

SB 1553 is supposed to address drug use, but only on a bus or train. This concept is ludicrous. Majority party members spoke in support of the bill stating that it should be criminal to use drugs on public transit, but in the same breath saying that drug use should not be criminal. This preposterous position does nothing to address the crisis of drug use and addiction in Oregon caused by the passage of Measure 110. I support criminalization of drug use across all of Oregon not just on public transportation.
