limits for forest land in the Small Tract Forestland program (STF).

LRO 1/18/2019

The historically complex distribution system for privilege taxes has been eliminated. Property taxes on forestland are treated like any other property taxes. The severance taxes under the STF program are deposited to the appropriate Eastern or Western Oregon Timber Severance Tax Fund. After payment of administrative expenses, the balance in each fund is distributed to the State School Fund (60.5%), the Community College Support Fund (4.5%) on May 1<sup>st</sup> of each year, and to the counties in either eastern or western Oregon (35%) on August 15<sup>th</sup> following the end of the fiscal year.

As noted above, the Forest Products Harvest Tax applies to harvests of merchantable timber from both publicly and privately-owned forestland. The tax is levied per 1,000 board feet of timber harvested and the tax rates are set to fund various forestry related activities as listed in the table below. The activities include OSU forestry research, fire protection fund, and administration of the Forest Practices Act and forest monitoring funded by the Department of Forestry. The 'Other' rates include \$1.75 (11 months) for salmon reclamation in 1998, \$0.15 for assistance to nonindustrial landowners in 2001 and 2001, and most recently, \$0.10 to support Professional Forestry Education at the Oregon State College of Forestry. Rates shown for the Oregon Forest Research Institute (OFRI) are subject to change by the governing board of the institute. The statutory rate for fire suppression is \$0.625 but the State Forester may suspend this rate if the balance in the Forest Land Protection Fund is estimated to exceed \$15 million for a calendar year or increase the rate if additional funding is required.

### Local Revenues from Federally-Owned Forest Lands

Notwithstanding the importance of the Forest Products Harvest Tax and Severance Tax revenues to the state and to local taxing districts, among certain counties primarily located in southwest Oregon, federally-owned forestlands are a critical revenue source. Under federal law, harvested timber from federally-owned lands must be shared with the state and counties in which the federally-owned forestlands are located. On October 30, 2000, Congress passed Public Law 106-393 (the Secure Rural Schools and Community Self-Determination Act of 2000, commonly known as "Payments to States") in order to offset the effect of decreased revenues available to counties from declining timber harvests on federal lands. In FY 2010-11, estimated federal forest payments totaled \$116 million. The act was reauthorized for FY 2013 for 1 year at a rate of 95 percent of the FY 2012 amount. Oregon received \$96.8 million in FY 2014 from the SRS funds as well as BLM payments to counties for harvest on the Oregon and California Railroad lands and the Coos Bay Wagon Road Lands. In FY 2015<sup>2</sup>, these payments were \$89.4 million. O&C funds to the 18 counties were \$24 million in 2016<sup>3</sup>.

<sup>&</sup>lt;sup>2</sup> SRS Act was suspended, and then reauthorized on 4/16/2015. Revenue data for most recent two years was not available at time of publication https://www.fs.usda.gov/main/pts/home

### **EXCISE TAXES**

### Taxes on Cigarettes and Other Tobacco Products

Excise taxes are imposed on distribution of all tobacco products in Oregon. Taxes are levied on each cigarette and as a percent of wholesale price of other tobacco products. As of January 1, 2019 the tax rate on cigarettes is 66.5 mills per cigarette or \$1.33 per pack of 20 cigarettes. The distribution of tax revenue per pack of cigarettes is shown at right. Note that the numbers do not sum to \$1.33 due to rounding. TURA refers to the Tobacco Use Reduction Account. Distributions to cities and counties are based on their respective populations.

### **Cigarette Tax Distribution**

as of 1/1/2019

The Other Tobacco Products (OTP) tax is applied slightly differently depending upon the product. Moist snuff is taxed at \$1.78 per ounce with a minimum tax of \$2.14 per retail container. Cigars are taxed at 65% of their wholesale sales price but the tax is capped at \$0.50 per individual cigar. All other tobacco products not taxed as moist snuff or cigars are taxed at 65% of their wholesale sales price. Over 75% of the OTP tax comes from moist snuff and roughly 15% from cigars.

# Distribution of Other Tobacco Products Tax (1/1/2019)

General Fund: 53.84%
OR Health Plan: 41.54%
TURA: 4.62%

Under current law, inhalant deliver systems (e-cigarettes and other vapor products) are not subject to established cigarette or other tobacco products taxes.

