

Secretary: Vote explanation on SB 1506. Thank you, Sen Boquist

SB 1506 extends an experimental emergency medical regime on covid that is in serious medical and scientific question outside the USA along with many states. The original actions, and present proposal, violated the Nuremberg Code, Helsinki Agreements, Rome Code, Genocide Convention, and UN Protocols. In short, the previous actions were and are crimes against humanity and genocide no different than the scientific actions and experiments of the Axis national socialists and Japanese medical establishment between 1933 to 1945. Those crimes against humanity for the most part were not prosecuted in earnest until the 1960s. German judges guilty of 'judicial murder' were sentenced to life. There is no defense allowed in these crimes claiming the person was following orders. Citizens were simply lied to about mRNA injection benefits. Real treatments were banned for profit. Doctors were persecuted for attempting to save lives. We see from the Balkans, Rwanda, Iraq, Afghanistan, Sudan, Libya, Syria, Yemen, Gaza and Ukraine the lessons were not learned from history by American governmental structures. Excess deaths from covid experimentations time frame are in the millions. Governments, pharmaceuticals, and mainstream media are working overtime to cover them up. To protect profits, which is the net result of this bill? This is a repeat of other genocides. Courts on a global scale are already agreeing we were wrong. It is time to stop so real science, not experimentation, can be reviewed. No on pharmacist liability. No on OHA. No on corporate profits. No on SB 1506.
