**Statement from Senate Majority Leader Kayse Jama on Oregon's
Economic Outlook and Revenue Forecast**

SALEM, Ore. – The State of Oregon's Chief Economist today issued the latest state revenue forecast and economic analysis. **Senate Majority Leader Kayse Jama (D – East Portland, Damascus, Boring)** made the following statement:

"Today Oregonians have the clearest measure yet of the harm to our state brought by President Trump's budget bill and unstable economic policies: they will end up costing Oregon more than \$800 million over two years.

"We know Trump's tariffs continue to drive inflation—raising costs of everyday goods and threatening good-paying jobs—while tax breaks go to billionaires, funded by cutting access to food and health care for Oregon's struggling families. Oregon Senate Democrats will move forward ready to confront the budget challenges ahead under this vast disinvestment by the president and his enablers in Congress.

"Senate Democrats will continue to stand strong with Oregon workers, families, vulnerable communities, and small businesses despite this massive federal attack on the prosperity of our state."