Master Settlement Agreement

Additional tobacco revenue is received under the Master Settlement Agreement (MSA). Through June 30, 2017, Oregon has received over \$1.5 billion in total payments and expects to receive about \$136.7 million for the 2017-19 biennium. MSA revenue has often been pledged to repay bonded indebtedness. MSA does not cover OTP such as cigars and moist snuffs.

LRO 1/18/2019 J1 Research Report #1-19

1

<sup>&</sup>lt;sup>1</sup> Under current law, moist snuff rates are scheduled to be indexed to inflation for reporting periods beginning on or after July 1, 2022. Rates are indexed to one quarter of the change in U.S. City Average Consumer Price Index.

<sup>&</sup>lt;sup>2</sup> HB 2672 (2009) changed the method of taxation for moist snuff. Prior to HB 2672, moist snuff was taxed at 65% of the product's wholesale sales price. HB 2672 (2009) changed the method of taxation from wholesale sales price to the current law weight based approach.

# Oregon Liquor Control Commission (OLCC)

Taxes are imposed on beer and wine manufactured or distributed in Oregon. The current rates are \$2.60 per 31-gallon barrel (8.4¢ per gallon) of beer, tax on wine is 67¢ per gallon, and 77¢ per gallon for dessert wine (14% to 21% alcohol content). Two cents of the wine tax go to the Wine Board, 50% of the remaining beer and wine taxes go to Mental Health and Drug Abuse Prevention, and the balance goes into the OLCC Account. Beverages with 21% or more alcohol are exclusively imported and distributed by the state of Oregon. Currently OLCC sets retail prices, on average, at 108% above cost (including shipping, and federal taxes). The net revenue from these operations goes into the OLCC account. Available revenue in the OLCC account is distributed 56% to state General Fund, 10% to counties by population, 20% to cities by population, and 14% to cities by formula. A surcharge of 50¢ is a temporary add on for the last three budget periods, and generates approximately \$30.0 million a biennium.

The OLCC is also tasked to implement the **Marijuana** legalization initiative (Measure 91) that was passed in 2014. That implementation was redesigned by HB3400 of the 2015 session. The tax was changed to a 17% point of sale with 3% optional tax for local governments starting in 2017. When fully implemented the revenue is likely to reach \$ 85 to \$90 million in an average fiscal year.

The early start program allowed for marijuana to be sold and taxed during the 2016 calendar year. Early start allowed medical dispensaries to sell to the public with a 25% tax rate. The early start program brought in about \$65 million in tax proceeds. After deductions for collection and administration costs, marijuana revenue will be divided among six statutorily specified distributions. Drug abuse and prevention will get 5% of funds, cities and counties will each get 10% and then distributed among different cities and counties that don't prohibit marijuana based on statutory specified formula, 15% goes the state police, 20% to mental health account, and 40% to the state school fund.

State Sales Tax from Washington State DOR 2016 (no local rates)

Sales tax rates assume \$12.5 per gallon for beer, \$45 a gallon for wine.

n.a. = not applicable. These 5 states do not have a general sales tax.

<sup>(1)</sup> In 17 states, the government directly controls the sales of distilled spirits.

Revenue in these states is generated from

various taxes, fees, price mark-ups, and net liquor profits.

<sup>(2)</sup> General sales tax applies to on-premise sales only.

<sup>(3)</sup> Washington privatized liquor sales effective June 1, 2012.

### LOTTERY

### **History**

The Oregon State Lottery and the five-member State Lottery Commission were created by an initiative petition in 1984. Commission members are appointed by the governor and charged to produce the maximum amount of net revenue to benefit the public purposes listed in the Constitution.

The Lottery currently offers 10 traditional games through approximately 3,900 retailers. These games are allowed to persons of age 18 or older. Video lottery (poker and line games) is played on approximately 11,700 machines in more than 2,200 licensed premises. Persons aged 21 or older are allowed to play video lottery.

The Constitution specifies that at least 84% of the total annual revenues from the sale of all lottery tickets or shares be returned to the public in the form of prizes and net revenues benefiting public purpose. The Constitution originally dedicated net lottery proceeds to creating jobs and furthering economic development. Dedication of net lottery proceeds has been expanded over the past 20 years by several ballot measures and legislation.

Measure 21 in May 1995 expanded the scope of using net proceeds to include financing public education. It also gave lottery bonds first claim on lottery proceeds and dedicated 15% of net proceeds to the Education Endowment Fund.

