

10 THINGS YOU DIDN'T KNOW ABOUT THE LOW CARBON FUEL STANDARD

1. The LCFS acts like a 'hidden gas tax' that will drive up fuel prices in Oregon — estimates range between \$0.19 and \$1.00 per gallon.
 2. The LCFS forces businesses to pay more to purchase fuel 'credits,' driving up prices on gas, groceries and other consumer goods as transportation cost spiral up.
 3. The LCFS could result in a loss of 29,000 local jobs due to higher costs for businesses.
 4. Not one cent of the cost to Oregon families and small businesses from the LCFS will go toward building safer roads and bridges in Oregon.
 5. Because of unethical backroom deals leading to the LCFS, federal prosecutors have subpoenaed all records from the Governor's office dealing with the LCFS.
 6. Democrats refused to give voters a chance to vote on this hidden gas by declaring the LCFS an emergency, preventing Oregonians from referring this costly program to the ballot.
 7. The State of Oregon shouldn't be making choices about what kinds of fuel you should buy or what kinds of cars you should drive.
 8. The LCFS benefits large, out of state corporations by mandating the use of alternative fuel not available here in Oregon.
 9. The LCFS rewards 'Crony Capitalism' and politicians with financial ties to out-of-state corporations, special interests, and energy speculators -- the real winners from LCFS.
 10. The mandate is designed to be unreachable, robbing consumers to pay a windfall to "alternative" energy producers. The LCFS cannot be met by wholesalers and distributors because adequate quantities of the "right type" of ethanol fuels do not exist.
