

Please file this vote explanation in the Senate record.

“SB 5711A is a budget bill for bills that have yet to pass the Legislature. Complete ignorance of the process. Since when does a legislator approve money for a bill and policy that is not yet law. If time is the issue, the Emergency Board exists for funding interim policies thus should be the approving authority. Further, this bill budget could have passed in the February 2020 short session had the Democrat Speaker of the House and her party members not fled the Capitol for the last three days of the 2020 Session.”