Measure 66 in November 1998 further expanded the use to include restoring and protecting Oregon's parks, beaches, watersheds, and critical fish and wildlife habitats. It required that 15% of net proceeds be deposited to the Parks and Natural Resources Fund, with 50% dedicated to parks and recreation areas and 50% to fish and wildlife habitats.

Measure 19 in September 2002 transferred \$150 million of the Education Endowment Fund to the State School Fund, converting the fund to an education stability fund. It required 18% of net lottery proceeds be deposited to this fund. If the fund balance reaches 5% of the prior biennium's General Fund revenue, further deposits to the fund stops and 15% of the net proceeds accrue to a school capital matching fund.

The 2005 legislature (HB 3466) repealed lottery games on sporting events starting in July 2007. The same bill also dedicated 1% of lottery proceeds to fund sports programs at Oregon universities.

Measure 76 in November 2010 made the 15% dedication to parks and natural resources permanent and allocated a minimum of 12% of the parks and recreation areas portion of revenue to local and regional grants.

Measure 96 in November 2016 created the Veterans' Services Fund and dedicated 1.5% of net proceeds to the fund. Measure 99 in the same election required the lesser of 4% of lottery transfers or up to \$22 million per year be allocated to the Outdoor School Education Fund.

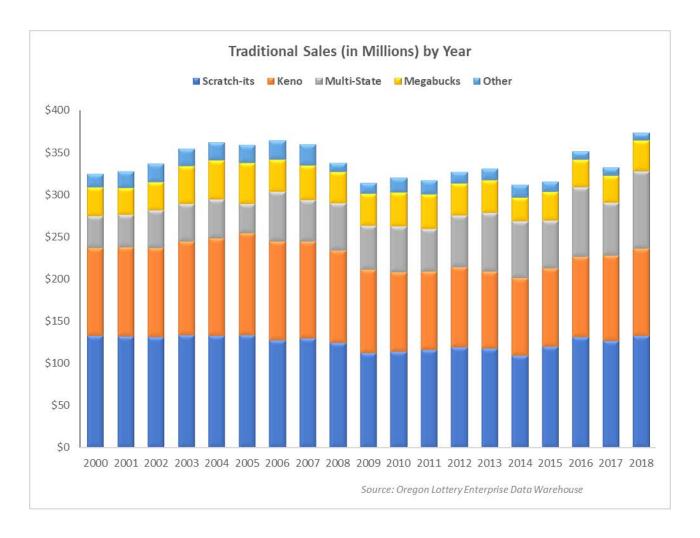

#### Traditional Games

The first Traditional games were instant games (Scratch-its) in 1985. A number of other games followed, some of which have been discontinued or modified. Multi-State includes Powerball and Mega Millions.

Legislation in 1989 initiated Sports Action as an additional lottery game with the proceeds of the game dedicated to intercollegiate athletics in Higher Education. However, 2005 legislation repealed sports games as of July 2007 and the intercollegiate athletic funding was revised to be 1% of total lottery

proceeds. This amount has pushed funding of university athletic programs to approximately \$10 million per biennium.

The following chart shows the gross sales for Traditional games since 2001. The "Other" group includes Breakopens, Sports Action, Scoreboard, Raffles, Pick 4, Win for Life, and Lucky Lines.

### Video Lottery

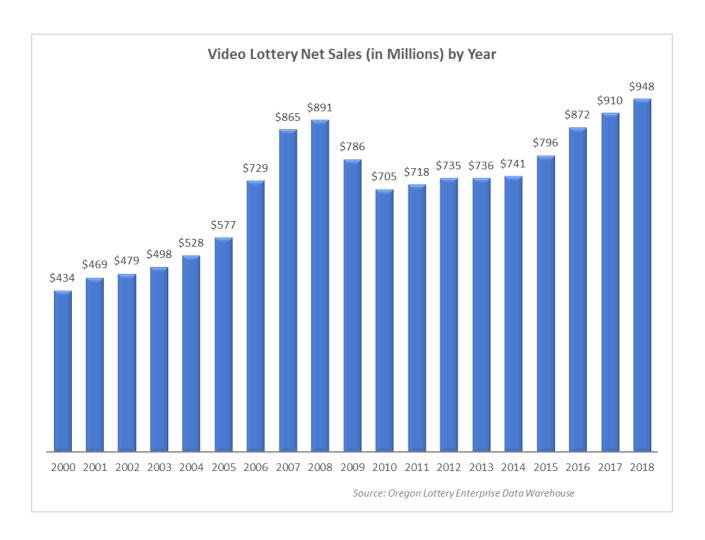

In addition to Sports Action, legislation in 1989 authorized Video Lottery. However, the Governor suspended its implementation. Two years later, the Legislature reauthorized the commission to offer Video Lottery, beginning with video poker in 1992.

