

Secretary: Vote explanation please. Senator Boquist

“SJM 3 is a memorial letter to Congress requesting the federal government pay for damages to private property home owners when fires on federal lands destroy citizens homes on their private lands. Voted yes out of courtesy. Federal government seizes citizens if they cause a fire on federal land, then recoup their government losses from the citizen, however, they could care less about private property destruction as this is a 200 year old problem. Worse, in my experience, these letters sent to the Congressional Clerks in DC are never read by any member of Congress. Every member of Congress knows this travesty exists. DC government serves government not the People.”
