

Secretary: Vote explanation please. Senator Boquist

“HB 3284 contains language stating covid information can be released if meets federal law. This is stated at least twice in the bill. The Carrier claims the bill would not allow the release of vaccine data to support vaccine passports yet the ‘federal law’ language is in the bill. Hopefully, the Carrier is correct but courts use the word of the law not some Floor speech. Further, the Governor, Oregon Health Authority and OSHA with Attorney General backing claim federal law allows them to require vaccine proof, passports, and allows forcing business to enforce vaccines. Who is correct does not matter given the Governor can use unlimited tax dollars to support her position. The Governor can bankrupt any business.”