Only retailers that have Oregon Liquor Control Commission licenses may be given a contract to have up to six (five prior to 2004; ten at Portland Meadows) Video Lottery terminals (VLTs) on supervised premises. Video Lottery games are restricted to persons over the age of 21.

Video Lottery revenue (often called net sales or net receipts) is the sum of the dollars wagered less the sum of the dollars won (i.e., prizes). 2.5% of Video Lottery net receipts are dedicated to counties for economic development.

In May 2005, the Lottery started offering line games (in addition to video poker) and revenue grew substantially. However, the 2008 recession coupled with the smoking ban that started in 2009 reduced

revenue by double digits with no sign of recovery until 2014. Video Lottery revenue has since grown steadily year-over-year and is currently reaching a billion dollars each biennium.

### Lottery Revenues

Lottery revenues include non-game revenues such as interest earnings, penalties, and allowances for bad debts, in addition to game revenues. The net non-game revenue was \$2.7 million in the fiscal year 2015-16.

The table below shows the history of Traditional and Video Lottery game revenues for the past 25 years. The introduction of Video Lottery games in 1991-92 quickly enhanced the revenue stream, and during the same period Traditional games also grew to \$78.1 million in 1994-95.

Traditional net revenue averages approximately \$60 million a year and comprises approximately 10% of total revenue, while Video Lottery represents approximately 90% of total revenue.

The introduction of line games in 2005 generated significant growth in total revenue, but its rapid growth stabilized after a couple of years, and was further affected by the economic downturn and smoking ban in 2008-2009 causing net revenue to decline by a combined 20%. However, revenue recovered most of its declines and is forecasted to grow at a sustainable long term average of about 2%. Today, Lottery proceeds surpass a billion dollars each biennium.

LOTTERY REVENUE (\$ millions)									
Fiscal	Traditional Games				Video Games				
Year	Gross			Net	Gross			Net

### **Lottery Transfers and Distributions**

Fiscal year revenues don't align precisely with transfers for a variety of reasons. For example, there is a one-quarter lag in transfers, and there are also revenues transferred (such as unclaimed prizes and administrative savings) which are not considered in determining total Lottery revenue. Transfers may also differ from revenues because of the amounts moved in or out of various contingency reserves.

The table below shows the amounts expected to be transferred in 2017-19 according to the December 2018 Oregon Economic and Revenue Forecast. The purpose of presenting this table is to show details of voter approved constitutional distributions, statutory distributions and other mandatory and discretionary distributions. Two voter-approved distributions have been added in November 2016.

Debt service on lottery revenue bonds has first claim on lottery revenue transferred to the Economic Development Fund. Thereafter, the constitutional dedications for the Education Stability Fund (18% of net proceeds), the Parks and Natural Resources Fund (15% of net proceeds), the Veterans' Services Fund (1.5% of net proceeds), and the Outdoor School Education Fund (lesser of 4% of lottery transfers or \$22 million a year) follow. After those distributions comes the statutory dedication to county economic development (2.5% of video lottery net receipts), the Higher Education Coordinating Commission (1% of lottery transfers), the Gambling Addiction Fund (1% of lottery transfers), and the County Fair Account.

Any balance available after these transfers will be used by the legislature in any of the areas allowed by the constitution. Amounts available for legislative allocation do not include beginning balances, reversions, or interest earned on the Economic Development Fund.

