Legislature Passes Bill on Artificial Intelligence

Salem, OR – Today, the Oregon Senate passed HB 4153 introduced by Representative Daniel Nguyen, House District 38. HB 4153 creates a task force on Artificial Intelligence (AI) narrowly focused on the identification and examination of key AI terms and definitions as it pertains to its use in technology for use in legislation.

As AI systems progressively permeate industries, governance and daily life, the absence of a clear and comprehensive legislative framework poses significant challenges. Consistent and common terms and definition will help establish a legal infrastructure that guides the responsible deployment and use of AI, ensuring that its potential benefits are harnessed while mitigating risks.

“A task force allows for a collaborative conversation with policy makers and industry leaders, researchers and other stakeholders,” said Rep. Daniel Nguyen. “As we stand at the precipice of this technological revolution, we need to position our state as a leader in responsible AI governance.”

HB 4153 will now go the Governor’s desk to be signed into law.
