

Notice of Work- Dewatering Test

To: Capitol Building

From: Oregon State Capitol Renovation (OSCR) Team

Date: January 22, 2015

The following OSCR project team members will be working in the Capitol:

- Several representatives from Westerberg Drilling Inc., JE Dunn and Capitol Facility Services

Scheduled Date and Time of Work:

- Drilling activities will be performed Monday, January 26th, 2015 – Friday, January 30th, 2015
- Testing will be conducted Monday, February 2nd, 2015 – Friday, February 6th, 2015
- Work will be done during night hours, from 7:00 p.m. – 4:00 a.m. to avoid disruption

Location of work:

- Work will be performed in the Southeast corner of the North parking lot, on the sidewalk.
- Work materials will be stored in one parking space, as outlined in the diagram below.

Work to be performed:

- Team members will be drilling a hole approximately 16 inches wide and 60 feet deep.
- Once the hole has been drilled, the team will test the amount of water beneath the building and the water table flow rate.

Impacts:

- The team will be escorted by a Facility Services representative while the work is being conducted.
- All work will be performed during night hours, 7:00 p.m. – 4:00 a.m. to avoid any disruption to Capitol staff.
- The drilling site and the contractor's materials and equipment will be enclosed with fencing for safety precautions.
- One handicap parking space will be unavailable for the duration of this work.
- This work will create loud noise, but should not impact the daily work functions as the work is taking place at night.
- The North parking lot and sidewalk will be open for normal use.

Purpose of work:

- If the project is approved to move forward, the soil around the building will be heavily excavated and the measurements gathered through this investigation will assist in planning for that work. Obtaining the measurements of the amount of water and flow rate will also assist the engineers and architects in the sustainable, mechanical, electrical and plumbing design of the renovated Capitol.

It is our goal to gather the above information in the most discreet method possible. Should any questions or concerns arise in the process of the work being conducted, we welcome you to contact us in Room 354 at 503.986.1190.

Thank you,
Jessica Lacasella