# Lottery Transfers and Distributions (December 2018 Oregon Economic and Revenue Forecast)

	2017-19
(in millions of dollars)	Current Forecast
LOTTERY EARNINGS	
Traditional Lottery	165.988
Video Lottery	1,224.916
Administrative Actions	47.814
Total Available to Transfer	1,438.718
ECONOMIC DEVELOPMENT FUND	
Beginning Balance	49.017
Transfers from Lottery	1,438.718
Other Resources <sup>1</sup>	6.035
Total Available Resources	1,493.769
ALLOCATION OF RESOURCES	
Constitutional Distributions	
Education Stability Fund <sup>2</sup>	258.969
Parks and Natural Resources Fund <sup>3</sup>	215.808
Veterans' Services Fund <sup>4</sup>	21.581
Other Distributions	
Outdoor School Education Fund <sup>5</sup>	24.000
County Economic Development	41.286
HECC Collegiate Athletic & Scholarships <sup>6</sup>	8.240
Gambling Addiction <sup>6</sup>	12.499
County Fairs	3.828
Other Legislatively Adopted Allocations <sup>7</sup>	853.830
Total Distributions	1,440.040
Ending Balance/Discretionary Resources	53.729

Note: Some totals may not foot due to rounding.

- 1. Includes interest earnings on Economic Development Fund and reversions.
- 2. Eighteen percent of proceeds accrue to the Ed. Stability Fund, until the balance equals 5% of GF Revenues. Thereafter, 15% of proceeds accrue to the School Capital Matching Fund.
- 3. The Parks and Natural Resources Fund Constitutional amendment requires 15% of net proceeds be transferred to this fund.
- 4. Per Ballot Measure 96 (2016), 1.5% of net lottery proceeds are dedicated to the Veterans' Services Fund
- 5. Per Ballot Measure 99 (2016), the lesser of 4% of Lottery transfers or \$22 million per year is transferred to the Outdoor Education Account. Adjusted annually for inflation.
- 6. Approximately one percent of net lottery proceeds are dedicated to each program. Certain limits are imposed by the Legislature.
- 7. Includes Debt Service Allocations, Allocations to State School Fund and Other Agency Allocations

### OTHER TAXES

### **EMERGENCY COMMUNICATIONS (911) TAX**

### Current Tax Base (Tax sunsets 12/31/2021)

The Emergency Communications Tax is imposed upon each consumer or paying retail subscriber with access to the 911 emergency reporting system. Liability for the tax rests with the consumer or subscriber but providers and sellers of taxed communication service are responsible for collecting the tax. Returns and tax receipts are submitted quarterly by providers and sellers to the Department of Revenue. Any consumer subject to the tax and from whom the tax was not collected, is required to file and remit tax annually.

Non-Prepaid Wireless, Wireline & Voice over Internet Protocol (VoIP)

**\$0.75** per month per subscriber line

# Highlights of Recent Legislative Change - HB 4055 (2014)

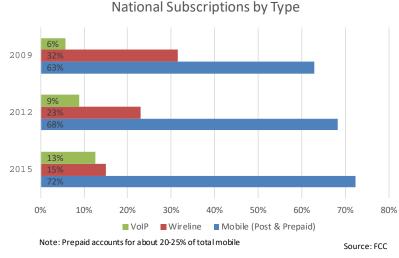

As declared in HB 4055, the intent of the Legislative Assembly in enacting measure was to facilitate administration of collection of emergency communication taxes.

- Defined "interconnected Voice over internet Protocol service" and formalized application of existing tax on VoIP subscribers
- Established and defined necessary terms for enacting 911 tax to be imposed on each prepaid wireless retail transaction occurring in OR after 10/1/2015
- Imposed a temporary transitional tax (1/1/2015-9/30/2015) upon each provider of prepaid wireless telecommunications service equal to \$0.75 cents per month for each customer with a mobile telephone number associated with an OR location

 Requires Department of Revenue to report to Legislature on or before 2/15/2017 regarding effectiveness of provisions contained within act in collecting required tax from all consumers and estimate the amount of revenue received on or after 10/1/2015 attributable to operation of provisions contained within act.

### **Prepaid Wireless Telecommunications**

- \$0.75 per retail transaction
- "Prepaid wireless telecommunications": service that is sold in predetermined units or dollar amounts, must be paid for in advance...ORS 430.105(17)
- "Retail Transaction": each individual purchase, associated with an individual access number...of prepaid wireless telecom service...ORS 430.105(22)
- Retail transaction occurs in OR if:
  - 1) Sale at business located in OR,
  - 2) Consumers shipping address is in OR
  - 3) Associated with an OR phone number
- Each seller permitted to deduct and retain 2% of amount of tax collected in compensation of collection expenses

### Tax Distribution

Prior to distribution, Department of Revenue may receive up to 1% of E911 receipts for administrative cost purposes, Office of Emergency Management may receive up to 4%. After deductions for the administrative expenses, 35% is transferred into the Enhanced 911 subaccount with the remaining funds distributed to cities and counties on a per capita basis. Funds in the Enhanced 911 subaccount are primarily used to make direct payments to vendors for Public Safety Answering Points (PSAPs) circuit charges and software upgrades. Local governments use the revenue to partially fund the expense of PSAPs across city and county governments.

