

SCR 1 Vote Explanation: The bulk of this resolution is intended to support election workers and the work that they do. It condemns the threat of violence against these workers, which is admirable. There is no place for violence in elections or politics, this is rather obvious and doesn't really need to be stated. Although I agree with this premise and condemn violence, I did not support the resolution because I could not agree with all of the statements that it makes. If someone questions the integrity of an election or the process, this should not be looked at as misinformation or a threat of violence. I am hopeful that this bill can be amended in the House to remove inaccurate statements so that I can support and repass this amended resolution.
