

Senator Robinson would like to submit this vote explanation for SB 266 A.

“This bill came before committee heavily amended at the 11th hour. This amended and replaced or “gut and stuff” bill is overly complicated and requires greater consideration.

The -10 amendments were posted at 12:27 PM on 4-13-2021, voted on in committee at 3:35 PM on 4-13-2021, required the committee rules be suspended to be passed.

Three hours is not enough time to examine and consider a whole new bill.

This 14 page amendment to replace the original single page bill took more than 20 minutes to read on the floor of the Senate.

A well-intended bill, but legislation of this magnitude needs careful consideration and public input; therefore, I cannot support SB 266 A.”