### History

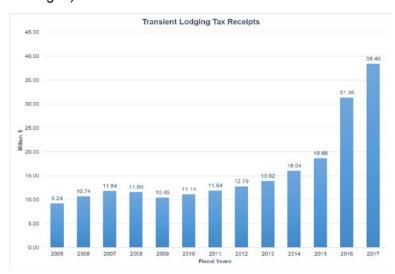

The tax was enacted in 1981 to aid local governments in establishing, operating or improving an emergency 911 reporting system. From enactment in 1981 to 1991, the tax imposed was 3 percent of the monthly rate charged for basic telephone exchange access services. In 1991 the rate was increased to 5 percent. Beginning in 1995, the tax imposed changed to \$0.75 per month per circuit applied to all forms of wired and wireless telecommunications services. HB 4055 (2014) made further changes which are described on the previous page. There have been six sunset extensions of this tax since 1981.

### TRANSIENT LODGING (HOTEL/MOTEL) TAX

The legislature created Oregon's state transient lodging tax program in 2003 to provide core funding to the statewide tourism marketing agency (Travel Oregon).

### Background:

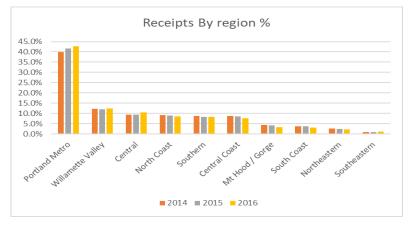

In the 1930s, Oregon's then new state tourism bureau was part of State Highway Commission. Later, the tourism office joined the Oregon Economic Development Ву Department. 2003, the Legislative Assembly (HB 2267) decided to make the Oregon Tourism Commission an independent agency. The same legislative established a statewide one percent transient lodging tax to help fund the tourism commission. Under the 2003 law Legislature defined transient lodging in ORS 320 as "hotel, motel and inn dwelling units that are designed for temporary overnight human

occupancy, and [which] includes spaces designed for parking recreational vehicles during periods of human occupancy of those vehicles." The law requires the Oregon Tourism Commission to spend at least 80 percent of lodging tax net receipts on state tourism marketing programs and up to 15 percent of net receipts on regional tourism marketing programs. The 2003 law also constrained increases or new lodging taxes by local governments. Any new or increased local taxes after 2003 requires that 70 percent of net revenue be spent to fund tourism promotion or tourism-related facilities. Eighty-four cities and fifteen counties in Oregon levy a locally administered transient lodging tax and are also

included in that definition.

The 2005 Legislative Assembly expanded the definition of transient lodging (HB 2197) to include dwelling units used for temporary human occupancy, where temporary was defined as fewer than 30 days. The 2005 law explicitly exempted certain other temporary overnight dwelling units, such as hospitals and nonprofit summer camps. The 2013 Legislative Assembly clarified circumstances under which a transient lodging intermediary (HB 2656) rather than a lodging provider would be the entity responsible for collecting and

remitting transient lodging taxes. Transient lodging intermediaries include Online Travel Companies (OTC), travel agents, and tour outfitter companies, among others. The law specifies that the entity collecting the payment from the customer is the entity required to collect and remit the tax based on the total retail price paid by the customer. FY 2016 collection is about \$21 million.

The 2016 session increased the tax rate from 1% to 1.8% for the period July 1, 2016 to July 1, 2020. On July 1, 2020, the rate goes to 1.5%. The new higher rate is expected to generate an additional \$12.7 million in the 2015-17 biennium and \$27.4 million in the 2017-19 biennium after allowance for collection costs. A requirement that 20% of revenue collected from the transient lodging tax be spent implementing the regional cooperative tourism program and 10% be allocated to a competitive grant program to fund tourism-related facilities and events. The bill directs the Tourism Commission to base grant awards on demonstrated return on investment, geographic equity and community support.

