

Secretary Brocker: Vote explanation. Sen Boquist

“SB 1522 is a technical change to the reporting and investigation bill of last Session. It started supposedly as a simple fix but has evolved from TSTB to a broader set of changes. It appears to have become more complex than intended for the short session. However, the working group seems to have come to a starting point to attempt a variety of technical changes. Therefore, waiting for the long session would be just that ... a waiting period. Thus, better to see if this will work now then fix again in the long session if necessary. More changes will be required. Some aspects of the bill are in progress already hence the emergency clause.”