### **Health Care Provider Tax**

### Health Care Provider Taxes

Currently, Oregon has three different health care provider taxes<sup>1</sup>: (1) hospital assessments<sup>2</sup> (on Diagnostic Related Group hospitals, and Types A and B rural hospitals), (2) assessment/tax on health insurance plans, and (3) long-term care facility (nursing home) assessment.

Four types of provider taxes were first authorized in the 2003 legislature by HB 2747 to generate revenue to help fund Oregon's Medicaid programs: assessments on net patient revenues of certain hospitals (hospital assessment), assessments on Medicaid managed care plan premiums (managed care organization tax), assessments on long term care facilities or nursing homes (long term care facility assessment), and assessments on programs of all inclusive care for the elderly (PACE assessment)<sup>3</sup>. These enacted provider taxes had sunset dates.

Over time, these provider taxes went through sunset extensions, modifications, and terminations. For example, during a major overhaul of Oregon's state health care delivery system in 2009, the legislature decided to continue hospital assessments and long term care facility assessments, but put an end to managed care organization tax in 2013. At the same time, the legislature created for a limited duration, assessments on premiums of certain health insurers (insurers tax). This funding bill, HB 2116, was the companion bill to HB 2009 that implemented the restructuring of Oregon's state health care system.

Most recently, the 2017 legislature extended existing hospital assessments through 2021. It also expanded hospital assessment to include rural hospitals. The legislature also decided to impose assessment on certain health insurance plan premiums for two years, starting from 2018. These changes were stipulated in HB 2391. The long term care facility assessment has been extended through 2026 by the 2018 legislature.

### Health Care Provider Taxes Collection History

The following table shows collection history of provider taxes since their inception. With an expansion of OHP and commensurate caseload increase, provider taxes have increased substantially. Among all provider taxes, hospital assessment has seen the most increase over the years. The tax rates, jointly determined by the Oregon Department of Human Services (DHS) and health care providers, have often reflected funding needs.

.

<sup>&</sup>lt;sup>1</sup> A health care provider pays a tax or fee to a state government, which then uses the money to bring in additional federal Medicaid fund. In health care provider tax discussions, assessments and taxes are used interchangeably. These assessments or taxes are most often referred to as medical provider taxes or simply provider taxes.

<sup>&</sup>lt;sup>2</sup> Rural hospitals have lower assessment rates than Diagnostic Related Group (DRG) hospitals.

<sup>&</sup>lt;sup>3</sup> PACE is a Medicare and Medicaid program that helps certain older people meet their health care needs in the community instead of going to a nursing home or other care facility. PACE tax was supposed to bring in \$1.5 million in the 2003-05 biennium, but it did not meet federal requirements and was not implemented. To receive matching federal Medicaid money for eligible participants of the program, the state has been using General Fund.

### **Health Care Provider Taxes (\$ millions)**

(as of December 2018)

	Hospital Assessment	Managed Care Organization (MCO) Tax	Insurers Tax	Long Term Care Facility Assessment	Combined Total
FY 2004		\$8.1		\$24.2	\$32.3
FY 2005	\$37.6	\$61.3		\$29.2	\$128.1

### Health Care Provider Taxes and the Oregon Health Plan

Health care provider taxes and matching funds from the federal government have played a key role in financing the Oregon Health Plan or OHP. The OHP is the state's Medicaid program. It provides health care coverage for Oregonians with limited income and resources, including working families, children, pregnant women, single adults, and seniors. In the 2017-19 biennium, a little over one million Oregonians are covered by the OHP.

Total OHP funding in 2017-19 is approximately \$14.3 billion. 25.5% (\$3.65 billion) of the total funding comes from state sources and the remaining 74.5% from the federal government. About 40% of the state sources are derived from health care provider taxes. Of the remaining state sources, about one half comes from General Fund.

Not all provider taxes are dedicated to OHP. While hospital and insurance plan assessments provide funding for OHP, the long term care facility tax offsets General Fund expenditures for nursing facility services, independently of OHP. In addition, some of provider taxes have been used for hospital quality improvement and health initiative purposes

### Health Care Provider Taxes and Funding of OHP

The following chart shows funding sources and their revenues (or estimated revenues) over several biennia. It also illustrates fluctuating weights of sources in funding OHP.
